

## Author index

This index contains only citation references, listed by author. Proper names appearing in the text, or those actually discussed as such in the *Notes*, appear in the subject index that follows. *Note* numbers are given in parentheses. Multiple *Note* references for a page are given in the order in which they appear on that page.

- Rosen, N., 319, 391 (38)  
 Rosenfeld, L., 318  
 Rossi, B., 236  
 Rubens, H., 273  
 Rudolph II of Prussia, 66  
 Rutherford, E., 276, 278, 280; model of atom, 276  
 Rydberg, J., 275; constant, 275, 280; formula, 275
- Sagredo, G., 84  
 Salviati, F., 80, 82, 84, 103, 143  
 Saturn, 49, 50, 66, 97, 124, 152; moons of, 104  
 Schlick, M., 160, 367  
 Schrödinger, E., 284–9; cat paradox, 311–13, 393 (12); on determinism vs. indeterminism, 349; equation, 291, 292, 295, 343, 392 (10), 394 (4); and the explanation of life, 363, 364; interpretation of the wave function, 293; wave mechanics, 285, 321, 391 (29). *See also* historical contingency; quantum mechanics
- science: element of belief in, 30; geometry as a model of, 8; goals of, 181, 359–76; internal vs. external factors in, 353–5; natural, 5; and opinion, 4; and religion, 144, 145, 164; theological underpinnings of, 145, 170; as truth, 4. *See also* Galilei; Monod; Newton; scientific method
- scientific knowledge, 11, 34–6, 359–76. *See also* objectivity of science; scientific method
- scientific method, 1, 2, 9, 25, 29, 30, 93, 357; styles of inference in, 365–8. *See also* Aristotle; Bacon; Descartes; Duhem; Einstein; experiment; Galilei; Mach; Monod; Newton; Planck; Popper
- scientific realism. *See* realism
- scientific research program, 397 (38)
- scintillation counter, 236
- Scripture, 60, 137–44, 146, 147, 149. *See also* Bible
- seasons, 44
- secular (motion), 123
- semiclassical model. *See* Bohr
- Seleucus of Babylon, 124
- sense experience, 30, 361; Aristotle on, 4, 5, 16; Mach on, 367; Planck on, 35; Plato and, 4. *See also* logical positivism
- separable (equations), 171
- separability. *See* nonseparability
- Shakespeare, W., 22, 65
- Shapley, H., 265
- signaling. *See* no-signaling theorem
- Simplicio, 80, 84, 143, 144
- simplicity (of explanation), 50, 78, 161, 164–7
- Simplicius, 54, 139, 143
- simultaneity, 231, 232, 238; absolute, 231, 387 (13); and the block universe, 250, 388 (20); and coexistence, 248–50; conventionality of, 231, 337, 388 (14). *See also* Einstein
- de Sitter, W., 254. *See also* relativity, the general theory of
- size of the earth. *See* Eratosthenes
- sizes of the planetary orbits. *See* Copernicus
- sizes of the sun and moon. *See* Aristarchus

- Tonkin, Gulf of, 129

## Subject index

- to save the phenomena, 54–6, 138, 139. *See also* instrumentalism; truth
- Torricelli, E., 77
- trajectory, 79, 117, 118, 167, 173; in quantum mechanics, 285, 290, 318, 331, 343
- triadic model of science, 372, 373, 397 (39)
- trigonometry, 379 (16)
- truth (as a goal of science), 34–6, 281, 366, 373; Aristotle on, 4; Bacon on, 24; and Copernicus' theory, 56; Descartes on, 7, 12; Einstein on, 357, 361; Galileo on, 78; Kuhn on, 371; Newton on, 166; Planck on, 10; Plato on, 4; Popper on, 1; and simplicity, 50, 161. *See also* instrumentalism; to save the phenomena; simplicity
- turbulence, 173
- twin paradox, 246–8; 251, 388 (15); and general relativity, 248, 388 (17)
- two-sphere model, 48, 49, 52, 148
- Tyache, S., 383 (38)
- ultraviolet catastrophe, 274
- uncertainty; classical, 168; and Kierkegaard, 283. *See also* uncertainty relation
- uncertainty principle. *See* uncertainty relation
- uncertainty relation, 286, 287, 298–301, 333, 392 (13, 16); in Bohm's theory, 331, 333, 335, 337; and Einstein, 308, 309
- underdetermination, 220, 345–8, 395 (2, 14). *See also* scientific realism
- understanding. *See* explanation vs. understanding
- uniformly accelerated motion. *See* motion
- universe. *See* models of the universe
- unnatural motion. *See* motion
- Uranus, 124, 152
- Urban VIII. *See* M. Barberini
- vacuum: in Aristotelian physics, 18, 26, 27, 77, 148, 183; in early electromagnetic theory, 196, 197; in the Kaufmann experiments, 211, 217; vs. a plenum, 183; solution in general relativity, 254  
*See also* void
- variational principle. *See* maximum/minimum principle
- Vega (Alpha Lyrae), 49
- Venus, 49, 63, 64, 154
- verification: Bacon on, 24; Popper on, 33, 38
- Vienna Circle, 160, 367, 397 (23)
- da Vinci, L., 29
- vitalist theory, 375
- void, 21, 27, 50, 75, 155, 183, 184.  
*See also* vacuum
- Virgo, 268
- Vitruvius, 379 (4)
- Volta, A., 306
- Voltaire, F.-M., 166
- von Neumann, J., 288, 318
- Vulcan, 154
- warrant (for an hypothesis): Bacon on, 24; for a belief in determinism, 170–3; for the Copenhagen interpretation, 288; Einstein on, 1; Galileo on, 78; Newton on, 33, 94; various types, 34, 365–9
- Watson, J., 364
- wave: longitudinal, 184, 385 (3); standing, 273, 390 (3); transverse, 185, 186, 385 (4). *See also* aether; electromagnetic wave; interference; wave function; wave–particle duality
- wave equation. *See* Maxwell; Schrödinger
- wave function: Bohm on, 336; in Bohm's theory, 334, 335; Born on, 300, 317; collapse of, 309–11, 313; defined, 290; entangled, 311, 323, 334; example of, 291–3; Heisenberg on, 300; Planck on, 298; and probability, 293; Schrödinger on, 286, 293; 313. *See also* completeness; quantum mechanics; superposition; measurement problem
- wave mechanics. *See* quantum mechanics
- wave-particle duality, 285, 286, 291. *See also* complementarity
- weight: Aristotle on, 20, 25–7, 379 (18); Descartes on, 156; of light, 256; Newton on 112; speed as a measure of, 20, 26; the tides and, 128. *See also* motion
- Wegener, A., 262
- Weltanschauung* (world view), 374; and science, 375
- Whewell, W., 339
- whig interpretation of history, 354, 355
- Whitehead, A., 145, 170
- Whiteside, D., 381 (14)
