<i>Preface</i>	<i>page xv</i>
PART ONE. INTRODUCTION TO PERSONALITY PSYCHOLOGY	1
Prologue: Personality Psychology as an Integrative Discipline	2
Determinants, Dynamics, and Potentials	3
Determinants and Dynamics	3
Potentials	4
Overview of the Volume	6
1 The Domain of Personality Psychology	8
Common Themes	9
Definitions, Aims, and Assumptions	10
Theories and Explanations	12
Distinguishing Among Theoretical Approaches	13
What Is a Personality Theory to Do?	14
Dispositions as Phenotypes and Genotypes	15
Related Metatheoretical Issues	18
Methodological Issues	22
Summing Up	23
2 Origins, History, and Progress	24
The Origins of Personality Psychology Within the History of Ideas	25
Problems and Perspectives in the History of Psychology	25
The Challenge of Cultural Diversity	26
The Construction of Histories	29
The Matrices of Western Thought	30
Conceptions of the Person in Ancient Greece	30
Roman Thought	31
The Birth of the Sciences	32
Social Science and Social Change	34
The Founding of Personality Psychology	34

Structuralism and Functionalism	35
Paradigms	36
Research Traditions	36
Continuities and Discontinuities in the Progress of the Discipline	37
The Progress of Personality Psychology	38
Freedom, Resources, and Critical Mass	38
Developments in the United States	40
A Period of Transition	42
Substantive Challenges, Rhetoric, and Debate in the Advancement of Knowledge	45
Facing the Present and Looking to the Future	48
The Case of Psychoanalysis	50
Freud's Metapsychology	51
Secessions and New Directions of Research	53
Is There Still a Place for Psychoanalysis in Personality Psychology?	54
Forecasting the Future	56
Summing Up	57
 PART TWO. DESCRIPTION AND EXPLANATION	
Introduction: Description and Explanation	60
3 Individual Differences: Traits, Temperament, and Intelligence	62
Dispositions: Debate and Unresolved Issues	63
On the Varieties of Trait Theory	65
Describing Individual Differences: Lexical Approaches, Questionnaire Approaches, and the Five-Factor Model	66
Five Basic Factors	68
Lexical Studies	68
The Questionnaire Tradition	69
Comprehensive Individual-Difference Structures	70
Generalizability of the Five-Factor Structure Across Languages and Cultures	72
Five-Factor Instruments	75
Merits and Limits of the Five-Factor Model	76
Factor Analysis in the Study of Personality	81
The Technique	81
Interpreting the Method	83
Temperament and Personality	84
Early 20th Century Contributions	84
Defining Temperament	84
Dimensions of Temperament	85
Context and Categories	87
General Conclusions	89
The Intelligences: General, Practical, Social, and Emotional	90
Components and Expressions of Intelligence	91
Social Intelligence, Emotional Intelligence, and Wisdom	95
Summing Up	97

4 Personality Coherence and Individual Uniqueness: Interactionism and Social-Cognitive Systems	99
Interactionism	100
Theoretical Models and Research Strategies	100
Beyond Separate Person and Situation Factors	103
Situations	105
A Functional Analysis of Situations	105
A Lexical Analysis of Situations	106
Mental Representations of Social Episodes	106
Situation Cognition and Personality Coherence	107
Universal Forms?	107
Social-Cognitive Theories of Personality Structure, Process, and Functioning	108
Brief History	108
Defining Features of Social-Cognitive Theory	109
Bandura's Social Cognitive Theory	111
Alternative Strategies of Explanation	114
Trait and Dispositional Constructs as Causes	114
Social-Cognitive and Affective Systems as Causes	115
Top-Down and Bottom-Up Strategies of Explanation	116
A Bottom-Up, Social-Cognitive Analysis of Cross-Situational Coherence	118
Summing Up	121
 PART THREE. THE DEVELOPMENT OF PERSONALITY	
Introduction: The Development of Personality	124
5 Personality Development Across the Course of Life	127
Assumptions in the Study of Development	128
Mechanistic Perspectives	128
Organismic Perspectives	130
Developmental Contextualism	131
Superordinate Assumptions	132
Contemporary Views of Development	134
The Domain of Developmental Inquiry	135
Ages and Stages	136
Developmental Tasks and the Seasons of the Life Cycle	137
Stages of Ego Development	139
The Development of the Self System	141
Mental Representations of Personal Attributes	142
Feelings of Self-Worth	142
Self-Efficacy Beliefs	142
Metacognitive Knowledge of Self-Control Strategies	143
Standards for Self-Evaluation	144
Stability, Continuity, and Change	144
Stability	145
Continuity	147
Developmental Continuities and Discontinuities in their Sociohistorical Context	149

