 Zola-Morgan, S., 33
 Zonderman, A. B., 83
 Zuckerman, M., 65–66, 76, 85, 167, 172, 176, 179, 284, 301

Subject Index

- AB5C (Abridged Big Five Circumplex), 68–69
 accessibility (of constructs; *see also* knowledge activation), 253
 as a personality variable, 256–258
 chronic, 256–258
 role in defensive information processing, 323–325
 idiosyncrasy of constructs, 257
 temporary, 255–256
 achievement motivation (*see* motivation)
 action identification, 353
 action orientation, 378
 activity (dimension of temperament), 87
 fetal levels of activity, 87
 actual self (*see* self-discrepancies)
 adaptation, open- systems adaptation model (Hettema), 102–103
 additive versus nonadditive genetic influence, 159, 163
 adolescence
 adjustment
 facial expressivity as indicator of, 300
 and socioeconomic conditions, 150
 adolescence limited antisocial behavior, 206
 depression and self-efficacy beliefs, 362
 and parenting, 225–226
 problem behavior
 and adult outcomes, 102
 and marginal deviations, 20
 storm and stress, 205–207
 adoption studies, 162
 adrenal glands, 173, 182, 206
 affect (*see also* anxiety; cognitive-affective processing system; depression; emotion; mood)
 influences on cognition, 336–337, 339, 343
 multiple influence processes, 336
 and motivation, 354
 and self-complexity, 274–275
 Negative Affectivity (NA) and Positive Affectivity (PA), 287–288, 303–304
 affect-cognition interactions and personality coherence, 248
 affect-as-information model, 336–337
 age, chronological
 cultural and historical variations in conceptions of, 137
 and development, 136–137
 agency (personal), 11, 49, 248, 298
 conceptual analyses of, 345–346
 cultural variations in conceptions of, 346
 and personality development, 124–125, 131, 152, 153–155, 187, 223
 as a source of personality coherence, 12
 agency beliefs (*see also* control; self-efficacy), 291, 358
 agency versus communion, 237–238
 aggregation
 and consistency of personality, 47
 across individuals, 17
 interactionist view of, 101–102
 across multiple observations (and personality consistency), 47, 304
 and ranking of individuals, 252
 across response systems, 20–22
 aggression, 30, 43, 81, 272–273
 adolescence-limited, 206
 attributions and, 272–274
 context specificity of, 272–273
 gender differences, 231–232
 idiographic analyses, 273
 mechanisms of moral disengagement, and, 232
 proactive versus reactive, 273
 temperament and, 148
 variability across dyadic relationships, 272–273
 aging, 12, 136, 152, 155
 agreeableness, 13, 68, 120
 alleles, 159
 amygdala, 173, 296–297
 and temperament, 88
 analytic psychology (Jung), 53
 anchoring, 362–363, 370–371
 androgeny, 238–239
 “animal personality”, 67–68
 antisocial behavior, 206
 and adrenal system, 206
 peer influences, 204

