

## INDEX

- abelianized group 74
- additive group of rationals 69
- adjoint functor 191
- alternating group 24
- Artin 119
- associated subgroups 129
- augmentation ideal 149
- augmentation mapping 149
- Axiom of choice 15
  
- basis 1
- Basis theorem 27, 84
- Baumslag-Solitar group 131
- Beyl 90
- braid group 119
- Brunner 96
- Burnside basis theorem 170
  
- Campbell 95
- canonical form 79
- Cartesian 128
- Cartesian product 64
- Cauchy's theorem 143
- CAYLEY 100
- Cayley diagram 100
- central series 169
- centre 13
- chain rule 154
- characteristic subgroup 38
  
- circulant matrix 96
- classification theorem 74
- cohomology group 142
- commutator subgroup 24
- commutative diagram 1, 137
- complement 65
- complete 145
- conjugacy problem 49
- core 115
- coset collapse 105
- coset enumeration 100
- Coxeter covering group 100, 132
- cyclic group 44
- cyclically presented group 95
- cyclically reduced word 8
  
- Dedekind 14, 77
- deficiency 87
- defining relations 41
- defining relators 41
- Dehn 49
- derivation 152
- derived group 24
- dihedral group 24
- direct product 45
- discriminant 188
  
- empty word 4
- Euclidean plane 73
- Euler characteristic 51

- Euler's formula 23  
 Euler totient function 65  
 exact sequence 137  
 exponent-sum 75
- Factor module 147  
 Fibonacci group 86  
 Fibonacci numbers 86  
 finitely presented group 41  
 Five-lemma 138  
 Fox derivative 153  
 Frattini series 170  
 Frattini subgroups 169  
 free abelian group 2  
 free group 1  
 free module 148  
 free product 128  
 free product with amalgamation 129  
 fundamental group 127
- Gaussian elimination 80  
 general linear group 72  
 generalized quaternion group 72  
 generator 41  
 Golod-Shafarevich theorem 186  
 graph 51  
 group action 64  
 group-algebra 173  
 group extension 136  
 group-ring 148  
 Grushko-Neumann theorem 191
- Hasse diagram 160  
 Havas 96  
 Heisenberg group 60  
 HNN-extension 129  
 Hopfian group 35
- interesting group 87  
 invariant factor theorem 80  
 isometry 66  
 isomorphism problem 49
- Jacobian 161
- knot group 86  
 Kostrikin 188  
 Kronecker product 163  
 Kurosh subgroup theorem 128
- Lagrange's theorem 58  
 lattice 66  
 Leibniz' rule 160  
 locally 35  
 lower central series 169  
 lower  $p$ -central series 170  
 Lucas numbers 86
- Macdonald 92  
 Mennicke 92  
 metabelian group 94

- metacyclic group 94
- Miller 92
- module 142
  
- Newman 189
- Nielsen 14
- Nielsen-Schreier theorem 22
- Nielsen reduced 28
- Nielsen transformation 26
- nilpotency class 94
- nilpotent group 88, 94
- nilpotent quotient algorithm 178
- non-Hopfian group 131
- normal form 60
  
- partial ordering 14
- permutation representation 100
- $p$ -group 143
- polynomial group 68
- Post 92
- power-commutator presentation 170
- presentation 41
- primitive 37
- pullback 128
  
- quaternion group 58
  
- rank 1
- reduced word 4
- reflection 67
- relation matrix 79
- relation module 146
- residually 37
- residually finite 144
- resolvent 96
- Richardson 96
- Robertson 95
- Roquette 186
- rotation 186
  
- Schreier 14
- Schreier generators 18
- Schreier property 16
- Schreier transversal 16, 100
- Schur 87
- Schur Multiplier 87, 132
- semi-direct product 64
- short exact sequence 137
- simple group 194
- small cancellation theory 96
- split extension 141
- stabilizer
- stable letter 129
- star graph 51
- Sterling 96
- Stillwell 192
- submodule 146
- substitution test 44
- Swan 87
- symmetric group 24
  
- tesselation 73
- Tietze transformation 45
- Todd 100
- torsion-free group 8
- torsion subgroup 85
- total ordering 15
- translation 66