Optimal Development through Selection and Compensation	151
Psychosocial Transitions, Personal Determinants of Life Trajectories	152
Psychosocial Transitions and Personal Agency	153
Summing Up	155
6 Genetics, Brain Systems, and Personality	156
The Role of Genetics in Personality Development	157
The Long Road from Genes to Behavior	157
Strong and Weak Biologism	158
Definitional Issues in the Study of Genetics and Personality	159
Behavior Genetic Analyses of Individual Differences	161
Assessing the Traditional Behavioral-Genetic Paradigm	166
Moving the Behavior-Genetic Paradigm Forward	167
Brain Systems at the Basis of Personality Development and Functioning	170
Conceptualizations of Brain and Personality	170
Brain Structures and Processes	171
Brain Functions	173
Brain Systems and Personality Functioning	174
The Seminal Contributions of Pavlov	174
Contemporary Models of Brain Systems and Individual Differences	174
Sex Differences	179
Sex Differentiation and Development	180
Evolutionary Psychology and Sex Differences	183
Summing Up	186
7 Interpersonal Relations	187
Interpersonal Relations: Theoretical Frameworks	188
Attachment	189
Attachment Styles	190
Temperament of the Child and Sensitivity of the Mother	191
Cultural Differences and Social Networks	192
Stability and Pervasiveness Across Generations	192
Interpersonal Orientations	193
Communication	198
Peer Relations and Friendships	202
Peer Relations in Younger and Older Childhood	202
Early Friendships and Prosocial Capabilities and Later Psychosocial Outcomes	203
Peer Relations and the Development of Self-Concept	204
Friendships and Maladjustment	204
Group Influences	205
Peers, Parents, and Adolescent "Storm and Stress"	205
Summing Up	207
8 Social Contexts and Social Constructions: Work, Education, Family, Gender, and Values	208
Work	210

Contents

xi

Marxist Analysis	210
Social Status, Action, and the Development of Capacities	211
Education	214
Social and Cognitive Processes in Educational Attainment	215
Rectifying Educational Inequalities?	217
Family	217
The Contemporary Western Family	217
The Family System	219
The Life Cycle of the Family	223
Facing Adversities and Change	227
The Social Development of Gender	228
Sex and Gender	228
History and Change	229
Gender Differences in Cognitive Abilities, Social Behavior, and Traits	230
Gender Differences in Aggression	231
Gender and Personality Traits	232
Gender Differences in Developmental Continuities, Self-Construals, and Vulnerabilities	233
Gender Development: Theories and Research Paradigms	236
Psychoanalytic, Social Learning, and Early Cognitive Approaches	236
The Centrality of Gender: Masculinity, Femininity, and Androgeny	238
Contemporary Frameworks: Evolutionary Psychology, Sex Role Theory, and Social Cognitive Theory	240
Social Values and the Symbolic Environment	242
The Structure of Values	243
The Media and the Social Transmission of Values	244
Social Change and Materialistic and Postmaterialistic Values	245
Summing Up	246
PART FOUR. THE DYNAMICS OF PERSONALITY	247
Introduction to Part IV	248
9 Knowledge Structures and Interpretive Processes	250
General Considerations	251
Recurring Themes	252
The Relation between Personality and Social Psychology	253
Historical Background	253
The Contemporary Field: Alternative Models of Knowledge Representation	254
Knowledge Activation: Temporary and Chronic Sources of Accessibility	256
Temporary Sources of Construct Accessibility	256
Chronically Accessible Constructs	256
Spontaneous Trait Inference	258

