## Subject Index

---

- ability, 139; children's beliefs about, 261, 284–5, 286, 291, 292, 293–5, 296, 298, 299, 304; conceptions of, 4, 169, 170; fixed, 406; and goodness, 274–5; and motivational patterns, 258, 259
- ability inferences, 83
- academic competence: children's self-perceptions of, 300
- academic socialization, 285
- accessible categories, 79
- accessibility: of self-regulated knowledge, 85
- accommodation, 381–2, 429; constraints and automatisms promoting, 375
- accommodative coping/processes, 55, 370–7, 382, 428, 429, 431
- accommodative flexibility: adaptive functions of, 365–88; empirical illustrations, 377–81; in thought of older persons, 373–4
- achievement: control beliefs and, 274
- achievement failure, 137
- achievement goals, 210, 258–9
- achievement motivation, 125, 217, 298, 345; developmental changes and, 228
- achievement motivation research/literature, 2, 272
- achievement patterns, adaptive, 274
- achievement tasks, 209–10
- action control, 15
- Action Control and Child Development Project, 309n1
- action-control beliefs: development of, in sociocultural context, 318–21; generality of functional aspects of, 293–307; socio-cultural influences on development of, 281–315; structure of, 290–3
- action-control system, 281, 282; cognitive influences, 281, 295–6, 306; structure of, 290–3
- action orientation, 28, 30, 31, 35, 44, 119, 260
- action sequence: belief relations among constituents of, 283
- action theory, 2–3, 281; applied to development and aging, 371; view on psychology of control, 282–6
- active avoidance, 28
- activity theory, 347, 349
- actor (action sequence), 283
- actual self, 370–1, 378
- adaptation, 121, 122, 360; bound by time and space, 343–4; changing goals in, 346; to later life, 381; social changes in old age, 347, 348; specialized, 344
- adaptive consequences: of action-control beliefs, 324–5
- adaptive functioning, 57, 58; origins of, 257
- adaptive patterns, 6–7, 258
- adaptive process, 289; age-relativity of, 6
- adaptive profile, 282, 291
- adaptive self-regulation, 285
- adaptive significance: of accommodative flexibility, 377–8; of means–ends beliefs, 295, 296, 298
- adolescence, 105, 106, 107, 185, 187–91, 208, 227, 229; gender differences in depression in, 246–8, 250; pursuit of social dating in, 191–202, 209
- adolescent dating relationships/sexual behavior: functional regulation of, 185–215
- adolescents, 84; goal orientation, 222; identity issues, 276; social dating, 220
- adult development, 434–5; motivation and self-regulation in, 424–36
- adulthood: developmental regulation at different ages in, 60–4; developmental regulation in, 50–77; maintaining self-integrity and efficacy through, 365–88; motivated changes in social behavior across, 351–9; subjective quality of life in later, 366–70
- adults: social comparisons in, 67–8
- affect, 3, 128; and aging, 427; cognition and, 4
- affect-cognition modulation hypotheses, 28, 40; first, 18–19; second, 20, 37
- affect regulation, 359; parents expectations and, 249–50

