# Contents

<b>Preface</b>	<i>page</i> xiii
<b>1 Topological Dynamics</b>	1
1.1 $G$ -Spaces	1
1.2 The Orbit Space	3
1.3 Suspensions	8
1.4 Dynamical Invariants	9
1.5 Anosov Diffeomorphisms	12
<b>2 Ergodic Theory – Part I</b>	17
2.1 Review of Measure Theory	17
2.2 Recurrence	22
2.3 Ergodicity	26
2.4 Measure-Theoretic Entropy	29
<b>3 Smooth Actions and Lie Theory</b>	32
3.1 Vector Fields and Flows	32
3.2 Foliations	38
3.3 Lie Groups and Lie Algebras	41
3.4 Infinitesimal and Local Actions	43
3.5 The Exponential Map	45
3.6 Lie Subgroups and Homogeneous Spaces	46
3.7 Continuous Homomorphisms Are Smooth	49
3.8 Representations of Compact Groups	50
3.9 Integrating Infinitesimal Actions	52
<b>4 Algebraic Actions</b>	59
4.1 Affine Varieties	59
4.2 Projective Varieties	61
4.3 The Descending Chain Condition	63

Table of Contents

[More information](#)

x	<i>Contents</i>	
4.4	Functions and Morphisms	64
4.5	Nonsingular Points	65
4.6	Real Points of Complex Varieties	67
4.7	The Ordinary Topology of a Variety	67
4.8	Homogeneous Spaces	69
4.9	Rosenlicht's Theorem	71
4.10	The Rough Structure of Algebraic Groups	74
<b>5</b>	<b>The Classical Groups</b>	77
5.1	$GL(n, \mathbb{R})$ , $GL(n, \mathbb{C})$ , and $GL(n, \mathbb{H})$	77
5.2	Automorphism Groups of Bilinear Forms	80
5.3	The Lie Algebras	86
<b>6</b>	<b>Geometric Structures</b>	88
6.1	Principal Bundles	88
6.2	Geometric A-Structures	91
6.3	Invariant Geometric Structures	95
6.4	The Reduction Lemmas	96
6.5	The Algebraic Hull	100
6.6	Applications to Simple Lie Groups	107
6.7	Measures as Geometric Structures	112
<b>7</b>	<b>Semisimple Lie Groups</b>	119
7.1	Reductive and Semisimple Lie Algebras	119
7.2	The Adjoint Group	122
7.3	The Cartan Decomposition	125
7.4	The Restricted Root Space Decomposition	129
7.5	Root Spaces for the Classical Groups	132
7.6	The Iwasawa Decomposition	136
7.7	Representations of $\mathfrak{sl}(2, \mathbb{C})$	139
7.8	The Weyl Group	144
7.9	Generation by Centralizers	146
<b>8</b>	<b>Ergodic Theory – Part II</b>	149
8.1	Invariant Measures on Coset Spaces	149
8.2	Ergodicity and Unitary Representations	154
8.3	Moore's Ergodicity Theorem	156
8.4	Birkhoff's Ergodic Theorem	162
8.5	Ergodicity of Anosov Systems	165
8.6	Amenability and Kazhdan's Property $T$	167

<i>Contents</i>		xi
<b>9</b>	<b>Oseledec's Theorem</b>	174
9.1	Lyapunov Exponents	174
9.2	Products of Triangular Matrices	179
9.3	Proof of Oseledec's Theorem	187
9.4	Nonuniform Hyperbolicity and Entropy	192
<b>10</b>	<b>Rigidity Theorems</b>	196
10.1	Straightening Sections	196
10.2	$H$ -Pairs	199
10.3	$H$ -Pairs for Centralizers	206
10.4	The $C^r$ Rigidity Theorem	212
10.5	Contracting Subbundles	215
10.6	The Theorems of Zimmer and Margulis	221
10.7	The Lyapunov Spectrum and Entropy	224
10.8	Lattice Actions	226
	<b>Appendix A: Lattices in <math>SL(n, \mathbb{R})</math></b>	231
A.1	$SL(n, \mathbb{Z})$	231
A.2	Cocompact Lattices	236
	<b>References</b>	241
	<b>Index</b>	243
