Index

- abstract concepts, difficulty defining, 95
- activation, 57
 - experimentation's role in understanding of, 59
 - focus on norm required for, 58
 - network structure, organization of concepts in, 72, 73
 - schemata and scripts activated by categorization, 81
 - situation and context, specificity to, 80
 - spreading activation process, 70–76, 83
- Alexander, Jason, 221, 231
- Allison, S. T., 173
- altruism, 16–20, 105, 106, 189
- ambiguous situations leading to conflicting interpretations of applicable norms, 78
- Andersen, Hans Christian, 185, 196
- anti-social and pro-social behavior. *See also* unpopular norms
 - descriptive *vs.* social norms used to control, 64–68, 70
 - evolution of norms controlling, 214
 - external interventions affecting, 195
 - group communication creating negative norms, 177
 - manipulation of norms to control, 7
 - “preaching to the converted,” problem of, 75
 - transgressions of social norms, effect of, 72
 - zero tolerance policies, effectiveness of, 67, 73
- AR (Authority Ranking), 92
- Ash, C., 193
- asymmetric information and payoffs, Ultimatum games with, 118–121
- attention to cues leading to categorization, 85–88
- attribution error, 189
- Authority Ranking (AR), 92
- awareness and choice, 47
- Axelrod, R., 217
- Bayesian games
 - awareness and choice in following social norms, 48
 - fairness norms and Ultimatum games, 121
 - prisoner's dilemma games transformed into coordination games by cooperative norms, 27, 28

- Bayesian games (*cont.*)
- scripts, social norms embedded in, 94
 - unpopular norm formation and collapse, 181
- behavior. *See also* anti-social and pro-social behavior; deliberational route to behavior; heuristic or problem-solving route to behavior
- herding behavior and emergence of fairness norms, 216
 - psychological *vs.* behavioral account of emergence of social norms, 8–10
 - social norms as regulating behavior conditional on other people's behaviors, 219
 - social norms not simply identifiable with patterns of, 8–10
- beliefs and desires. *See* expectations and preferences
- beneficial *vs.* negative norms. *See* anti-social and pro-social behavior; unpopular norms
- benevolence, 16–20, 106
- Bettenhausen, K., 176
- bias and stereotyping
- group identity leading to, 134–135, 153–157, 190
 - meaningless categorization and intergroup discrimination, 134–135, 154, 155
 - role-schemata, 93
 - schemata and scripts linked to, 81, 155
 - self-stereotyping, 160
 - social categories leading to, 89, 90
 - unpopular norms, formation and survival of, 179, 184
- Blount, S., 125
- Bouas, K. S., 164, 165, 166, 167, 168, 175
- Brewer, M. B., 158, 161, 166
- categories
- natural kinds, 89, 91, 96
- categorization, 83–85
- attention to cues leading to, 85–88
 - comparison process as hallmark of, 85
 - conscious or deliberative, 93
 - cues as basis for, 57
 - defined, 83
 - exemplars, 84, 91
 - familiarity with categories, effects of, 86, 88
 - framing effects, 87
 - group identity, as basis for, 134–135, 154, 155, 156
 - heuristic route to behavior, 5
 - human artifact categories, 88, 89
 - interpretative issues regarding, 85–88
 - meaningless categorization and group identity, 134–135, 154, 155, 158, 162
 - natural kinds, (*See also* natural categories) 88–89
 - preferred levels of, 89
 - prototypes, 83, 91
 - psychological essentialism, 89, 90, 91
 - representativeness heuristic, 87
 - schemata and scripts activated by, 81
 - social dilemmas, 170, 171
 - social kinds, 89–93, 96
 - spreading activation process and, 83
 - unconscious or non-declarative nature of, 97
- Chen, X. P., 172
- Cialdini, R., 29, 62, 63–70, 71, 75, 87, 151, 162
- classroom behavior studies, 186, 191
- codified norms distinguished from social norms, 8
- cognitive processes. *See also* categorization; schemata and scripts
- awareness of or access to, 48