**448**     *Subject Index*

- affective potential of social partners, 352, 353, 354, 356
- affiliation, 342
- African American boys labeled aggressive: attributions and behavior of, 137–58, 326–7
- African Americans, 196–8, 207, 229; collectivism (value), 194–5
- age: and declines in social contact, 347–51; motivational and self-regulatory processes develop with, 5; and preferences for social contact, 341
- age-related changes: adjusting to, 370–7
- agency, 324, 342
- agency beliefs, 281, 282, 283, 286, 291–2, 295, 299–304, 306–7, 308–9; and control expectancy, 285–6
- aggression, 137–8, 140, 141, 149, 191, 333, 334; African American boys, 137–58, 326–7; interventions for, 330; peer-directed, 141–55; provoking, 226
- aging, 53, 429, 434–5; compensation for intelligence declines in, 413; declines associated with, 60, 424, 426, 428; management of, 382; and motivation, 348–51; naive theories of, 366; and primary control, 124
- aging, successful, 366, 370, 374, 381, 382; control in/and, 367–8; life-span model of, 51
- akrasia, 119
- alcohol addiction, 36–9
- alienation, 30, 32, 34–9, 116, 119, 123
- alloplasm/autoplasm, 121
- anger, 144, 145f, 146, 147–51, 148f, 153, 155, 156; in behavior toward others, 140, 141–2
- anxiety, 328–30
- anxiety disorders, 36, 39
- application-oriented research, 217, 218, 226
- approach, 101–2, 103–5, 125–6, 407
- approach-avoidance theorizing, 128–9
- approach orientation, 260
- assimilation, 381–2, 429
- assimilative coping/processes, 370–7, 382, 428, 429, 431
- assimilative persistence: adaptive functions of, 365–88; empirical illustrations, 377–81
- attachment, 193, 207, 324, 344
- attachment styles, 209
- attainment: motivation and, 105–6
- attention control, 26, 32, 33, 34
- attention regulation, mechanisms of, 376
- attentional selectivity, 33, 34
- “attitude object evaluation” units, 79
- attribution-emotion-action sequence, 330, 334
- attribution retraining, 330, 334
- attribution theory, 117, 138, 139–41, 155, 156, 220, 286
- attributional biases, 5, 228
- attributional change program, 143–6
- attributional perspective: peer-directed aggression from, 141–55
- attributional psychology, 4
- attributions: causal, 3, 54, 57, 139–41; and emotions/behavior, 141, 326–7; maladaptive, 172; preference-related, 298
- atypical populations: and normal developmental processes, 316, 323, 326–8
- authoritative constellation (parenting), 161–4, 171
- authoritative control, 159, 161
- authoritative parenting, 162–4, 222; parental control in, 162–3, 164–6
- automatisms: supporting accommodation, 375, 376
- autonomy, 4, 117–18, 122, 169, 225, 226, 227, 342; basic human need, 51, 114, 115–16, 128, 129, 130, 343; of internalized strivings, 127; need for, 124, 221–2; social conditions and, 120
- autonomy granting–controlling distinction (parenting), 171, 172, 173, 174–6, 177, 191, 329
- autonomy support versus coercion dimension, 224
- avoidance, 101–2, 103–5, 125–6, 407
- avoidance orientation, 260
- badness, 318, 325; belief in fixed, 271–2, 273, 275, 276; conceptions of, 257, 262, 263, 267, 268, 270, 274, 275, 276
- basic human needs, 51, 342, 343, 346, 360
- Beck Depression Inventory, 275
- behavior, 1, 3; effects of rumination on, 243–5
- behavior regulation, 207
- behavior toward others: controllability and, 139–40
- behavioral deficits, 43
- behavioral facilitation, 29, 31, 36
- behavioral resources, investment of, 50
- belief systems, 220, 375
- beliefs and values: acquisition of, 79–80
- bereavement, response to, 242–3
- biological factors in response style, 250
- biological risk in depression, 322
- blame, 155, 220, 226, 272; attributional bias in, 147–50, 148f, 150–1
- bolstering mode (caretaker–child interaction), 88
- “brain over brawn,” 55
- caretaker–child interaction, 80; classification scheme of modes of, 87t; message of different modes of, 85–92
- caretakers, 18; and response style, 249
- causal attributions, 3, 54, 139–41; egotistic, 57