Individual Differences in the Associations Among Concepts	260
Schematic Knowledge Structures and Self-Schemas	260
Schemas: Three Features	262
Self-Schemas	262
Relational Schemas	266
Knowledge Structures, Personal Standards, and Emotional Experience	267
Internalized Standards	267
Standards, Discrepancies, and Vulnerability to Distinct Emotional States	267
Knowledge, Encoding, and Individual Differences in Aggressive Behavior	272
Coherent Systems of Self-Knowledge	273
Multiple Self-Aspects and Self-Complexity	274
Idiographic Representations of Self-Knowledge and Social Knowledge	275
Beyond Discrete Attributes: Narrative and Dialogue	276
Narrative	276
Internal Dialogue	280
The Narrative Turn: Expansion of or Challenge to Psychology's Analysis of Knowledge and Meaning?	281
Summing Up	282
10 Affective Experience: Emotions and Mood	284
Historical and Contemporary Analyses of Emotional Experience	286
The Varieties of Affective Experience	287
Moods Versus Emotions	287
The Structure of the Emotion Domain	287
The Components and Functions of Emotional Experience	290
Cognitive Appraisal and Emotional Experience	290
Physiological Substrates of Emotional Experience	295
The Behavioral Expression of Emotional States	299
Subjective Emotional Experience	300
Coherence Among the Components of Emotional Response	307
Summing Up	310
11 Unconscious Processes and Conscious Experience	311
The Elusive Unconscious and Self-Evident Consciousness – or Vice Versa?	312
Unconscious Processes	312
Conscious Experience	313
Paradigm Shifts in Psychology's Understanding of Conscious and Unconscious Processes	314
Differentiating Among Conscious and Unconscious Phenomena	315
Defensive Processing	318
Repression and Repressive Coping Style	318
Development of Defense Mechanisms	322

Contents

xiii

Social-Cognitive Bases of Defense: Transference and Projection	323
Inhibition, Expression, and Health	325
Defensive Processing: Summary	327
Implicit Cognition	328
The Reality and Variety of Implicit Cognition	328
Implicit Individual-Difference Measures	329
Conscious Processes	330
Conscious Processes and Personality Functioning	331
Individual Differences: Public and Private	
Self-Consciousness	331
Rumination and Coping	332
States of Flow and the Experience Sampling Method	333
The Control of Consciousness	335
Affective States and Conscious Thought	336
Summing Up	337
12 Motivation and Self-Regulation	338
Motivation, Cognition, and the Self-Regulatory System	339
Standards and Affective Self-Evaluation	340
Self-Efficacy Beliefs and Perceived Control	341
Goals and the Self-Regulatory System	342
Temporal and Cross-Situational Coherence in the Self-System	344
Personal Agency	345
Historical and Contemporary Theoretical Frameworks	346
Instinct, Drive, Need, and Motive Theories	346
Contemporary Cognitive Frameworks	351
Control Beliefs and Perceptions of Self-Efficacy	356
Distinguishing Among Control Beliefs	356
Perceived Self-Efficacy	359
Behavioral, Cognitive, and Affective Consequences of Efficacy Beliefs	361
Boosting Efficacy Beliefs	365
Goals and Self-Motivation	365
Variations Among Goals and Goal Systems	366
Task Goals and Self-Regulatory Processes	366
Moderators of Goal-Setting Effects: Feedback and Task Complexity	367
Self-Referent Cognition and Affect as Mediators of Goal-Setting Effects	368
Nonconscious Goal Mechanisms	369
Qualitative Variations in Goals and Personal Standards	371
Coherence in Goal Systems	373
Implicit Theories	374
Middle-Level Goal Units	374
A Methodological Caveat: Do People Know What They're Doing?	377
Distraction and the Challenge of Carrying Out Intentions	377
Action and State Orientations	378

Initiating Goal-Directed Action	379
Controlling Impulses	379
Ego Dimensions	379
Mischel's Delay of Gratification Paradigm	380
Summing Up	382
PART FIVE. EPILOGUE	385
Looking to the Future: Is Personality Psychology in Good Health?	386
Reasons for Optimism?	386
Toward a Common Paradigm?	389