- experiments guided by
 - understanding of, 58
- focus on norms and attention to
 - cues grounded in, 58
- group identity derived from, 154
- laboratory experiments invoking
 - conscious choice, 62
- network structure, organization of
 - concepts in, 72, 73
- operations involved in, 81
- social dilemmas and, 170–175
- social identity as, 160
- spreading activation, 70–76
- cognitive shortcuts and heuristic route
 - to behavior, 5
- collective habits, 20–21, 31
- Collins, A. M., 71
- commitments. *See* promise-making
 - and cooperation, relationship between
- common fate inducing group identity, 164, 166
- commons dilemmas, 87, 161
- Communal Sharing (CS), 92
- communications effect
 - carry-over of effect after change of rules, 148–149
 - computer opponents providing no expectations, 168–170
 - experiments illustrating, 144–146
 - generic cooperation norms
 - discredited as explaining, 145, 147, 151
 - group identity as explanation for (*See* group identity)
 - negative norms formed via, 177
 - norm formation and, 176
 - perceived consensus as explanation for, 165, 166, 167, 175
 - pluralistic ignorance, lack of
 - communication leading to, 187
 - possible explanations for, 141, 145
 - relevance of discussion and, 164, 165, 166, 167
 - self-efficacy, 163–164
 - social norm explanation as
 - alternative to group identity theories, 148–150, 151–152, 162, 168–175
- comparison process as hallmark of
 - categorization, 85
- compliance with norms. *See* conformity to norms
- computer opponents, 125, 168–170
- conditional cooperation, 140
- conditional preferences
 - collective habits distinguished from social norms by, 20–21
- conditions for descriptive norms to exist, 31
- conditions for social norms to exist, 11, 15–16
- conformity, 191
- fairness norms, 101, 112, 128, 234
- personal/moral and social norms
 - distinguished by, 20–21
- conditional strategies supporting
 - cooperative norms, 215
- conflicts of interest, 2, 78
- conformity to norms
 - conditional preferences for, 191
 - contingency and, 1
 - deliberate evasion of norms, 9, 128
 - existence of various types of norm, relevance to, 38
 - inconsistency in, factors affecting, 43–46
 - informational cascades and, 198, 203. (*See also* informational cascades)
 - motivation for, 190–193, 203
 - pluralistic ignorance, group identity, and unpopular norms, 190–193
 - situation and context affecting, 79
- conscious behavior. *See* deliberational route to behavior
- consensus, perceived, 165, 166, 167, 175
- consequentialism, 57

 expectations, 125, 168–170
 conditional cooperation in social
 dilemmas, 140
 constructivist explanation of norms
 in terms of, 2
 context-dependent nature of,
 55–59
 defining social norms in terms of,
 9–10
 deliberational view of behavior and,
 6
 descriptive norms, 30, 32
 dispositional account of, 6
 fairness norms and Dictator games
 with uncertainty, 125
 fairness norms distinguished from
 fairness preferences, 101–102
 fairness norms, emergence of,
 216
 fairness norms, reciprocity, and
 Ultimatum games, 112
 formation of, 176, 178
 heuristic view of behavior and, 6
 lack of knowledge about existence
 or nature of, 177, 178
 motivation to follow social norms
 based on, 22
 personal dispositions, expectations
 of others based on, 141
 pluralistic ignorance arising from
 misrepresentation of, 187,
 188–190
 rational reconstruction of social
 norms using, 3, 10
 reciprocity, expectation of, 15, 135,
 136
 scripts, expectations as part of, 135
 social comparison leading to
 misrepresentation of, 179, 180,
 182–186
 stability of preferences, assumptions
 regarding, 101
 experiments. *See also* specific
 experimental topics, e.g. helping
 behavior studies
 auxiliary hypotheses as basis for, 71
 definition of social norms affecting
 design of, 57

- importance of, 58, 59–63, 76
 “local” nature of norms and
 interpretation of results, 77
 social dilemmas, 141, 142–146,
 174
- fads, origins of, 204
- fairness norms, 100–102. *See also*
 emergence of fairness norms;
 expectations and preferences
 (beliefs and desires); inequality
 aversion (Fehr-Schmidt) model
 and fairness norms; Ultimatum
 games and fairness norms
 categorization and intergroup
 discrimination, 134–135
 conditional preferences, 101, 112,
 128, 234
 constraints model *vs.* norms-based
 model, 130
 cultural differences, 114
 Dictator games, 102, 106, 115, 125,
 137–139
 disagreement about, 100
 equilibria, 111
 equity *vs.* equality, 101, 114, 124,
 125, 133, 136
 group favoritism and, 130–136
 “local” nature of, 76, 77, 78, 83
 norm-based *vs.* rule-based
 predictive model, 112–117
 preference for fairness
 distinguished, 101–102
 psychological essentialism and,
 92
 reciprocity model, 110–112, 120
 schemata and scripts, 100, 114
 self-serving biases and, 101, 123,
 130–136
 situation and context affecting
 observance of, 101, 109, 112–117
 social preferences, 107–110
 uncertainty, Dictator games with,