*Subject Index*

449

- causal dimensions, 139–40  
causal explanation, 320–1  
causal information, processing of, 228  
causal modeling techniques, 142–3  
causal reasoning, 140, 141, 143, 146  
causality, 324; conceptions of, 284, 289; locus of, 118  
causes, 139, 220  
central coordination, 15  
challenge, response to, 259–60  
challenge avoidance, 263, 274  
challenge-seeking, 257, 258, 263  
childhood: secondary control in, 71–2  
childrearing, 59, 128–9  
child-rearing literature, 272  
children: acquisition of response style(s), 248–50; active participation in processes by which social factors shape motivation, 216, 219–23, 230; development of action-control beliefs, 281–315; as initiators of social interactions, 222–3; motivational patterns of older, 257–61; as participants in social interactions, 219–22; self-conceptions and motivational processes in, 257–80  
children, young: evidence of helpless response in, 262–5; theories of the self, 261–2  
choice, 51–2  
chronic accessibility effects, 79  
coercion, 225, 226, 227  
cognition(s), 1, 3; and deconstruction of blocked goals, 375, 376; and effort, 4; control-related, 325; in depression, 322  
cognitive-behavioral therapy (CBT), 329, 332–3  
cognitive conceptualizations: of social partners, 352–4  
cognitive development, 81  
cognitive evaluation theory, 221–2  
cognitive influences: action-control systems, 281, 295–6, 306  
cognitive maturation, 285, 289, 343; and means–ends beliefs, 296, 298  
cognitive responses: chronic regulatory focus and, 98–103, 100t, 101t, 103t  
coherence: of self-regulatory knowledge, 85  
collectivism, 188  
collectivism/individualism: cultural differences in, 194–5  
commitment, 16; of self-regulatory knowledge, 85; and self-symbolizing, 408–9, 412  
compensation: forms of, 413–14; in goal maintenance in later life, 372; for incompleteness, 404, 405, 406; in old age, 369–70; via primary and secondary control, 50–77; with symbolic self-completion, 3; in threat to self-esteem, 408  
compensation hypothesis, 395–7  
compensatory primary control, 50, 56, 57, 69  
compensatory secondary control, 50, 57, 60, 63, 64, 65, 67, 68, 69, 70, 330–1  
competence, 119, 324; basic human need, 51, 114, 115–16, 128, 129, 130, 343; failure as lack of, 54; and helpless response, 271; messages about, in parental control, 168, 169, 170, 172; need for, 122, 221–2; and self-symbolizing, 345  
competence systems, 282; action-related components of, 293; cross-cultural comparisons, 287; and future gains, 307; self-related aspects of, 291  
competency and contingency beliefs, 283  
completeness, 397; from incompleteness to, 404–6; indicators of, 394–5; self-symbolizing in, 398  
conditional regard, 127  
considerate, 149  
construct: children’s action-control beliefs, 287, 288, 291, 319  
construct accessibility, 149, 152  
context(s), 6, 157; and assimilation/accommodation, 375; “developing,” 228–9  
context of discovery/context of confirmation, 321  
contextualism, 107  
contingency, 324; action-control beliefs, 295, 296  
contingent action path, 411–12  
control, 123, 129, 221, 328; autonomy granting–controlling distinction, 171, 172, 173, 174–6, 177; concept of, 365; consequences of, 176, 177; differential use of, with boys and girls, 175–6; domain distinction, 170; and downscaling of goals, 374; dual messages of, 159, 166–70, 171, 172, 177; as instrument of human needs, 123–4; multidimensional nature of, 159–84; negative messages, 167–9, 170, 171, 172, 174, 176; in parent-socialization literature, 160–6; in parenting, 217; perceptions of, 137, 228 (*see also* perceived control); positive messages, 167, 169, 170, 171, 172; positive-versus negative-outcome focus, 177; psychology of, 282–6; in/and successful aging, 367–8; valence distinction, 166–70  
Control, Agency, and Means–Ends Interview (CAMI), 283–4, 287, 290, 291, 292, 293  
control beliefs, 4, 5; stability of, 378–80  
control expectancy, 281, 282, 283, 287, 291–2, 295, 299–304, 306–7, 308–9, 320, 324; agency beliefs and, 285–6  
control strategies, 121–2, 124; empirical illustrations of, 59–71; older/younger adults, 61–4  
control striving, 51; life-span timing of, 58