- anxiety
 assessment, 20–21, 301, 320
 interventions for, 21
 parental loss and, 165
 personality dimensions, 176–177
 self-discrepancies and, 268
 and social judgment, 337
 perceived self-efficacy and, 360–361, 362, 365
 trait, multidimensional nature of, 102
- applicability (of constructs), 256
- appraisal, and emotion (*see* emotion)
- archetypes, 53
- arousal, 175–176
 optimal level of, 175
- arousability, 148
- ARAS (Ascending reticular activating system), 174, 175, 176
- Aristotle, 16, 25, 30, 31, 32, 132
 Aristotelian versus Galilean strategies of explanation, 16
- ascending reticular activating system (ARAS), 174
- assessment
 of attachment styles, 192–193
 belief systems, 273–274, 275–276, 277
 of goals, 377
 of self-discrepancies, 270
 schemas, 263–264
 of self-efficacy, 360
- attachment
 adult attachment interview, 193
 and adult interpersonal styles, 191, 193–195
 Bowlby's attachment theory, 54, 189–191
 information-processing and social-cognitive analyses, 196–198
 interpersonal orientations in adulthood, 193–198
 relations to five-factor model, 195
 memory and attachment styles, 196–197
 priming of attachment relations and perceived attractiveness, 197
 potential for change, 191, 197
 reciprocal interactions between parent and child, 190
 romantic love and, 193–194
 secure base, 190, 192
 self-appraisals and attachment styles, 197
 and self-regulatory processes, 195–196
 sensitivity of the mother, 191–192
 styles of, 190–193
 temperament of the child, 191–192
 strange situation paradigm, 190–191
 variability in style, 197–198
 working models (of attachment relations), 190, 197
- attentional mechanisms in self-control, 87, 381, 382
- attribution
 and aggressive behavior, 272–273
 and emotion, 291, 294
 perceived self-efficacy and, 342
- attribution theory (*see* motivation, theories of)
- autobiographical memory (*see also* narrative), 278–279
- authoritarianism, 259
- autonomic arousal activation, 12
- autonomic nervous system (ANS), 173
 and emotion, 295–296, 308–310
 sympathetic nervous system, gain, 309–310
- balance view of personality coherence, 29, 275
- behavior genetic methods (*see also* genetic effects on personality)
 analyses of individual differences, 161–166
 critiques of behavior genetic methods, 166–167
 underrepresented populations, 170
- behavior settings, 105
- behavioral approach system, 176
- behavioral disposition model of personality (*see* trait theories)
- behavioral inhibition system, 176–177, 178
- behaviorism, 22, 43, 346
- BFQ (Big Five Questionnaire), 75
- “Big Five” model (*see also* Five-Factor model), 50, 68
 Big Five versus Five Factor approaches, 68
 as predictor of political preferences, 76
- biochemical mechanisms in personality
 functioning (*see* catecholamines; neurotransmitters)
- biological bases of individual differences (*see also* autonomic nervous system; evolutionary psychology; genetic effects on personality), 33, 44, 65–66, 103, 156–157, 174–179, 206
 intelligence, 91–92
 interactions among biological and social factors (*see also* gene-environment interactions, reciprocal influence processes), 101–102, 182–183
- birth order
 and intelligence, 222
 and self-discrepancies, 271–272
- blind sight, 313
- body types and personality, 84
- bottom-up strategies (*see* explanation [strategies of scientific])
- brain functions, 173–174
- brain systems
 conceptualizations of brain and personality, 170–171
 development of, 172
 environmental influences on development, 172
 evolution of, 172
 triune brain, 172–173
 interconnections among brain regions, 173
 links from brain to body as a whole, 172
 structures and processes, 171–173

Subject Index

477

- BSRI (Bem Sex Role Inventory), 238
- capabilities, fundamental human (social cognitive theory), 112
- CAPS model (*see* cognitive-affective processing system)
- catecholamines
 and stress reactions, 182–183
- causality (*see also* explanation; reciprocal interactionism)
 intentional, 4
- chromosomes, 160, 168, 180
 chromosomal regions in dyslexia, 169
 quantitative trait loci, 168
 X chromosome and Turner's syndrome, 169
- chronic accessibility (*see* accessibility)
- Cicero, 32
- circumplex models, 68–69, 82
- classical conditions, 174
- coaction (of genetic and environmental factors), 158
- coevolution (of biology and culture), 10, 26, 27, 185
- confession of trauma (*see* inhibition of emotional experiences)
- cognitive-affective processing system, 46, 80, 109, 248–249
 implications for study of developmental continuities, 145
 and social-cognitive person variables, 46
- cognitive appraisal and emotion (*see* emotion)
- cognitive architecture
 alternative models, 255
 modularity, 183–184
- cognitive busyness, 335
- cognitive complexity and self-complexity, 274–275
 as buffer against stress, 274
 multidimensionality of self-complexity, 275
 and physical health, 274
 and prediction of social behavior, 274
- cognitive revolution, 38, 255
- coherence (of personality), 9, 12, 14–15
 as central phenomenon of personality psychology, 14
 and individual differences, 15
- cross-situational
 cross-situational consistency versus temporal stability of behavior, 47–48
 situational beliefs and, 107, 110
 social-cognitive analysis, 118–121
- definition, 15–16
- organization among cognitive structures and cognitive— affective mechanisms, 109, 270–271, 285, 273–276, 295, 307–310
- in self-concept and identity, 251, 281
- self-reflection and, 12
- in self-system, 343, 344–345, 373–377
- in social-cognitive theory, 17–18, 50, 118–121
- common language for analyzing personal and situational determinants, 111
- communication, 198–200
 coregulation, 200
 framing, 200
 metacommunication, 200
- communion, 237–238
- comparator
 in control theory, 353
 in Gray model, 176
- competence, need for, 355
- complexity (philosophy and epistemology of)
- complex systems, 4, 133, 134, 327, 343
 personality as a complex, dynamic system, 3
- computer simulations of personality, 19–20
- conflict
 among goals, 375
 and expression of emotion, 300
 intrapsychic, 52–53
- confluence model (Zajonc), 222–223
- connectionism (*see* parallel processing)
- conscientiousness, 15, 65, 68, 213
 affect and conscious thought, 336–337
 cross-situational consistency, 47
 cultural variability, 28, 73
 and job performance, 76
 and mortality, 76
- consciousness (*see also* inhibition of emotional experiences; rumination; self-consciousness; unconscious processes), 12, 51, 120, 312
 assessing conscious experience, and experience sampling method, 333–335
 control of, 335–336
 differentiating among conscious phenomena, 316–318
 functions of, 330–331
 history of study of, 313–315
 individual differences, 331–333
 self-reflection as basic capability, 112
 and self-regulation, 369–371
- consistency (*see* cross-situational consistency, coherence)
- constructive alternativism, 254
- constructs (cognitive) (*see* accessibility; knowledge activation; personal construct theory), 255–256
 chronically accessible, 197, 256–258
 personal construct theory, 43, 46, 253–254
- context specificity of cognition and action (*see also* domain specificity), 5, 45–48, 88–89, 95
 in social-cognitive theory, 18, 109–110, 376
- continuity (of personality), 147–149
 cumulative, 150
 vs. discontinuity, 147
 interactional, 150
 marriage partners and, 223–224
- control (*see also* agency, self-control; self-regulation)
 beliefs, 49, 342 (*see also* agency; self-efficacy)

