  - density, 147
  - ergodic, 22
  - existence, 191
  - existence from boundedness, 89
  - existence in the linear case, 97
  - exponentially mixing, 40
  - recurrence, 102
  - regularity of density, 165, 168, 170
  - strongly mixing, 33
  - uniqueness, 191
  - weakly mixing, 33
- Kolmogorov equation, 71, 135
  - mild, 136
- Koopman–von Neumann theorem, 5

*Index*

339

- Krylov–Bogoliubov theorem, 21
- Local interactions, 223
- Markovian semigroup, 12  
   Feller, 20  
   irreducible, 42  
   recurrent, 37  
   regular, 41  
   stochastically continuous, 12  
   strongly Feller, 42  
   symmetric, 18
- Markovian transition function,  
 12
- Navier–Stokes equation, 279  
   existence of invariant measure,  
   293
- Null controllability, 130
- Ornstein–Uhlenbeck process, 56,  
 177  
   in chaotic environment, 186  
   in Finance, 184  
   wave type, 178
- Random environment, 53
- Reaction–diffusion equations, 210
- Sobolev spaces, 149  
   compact embedding, 152
- Spectral measure, 54
- Spin systems, 223  
   classical, 225  
   quantum lattice, 233
- Stationary measure, 12
- Stochastic convolution, 56  
   smoothing properties, 305
- Stochastic evolution equation,  
 65
- dependence on initial conditions,  
 69  
   dissipative, 80, 87  
   linear, 96  
   mild solution, 66  
   second order dissipative, 181  
   wave type, 178  
   weak solution, 56  
   with delay, 197
- Strong law of large numbers,  
 30
- Strongly dissipative mapping,  
 73
- Transition function, 12
- Transition semigroup, 12, 56,  
 70, 97, 105, 122, 148  
   irreducible, 137, 141  
   strong Feller, 121, 129, 134,  
   153, 200
- Wiener process, 53  
   coloured, 53  
   cylindrical, 53