- control system, 72  
 control theories, 120–1  
 controllability, 139–40, 141, 156  
 controllability attributions: consequences of, 141–3; consequences of, in use of excuses, 152–5, 154f  
 coping: adaptive, 186, 198; assimilative versus accommodative, 61  
 coping literature, 186  
 coping modes, 28–9, 30  
 coping strategies, 238, 248  
 coping style(s): in depression, 323  
 creativity, 393–4  
 critical/punitive mode (caretaker–child interaction), 88, 89  
 criticism: helpless response to, 265–7, 270–1, 272, 276, 317, 318; and response patterns, 272–4  
 cross-cultural comparisons, 282, 283–4; action-control beliefs, 287–307, 319–21; methodological concerns, 287–8, 319–20; potential moderator effects, 304–6  
 cultural groups: and life tasks, 186  
 cultural values, 17, 18, 188, 194  
 culture(s), 6; humanity of, 116–17, 129; and regulatory functions, 72; and self-relevant concepts, 324  
 curriculum dimensionality, 300–4  
 dating: intimacy dating goals and patterns of, 198–202  
 dating partners, 208; dating goals of, 202–7; dating situations with, 199–200; social support from, 200–1; strategies for safer sex with, 201–2  
 dating relationship(s), steady, 193–4, 202–7  
 dating situations: with partner, 199–201; steady relationship versus casual partners, 193–4, 203  
 death: awareness of imminence of, 348, 350  
 decision-making (parental), 164, 168–70, 174, 175, 176  
 deliberative mindset, 410  
 demanding/controlling parenting, 160, 161  
 denial, 376  
 depression, 43, 44, 318, 325, 326, 328–30, 332, 371, 377; and accommodative coping, 374; in elderly, 366–7, 427, 430–1; gender differences in, 245–8; rumination and duration of, 240–3; ruminative coping with, 237–56; styles of coping with, 321–3; treatments for, 329  
 desired self, 370–1, 378, 382  
 desires, 114, 115, 128  
 development: conception of badness in, 274; demands selection, 343, 344; and gender differences in problem prevalence, 332; interruption of normal, 157; mechanisms of, 229–30, 231; and motivation, 343–6; of regulatory focus, 78–113; and social influences on motivation, 216, 219, 227–31; vulnerability in, 276; *see also* successful development  
 developing person (the), 227–8  
 developmental approach: to motivation and self-regulation, 1–11  
 developmental change, 370  
 developmental ecologies: control strategies in, 71; opportunities and constraints in, 57, 60, 61  
 developmental expectations: for self and “most other people” at different age levels, 65–7, 66–7f  
 developmental gains and losses, 108–9; negotiation of, 380–1  
 developmental goal domains: gain and loss in, 380f  
 developmental goals, 52, 53; throughout life span, 3  
 developmental issues/theory/research: and interventions for dysfunction, 316, 323, 328–31; in/and psychopathology, 316, 323–6  
 developmental processes: study of atypical populations and, 316, 323, 326–8  
 developmental psychology, 424  
 developmental psychopathology, 316–37; problems in, 331–4  
 developmental regulation: in adulthood, 50–77; at different ages in adulthood, 60–4; measurement of strategies for, 68–71; model of, 55–7, 56t, 59–71; strategies of, 50, 70–1