- control (*continued*)
 contextual cues (influence of), 356
 cultural variation, 358
 distinguishing among, 356–360
 illusory, 356
 and mortality, 356
 primary versus secondary, 103, 359
 control theory (*see* motivation, theories of)
 “cool” system, 116, 144, 381
 coping (*see* stress and coping)
 core relational themes and emotion, 291–292
 Corpus Hippocraticum, 31
 cortical activity
 and emotion, 286, 298–299
 CPS (Comrey Personality Scales), 71
 criminality, 101
 critical multiplism, 23
 cross-situational coherence (*see also* coherence of personality)
 of attributional style, 352
 cross-situational consistency, 273
 of emotional experience, 304
 goals as determinants of, 111
 of strategies of goal pursuit, 376–377
 cross-situational consistency (*see* cross-situational coherence)
 culture, 10, 26
 cross-cultural variations in psychological processes, 27, 28
 adolescent development, 206–207
 agency beliefs, 358
 appraisal and emotion, 292–293
 attachment processes, 192
 choice and intrinsic motivation, 347
 dispositions, 28
 goal orientations, 372
 life satisfaction (subjective well being), 28, 305–306
 personality coherence, 29
 self-concept, 28, 275
 definition, 26
 emotion, cultural affordances of, 286
 and evolution of biological mechanisms, 27–28
 individual-difference structures, cross-cultural generalizability of, 72–75
 individualism versus collectivism, 28
 and interactionism, 104
 and values, 243
 cultural psychology, 10, 26, 28
 current concerns (*see also* goals), 375
 cybernetics (*see* motivation [theories of, control theory])
 decision-making, 350
 defense (psychological)
 defensive information processing (*see also* inhibition of emotional experiences), 318, 327
 repression and repressive coping style, 318–322
 defense mechanisms (*see also* defense)
 development of, 322–323
 social-cognitive bases, 323–325
 defensive pessimism, 376
 delay of gratification, 380–381
 attention to rewards and, 381, 382
 cognitive strategies and, 381, 382
 cool system / hot system analysis of, 381–382
 and temporally stable self-control competencies, 381–382
 deliberative mind set, 378
 depression (dysphoria)
 assessment, 301
 gender differences, 235–236
 parental loss and, 165
 perceived self-efficacy and, 362
 self-complexity and, 275
 self-discrepancies and, 268
 and self-judgment, 337
 Depression (The Great), 150
 DES (Differential Emotions Scale), 301
 determinants
 vs. “deterministic” view of human nature, 3
 personal, 112
 versus individual differences, 113–114
 determinism, 132–133
 development
 assumptions in the study of, 128–135
 complex systems view, 19
 contextualism, 131–132, 134
 gains and losses, 345
 of gender, 236–242
 goals (life span development and goals), 345
 interactions (between persons and environments), 101–102, 124
 life-span, 9, 12, 97
 marginal deviations as predictors of psychosocial outcomes, 20
 metatheoretical assumptions in study of, 128–134, 135, 145
 mechanisms of behavioral development, optimization through selection and compensation, 151–152
 personal agency and, 11, 125–126, 223–224
 seasons of the life cycle, 139
 of the self-system, 141–144, 271–272
 of social-cognitive processing styles, sociohistorical contexts for, 136, 149–151, 227
 stages
 of ego development, 139–141
 psychosocial (Erikson), 138
 sources of influence on, tasks (developmental), 137–139
 temperament and social-cognitive mechanisms, dialogue (internal), 11, 188, 254, 276, 280–281
 dimensional versus categorical (typological) approaches
 discriminative facility, 265–266
 discursive psychology, 280–281

