- central banks (*see also* banking system):
 under Basle–Nyborg Agreement, 281;
 Central Bank of Russia, 373–4, 378, 384;
 clearing, credit, and payments in
 Commonwealth of Independent States,
 373–6, 378; G–7 country monetary
 policy decisions, 285; measurement of
 G–3 monetary policy, 291–5;
 multilateral clearing through CIS, 383–
 4; role in Japanese monetary policy
 (1977–93), 298–301; role in monetary
 policy of German, 295–8
- Centre for Economic Policy Research, 253
- Chipman, John, 35
- CIS, *see* Commonwealth of Independent
 States (CIS)
- clearing arrangements, multilateral:
 objective for CIS countries, 383–4;
 proposed for countries of former Soviet
 Union, 362
- Coase, Ronald H., 254
- Cohen, Benjamin, 217, 221, 222, 224, 231,
 233
- Collier, Paul, 57
- Commonwealth of Independent States
 (CIS), 5–6 (*see also* Former Soviet
 Union [FSU] countries); balance of
 payments problems among, 362, 374–6;
 proposed Interstate Bank clearing
 arrangement, 381, 384–7; proposed
 payments union, 386–90; ruble as
 currency in, 373; trade patterns, 363–72
- comparative advantage: endogeneity of,
 42; as endogenous product in Kenen
 variant, 42; Heckscher–Ohlin
 formulation, 42
- competition: cross-border currency, 4, 217,
 219–23, 232–8; currency markets driven
 by, 220–9, 232–3; labor market
 reallocation model, 259–62
- Corden, W. Max, 57, 69, 74, 189
- Crandall, R. W., 270
- Crockett, Andrew, 187
- Crouhy-Veyrac, Liliane, 319
- currency (*see also* exchange rates;
 optimum currency area; ruble zone):
 appreciation in Mexico (1987–93), 317–
 18; authoritative domain of, 225–7, 229–
 30, 232–4; characteristics of insular,
 219–20; competition among currencies,
 223, 227–8; in conventional optimal
 currency theory, 218–19; cross-border
 competition, 4, 217, 219–23, 232–8;
 depreciation in Mexico, 317; fluctuation
 in optimum currency area, 184–210; in
 former Soviet countries, 372–5, 382–4;
 gains from common, 218–19, 230–1;
 limited access for CIS countries, 383;
 literature of optimal, 347; pegged and
 floating exchange rates, 186–90; role of
 Euro-dollar, 231; substitution and
 internationalization, 220–3; volatility
 among ERM members, 194–5, 206–9
- currency area (*see also* optimum currency
 area): as alternative to currency region,
 233–7
- currency convertibility: feasibility of, 382;
 progress in CIS toward, 390; of ruble,
 385
- currency devaluation: choice of exchange
 rate regime in decisions for, 348–56;
 exchange rate fluctuations as cause of,
 340–1; model of decision making related
 to, 341–6; optimal policy, 340
- currency regions: as alternative to
 currency area, 233–7; characteristics and
 determinants of, 224–9; competition in
 markets for currency in, 220–3;
 definition and importance, 217;
 economics of, 229–33; hierarchy of
 currencies in, 223–4; with overlapping
 borders, 235–7
- currency space: economic, political, and
 monetary, 225–6; market role in shaping
 of, 217–18; shaping of, 230–3
- Cushman, David, 125, 127
- customs unions: analysis of Meade’s
 preferential trading in, 62–9; definition
 of theory, 58; Meade’s critique of
 Viner’s analysis, 59; Meade’s small-
 union model, 72–7; Meade’s theory of,
 59–72; natural trading partners
 hypothesis (Meade), 77–82; Russia,
 Belarus, and Kazakstan, 381; small-
 union model (Meade Model), 61, 72–7;
 theory of, 58–9
- Daniels, Joseph, 281
- data sources: balance of payments analysis
 of former Soviet countries, 376;
 exchange rate influence on currency
 devaluation, 348–9; exchange rate
 volatility analysis, 186, 190–6;
 investment response in Latin America,
 158; limitations in countries of former
 Soviet Union, 391–2; relation between
 exchange rates and investment in Latin
 America, 174–5; relation of openness to
 public spending, 92; relationship
 between exchange rate and OCAs, 211;
 risk related to exchange rate regime,
 134, 149–51