- doting modes of caretaker–child interaction, 86
- dysfunction, 5, 6, 316, 324; construction of interventions for, 323, 328–31; patterns of, 325–6
- eating disorders, 36, 39
- effectance, 122, 124
- effectance motivation (concept), 223
- efficacy, 121; maintaining, 365–88; and outcomes, 123
- efficacy beliefs: and successful aging, 368
- effort, 261; children's beliefs about, 284–5, 286, 289, 291, 292, 293–5, 296, 298, 304; and incompleteness, 407
- effort-avoidance, 30
- ego-identity development (theory), 409
- emotion: centrality and regulation of, in social interactional context, 357–9; motivation in, 1
- emotion-focused coping, 55, 238, 246
- emotion regulation; *see* regulation of emotion
- emotion trajectory, 346, 353
- emotional cues, 220
- emotional functions: control of, 26
- emotional goals, 347, 351, 352, 354–5
- emotional gratification, need for, 345, 359, 426
- emotional health: life transitions and, 105, 106–7, 108–9
- emotional information: processing of, 354, 355f
- emotional lability, 41
- emotional motives, 426
- emotional perseverance, 32, 36, 39, 41
- emotional preferences, access to, 35–6
- emotional problems, 43
- emotional responses: chronic regulatory focus and, 93–8; parental response styles and, 89, 90t
- emotional sensitivity, 109
- emotions: and aggressive action, 142–3, 143t; controllability and, 139–40, 141; regulatory focus and, 89–92, 90t, 91t
- empathy, 119
- empirical psychology, 117
- energy deficit, 29, 30, 32, 36, 39
- entity theory of intelligence, 259, 260–1, 275, 276n1, 325, 333, 406–7
- environmental conditions/variables: control-expectancy judgments, 286; perceptions of control, 159; ruminative response style/depression, 242
- ethnicity, 6, 194–5, 197
- excuses, 152–5, 254f
- exertion, 139
- expectancies, 79–80; *see also* control-expectancy
- expectancy  $\times$  value models, 2
- expectations for future performance: young children, 264–5
- external control, 4, 159, 167; negative messages of, 166; proneness to, 29, 30, 32, 36
- extraversion, 40–1
- failure: attributions of, 3, 168, 176; causes of, 139; coping with, 406; evaluation of, 106–7; and expectation of punishment, 268, 269; helpless response to, 274, 276, 322; in identity strivings, 401–4; as lack of competence, 54; naive theories of causes of, 284; reactions to, 260, 262, 263, 267, 317, 318, 322; repeated, 217; and self-blame, 275
- failure compensation, 55, 72; basic requirement of human functioning, 51–3
- failure experiences, 57; compensation for, 50; costs of, 53; human functioning relies on, 52–3; and identity goal pursuits, 389, 402–3, 411–12
- failure-related state orientation, 28
- Farmingdale school system (Long Island, N.Y.), 89–91
- feedback: negative, 272, 396, 397, 400, 402, 403; self-discrepant, 377
- field theory of action, 1–2
- fight-flight, 28
- first-borns: self-regulatory knowledge, 86–7
- first-person/personal strategy beliefs, 284, 286
- flexibility, 51, 53; in adjusting goals, 60, 63–4, 64f
- focus, 51–2
- freedom of choice, 140
- frontal neocortex, 21
- frustration, 53, 371; from incompleteness, 404–5; and reduced access to volitional competence, 22, 25, 28, 30, 32, 41, 44; response to, 248–9
- frustration-contingent inhibition, 30
- functional behavior, 186; goals in, 208; across life span and life tasks, 208–10
- functional compensation, 414
- functional self-regulation, 207–8; interaction between personal goals and daily life situations and, 185; life task model for, 187–91, 189f
- fundamental human needs; *see* basic human needs
- future-oriented goals, 341, 345, 346, 359
- future perspectives, 378; in old age, 365
- future possibilities potential of social partners, 352, 353, 356
- future research, 6; children's action-control beliefs, 307–9; developmental regulation in adulthood, 71–2; functional behavior, 191; intergenerational transmission of biased beliefs about others' responsibility, 152, 156–7