Subject Index

479

- disengagement of standards, 204
 dispositions and dispositional constructs (*see also* traits), 4, 113, 252
 aggregation as a route to discovery, 47
 as classificatory variables, 17
 as emergent properties of cognitive— affective system, 20
 as explanatory variables, 15–17, 104
 idiographic versus nomothetic analyses, 65
 individual level versus population level, 17, 64, 67
 as phenotypes versus genotypes, 15–17, 65, 113–114
 social-cognitive processes as underlying determinants, 115–121
 in trait approaches, 15–16, 64–66, 114
 types, 66
 variability (in action and emotion) as a stable dispositional quality, 18, 79–81, 271, 294
- dissociation, 255
- distraction
 and carrying out intentions, 377–378
 self-instruction strategies for coping with, 378–379
- divorce, 227–228
 effects on children, psychosocial, 227
 gender differences, 227–228
- DNA, 160–161, 166
- domain specificity in psychological structures and tendencies, 49, 55, 110, 140–141, 272–273
 and rejection sensitivity, 267
 versus domain-general ego, 140
 temperament, 88–89
- dominance (genetic), 159
- dopaminergic system, 178–179
 dopamine receptor, allelic forms of gene for, 168
- drive theories (*see* motivation, theories of)
- dynamics (*see also* consciousness; emotion; knowledge activation; motivation; unconscious processes), 4, 6–7, 43, 121
 dynamic systems (*see also* complex system), 135
 cellular automata, 20
 and personality coherence, 7, 17
 social-cognitive and affective, and personality structure, 249
- dyslexia, 169
- ecological psychology, 105
- education, 154
 educational attainment, 213–214
 social-cognitive processes and, 215–217
 socioeconomic status and, 217
 and stereotype threat, 216
 inequalities, 217
- EEG (electroencephalography), 297
 ego, 52, 55

- shared versus unshared environmental influences,
 162–164, 205
- sibling relations, 55, 221
 and intellectual development, 222–223
- situations, 104
 functional analysis, 105–106
 lexical analysis, 106
 mental representations of social episodes,
 106–107
 psychologically active ingredients, 334
 universal forms of social relations, 107–108
- smoking cessation, 121
- SOC (selective optimization with compensation)
 processes, 151–152
- sociability, 87
- social change and personality development, 136,
 149–151, 227
- social-cognitive theory, 17, 34, 50, 61, 104, 178, 189,
 254, 390, 390–392
 explanation of personality coherence and
 dispositional tendencies, 115–121
 history, 108–109, 132
 relation to psychoanalysis, 318
 relation to trait/dispositional theories, 37–38,
 99–100, 113–114, 252
 research methods, 111
 temperament and social-cognitive mechanisms,
 271–272
 units of analysis, 109–111
- social exchange theory, 189
- social intelligence (*see* intelligence)
- social learning theory, 34, 44, 189, 267
 and gender development, 237
- social relations, basic forms of, 107–108
- social values (*see* values)
- sociobiology, 184, 243
- socioemotional selectivity (Carstensen's theory of),
 213
- spontaneous trait inference, 258–259
 individual differences in content of, 259–260
- spousal relations, 221–222
- spreading activation,
- S-R questionnaires
- stability (of personality; *see also* continuity), 144–147
 absolute, 146
 alternative forms of self-rating, 146–147
 ipsative, 146

Subject Index

487

- psychometric stability, 146–147
- stage theories of development (*see also* development, stages), 90, 136–138
 - domain-specific mental systems, implications of, 140–141
- stages of action sequence, 377–378
- standards (*see also* self-regulation), 267, 340
 - and emotional experience, 267–270
 - development of, 144, 340
 - ideal, 268–270
 - mood, influence on, 343
 - ought, 268–270
 - and self-regulation, 11–12
- state orientation, 378
- stereotype threat, 216, 378
- strange situation paradigm (*see* attachment)
- strategies of goal pursuit, 375–376
 - change of, in life transitions, 12
 - defensive pessimism, 376
 - optimism, 376
- strategies of scientific explanation (*see* explanation)
- strength of nervous system, 174
- stress and coping
 - emotion-focused versus problem-focused coping, 103, 359
 - facial expressivity and, 300
 - gender differences, experiential changes in, 182–183
 - genes and immune systems functioning, 167
 - schemas and coping ability, 265
 - self-complexity as buffer against stress, 274
- strivings, personal (*see also* goals), 375
- “strong” versus “weak” biologism, 158–160, 165, 198
- structuralism, 35
- structure of personality
 - meanings of the term, 67–68
 - in social-cognitive theory, 113–114
 - in trait/dispositional theory (*see also* trait theories of personality), 63, 64
- subjective well-being (*see* well being)
- superego, 52
- surface tendencies (versus underlying mechanisms), 4, 15, 88, 97, 103, 131, 147, 158, 206, 252, 266, 289–290, 310
- symbolic interactionism, 105
- symbolizing capability, 112