- nurturant social regulation, 78
- old age: forms of compensation in, 413; gains and losses in, 370; identity maintenance in, 389; and identity-striving, 411; reduced competence in, 343; resource investment in, 58; transition to, 365–6, 369, 425–6
- older adults/persons: compensatory secondary control, 330–1; depression in, 430–1; social contacts, 417, 418; social relationships, 209; stability and resilience of, 381
- ontogenetic change/development, 52, 59
- open-mindedness, 409–10
- optimization, 51, 57, 58, 69, 70, 122; regulatory process of, 50
- Optimization in Primary and Secondary Control (OPS) model, 55–7, 56t, 68–71, 69t
- organismic perspectives on development, 126–7
- organismic/phenomenological framework, 125
- ought-focus individuals, 93–8, 99–103
- outcome control, 122–3
- outcome focus (theory), 63
- overcontrol, 27, 30, 31, 32, 107–8; rumination as, 239
- parent, becoming, 96–8
- Parent–Child Interaction questionnaire, 89
- parent training, 330
- parental control: in authoritative parenting, 162–3, 164–6; and development of sex differences in self-evaluation, 172–7; effects on motivation, 221; research on specific forms of, 164–6
- parental control practices, 152, 273
- parental response styles: and emotional responses, 89, 90t
- parental socialization, 159, 163–4, 165, 328
- parental socialization research/literature, 166, 167; control in, 160–6
- parenting: and child motivation, 217–18; dimensions of, 160, 220–1
- parenting styles, 125, 149, 231, 329
- parents, 128–9; autonomy/controlling, 191; blaming bias in, 226, 228; and depression, 329; social regulatory style of, 78
- passive avoidance, 28, 29
- peer-directed aggression: from attributional perspective, 140, 141–55
- perceived control, 34, 54, 54f, 324; and assimilative activities, 372, 375; in interpersonal context, 137–8; in later life, 367–8; as mediator of effects of social context, 229–30; models of, 5; stabilizing, by shifts in goal importance, 378–80, 379f
- perceived motivation in others: social motivation and, 137–58
- perceived responsibility in others: in life-span perspective, 155–7
- Performance Beliefs Project, 309n1
- performance deficits: in old age, 411
- performance feedback, 300–4, 306, 320; negative, 330; self-perceptions of, 285; *see also* feedback
- performance goals, 258, 259, 406
- performance standards, 167–8; control and, 174–5, 176
- permissiveness to restrictiveness dimension, 221–2
- persistence, 31, 257, 263–4, 265; low, 262, 266, 267, 268
- person–environment fit, 78, 105; learning about, 80–5
- person/environment forces, 2
- person–environment interaction perspective, 425
- person-oriented feedback/judgments, 274, 330
- person perception, 79
- person x situation fit, 210
- personal agency, 282
- personal agency beliefs, 283, 287, 291
- personal constructs, 79
- personal control: and development, 369f; life-span theory of, 120–4
- personal goals, 114; individual differences and, 191–4; subcultural factors and, 194–8

- social reality, 393–5, 412; provided by intimates, 416–17
- social reality hypothesis, 397–9
- social reality principle, 417–18
- social regulation, 78, 109; and self-regulation, 79–80
- social relatedness: need for, 342
- social skills, 153, 155
- social support, 84, 210, 427; categories of, 200; in dating, 199; from dating partner, 200–1, 202, 208
- social transparency, 300
- socialization, 42, 78, 80, 109, 116–17, 125; to assign blame, 149, 152; determinants of beliefs about hostile intent, 157; in individual differences in approach/avoidance tendencies, 127; models of, 79; modes of caretaker–child interaction in, 88–9; punishment-based, 20; *see also* parental socialization
- socialization agents, 71–2, 79
- socialization antecedents: of biased attributions to intent, 150–2
- socialization literature, 85
- sociocontextual influences: action-control systems, 281, 296, 297f, 299, 300–1, 301f, 303, 304, 306–7, 308–9

**460**     *Subject Index*

- sociocontextual perspective: children's psychological control, 288–9
- sociocultural contexts, 284; action-control beliefs, 287, 288, 318–21; and self-serving bias, 325
- sociocultural functional similarity, 288
- sociocultural generality, 288, 290–1, 293–307
- sociocultural influences: action-control beliefs, 281–315, 328
- sociocultural specificity, 288
- socioecological approaches, 390
- socioeconomic life ecologies, 50
- socioeconomic status: and self-symbolizing, 433
- socioemotional selectivity theory, 331, 341, 346–51, 354, 359–60, 415–16, 426, 427, 428, 432
- sociology of identity, 390
- sociology of the self, 432
- specialization, 344
- spontaneous control, 25, 30–1
- spouses: emotional interchanges between, 358–9; longitudinal change in contact with, 351f
- stability, 139
- state orientation, 28–30, 31, 32, 33, 35, 36, 41–2, 44, 119, 260; anxiety and, 39; rumination as, 239
- storytelling: emotional regulation in, 358, 359
- stranger anxiety, 6, 344
- strategic inclinations, 78
- strategic pursuit, 187, 190
- strategic responses: chronic regulatory focus and, 103–5
- strategies: functional regulation of adolescent dating relationships and sexual behavior, 185–215
- strategy and capacity beliefs, 283
- stress: inhibition of volitional competences under, 22, 25, 28–30, 41, 44–5; physiological reactivity to, 248, 250; response to, 18, 20, 21, 241–2
- structural-cognitive perspective: children's psychological control, 288–9
- structural equation modeling, 142–3
- structure, 164, 221, 225, 226, 227
- structure versus chaos dimension, 224–5
- subcognitive states: central control of, 26
- subcultural factors: and intimacy and interdependence in social dating, 185, 207, 208–9; and intimacy goals, 191; and personal goals, 186, 187, 190–1, 194–8, 207, 220
- subjective age, 64, 65f
- subjective experience: decomposing volition in, 21–2
- subjectivity/objectivity: cultural differences in, 301f
- substitution principle, 392–3, 417
- success, 317; causal attributions for, 3; causes of, 139; evaluation of, 106–7; naive theories of causes of, 284
- successful development: characteristics of, 58–9; model of, 55–7
- supports, motivational, 226, 228, 231
- supervision (parental), 164
- symbolic representation, 81, 82
- symbolic self-completion, 3
- symbolic self-completion theory, 391
- symbols, 394–5, 410, 411, 432–3; acquisition of, 396, 412, 417, 433–4; mutual exchangeability of, 401–4
- task difficulty/ease, 139
- task pursuit, 198; patterns of, 190, 202, 207–8, 210
- teachers, 226; children's beliefs about, 284–5, 286, 289, 291–2, 295, 296–8; involvement with students, 229; and school performance, 303–4, 306; styles and practice, 231, 285
- teaching: social contextual dimensions of, 220–1
- teaching structures, 300–4, 321
- tenaciousness, 64, 64f
- therapeutic self-talk, 318
- therapy, 39, 329
- thinking: effects of depressed mood on, 237, 238, 244; effects of rumination on, 243–5
- thought-emotion-action sequence, 140–1, 152–3, 155
- time: awareness of, 353; as conceptual variable, 425–6; perceived, 341; perception of, in goal reorganization, 346, 359
- time perspective: and social preferences, 354–7
- trait(s), 149; fixed, 271–2, 275
- trauma: differential outcomes of, 331–2
- trust: in early development, 324; interpersonal, 192, 194, 201, 202
- twin studies, 41–2
- unconditional love, 127
- undemanding/low in control attempts, 160, 161
- uniformity assumptions, 333
- unintended side effects, 218, 226
- unknowns: children's beliefs about, 284–5, 286, 291–2, 295, 296, 298
- value characteristics: culturally determined, 285
- vectorial development, 83–5
- volition, 129; analysis of, 117–20; components of, 42–3; decomposing, 21–2, 118; modes of, 15, 18, 327–8; personality frame-