- task complexity (and motivation), 367
- TAT (Thematic Apperception Test), 42, 278, 323
- taxonomies
 - of interindividual differences, 36–37, 60, 64, 66–79, 97–98
 - of parenting styles, 224–225
 - of personal standards, 268–269
 - of situations, 105–106
 - of temperament qualities, 85–87
- teleology (finalism), 132, 133

- television, 205
 - and transmission of values, 244–245
- temperament (*see also* inhibition; reactivity), 33, 37, 72, 84, 115
 - categorical view of (types), 85, 88–89, 149
 - context specificity, 88, 89
 - contextualized expression of, 88–89
 - definition, 84–85
 - developmental changes, 89
 - dimensions, 85–87
 - Greek humor theory, 31, 33, 35, 174
 - heritability, 163
 - interactions with parenting style, 191–192
 - relation to behavioral outcomes, 148–149
 - modification of phenotypes, 89
 - and self-discrepancies, 271
 - and social-cognitive processes, 178, 392
- temporal stability (*see also* continuity; stability), 47, 70, 302
- tension-reduction models, 42
- thema, 42
- theories of personality (*see also* phenomenological theories; psychoanalysis; social-cognitive theory; trait theories), 38
 - distinguishing among theories, 12–14
 - goals of a theory, 14–15
 - theory of planned behavior (*see* motivation, theories of)
- thinking styles, 94–95
- Tibetan Buddhist psychology
 - basic emotions in, 286
 - conception of intelligence, 94
- top-down strategies (*see* explanation [strategies of scientific])
- traditions (of research), 36–37
- trait constructs (*see also* dispositions and dispositional constructs; five factor model; individual differences, temperament, trait theories of personality)
 - definition, 41, 65, 85, 253
 - descriptive versus explanatory, 63, 68
- trait theories of personality, 37, 44, 46, 49–50, 65, 90, 118, 390
 - distinctions among trait approaches, 65–66
 - relation to social-cognitive theories, 37–38, 99–100, 113–114, 252
- traits (*see* agreeableness; conscientiousness; extraversion; individual differences; neuroticism; openness to experience; temperament; trait constructs; trait theories of personality)
- transference, 323–324
- transitions (psychosocial), 152–153
 - personal agency and, 153–154
- triadic reciprocal determinism (*see also* interactionism; reciprocal influence processes), 48, 111–112
- trieb (*see* drive)
- triple typology model, 80

- Turner's syndrome, 169
 twin studies, 92–93, 162–164
- unconscious processes (*see also* automaticity;
 defense; implicit cognition), 311–312
 differentiating among unconscious phenomena,
 315–316
 and goal-directed motivation, 369–371
 history of study of, 312–313, 314–315
 in psychoanalysis, 52, 312–313, 315–316
- undesired selves, 354
- unemployment, 153–154, 213
- union activism, 213
- units of analysis (in personality psychology), 104,
 108, 109–111, 285, 294
- values, 242–243
 materialistic and postmaterialistic, 245–246
 media and transmission of, 244–245
 and motivation, 350
 structure of, 243–244
- variable-centered approaches, 135, 147
- verbal protocols, 334
- vicarious capability (*see also* modeling), 112
- vitalism, 134
- voice (intrapsychic conversation), 276, 280
- weight loss, motivational factors, 359
- well-being (subjective), 304–306
 cultural variation, 28, 305–306
 goal conflict and, 375
 parental influences on child, 221
 reliance of, 306
 transient mood and judgments of life
 satisfaction, 336
 wisdom (*see* intelligence)
- work (as context for personality development),
 210–214
 women's entry into workforce, 214, 219
 work versus leisure, subjective experience, 334
- working models and attachment, 190–197
- working self-concept, 324
- ZKPQ (Zuckerman-Kuhlman Personality
 Questionnaire), 76
