<i>Preface</i>	<i>page</i> xi
<i>Using this book</i>	xiv
1 The Buffon needle problem	1
1.1 The classical problem	1
1.2 The space of lines	3
1.3 Notes	5
2 Valuation and integral	6
2.1 Valuations	6
2.2 Groemer's integral theorem	8
2.3 Notes	11
3 A discrete lattice	13
3.1 Subsets of a finite set	13
3.2 Valuations on a simplicial complex	21
3.3 A discrete analogue of Helly's theorem	28
3.4 Notes	29
4 The intrinsic volumes for parallelotopes	30
4.1 The lattice of parallelotopes	30
4.2 Invariant valuations on parallelotopes	35
4.3 Notes	41
5 The lattice of polyconvex sets	42
5.1 Polyconvex sets	42
5.2 The Euler characteristic	46
5.3 Helly's theorem	50
5.4 Lutwak's containment theorem	54
5.5 Cauchy's surface area formula	55
5.6 Notes	58

Cambridge University Press

978-0-521-59362-5 - Introduction to Geometric Probability

Daniel A. Klain and Gian-Carlo Rota

viii

Contents

6	Invariant measures on Grassmannians	60
6.1	The lattice of subspaces	60
6.2	Computing the flag coefficients	63
6.3	Properties of the flag coefficients	70
6.4	A continuous analogue of Sperner's theorem	73
6.5	A continuous analogue of Meshalkin's theorem	77
6.6	Helly's theorem for subspaces	81
6.7	Notes	83
7	The intrinsic volumes for polyconvex sets	86
7.1	The affine Grassmannian	86
7.2	The intrinsic volumes and Hadwiger's formula	87
7.3	An Euler relation for the intrinsic volumes	93
7.4	The mean projection formula	94
7.5	Notes	95
8	A characterization theorem for volume	98
8.1	Simple valuations on polyconvex sets	98
8.2	Even and odd valuations	106
8.3	The volume theorem	109
8.4	The normalization of the intrinsic volumes	111
8.5	Lattice points and volume	112
8.6	Remarks on Hilbert's third problem	115
8.7	Notes	117
9	Hadwiger's characterization theorem	118
9.1	A proof of Hadwiger's characterization theorem	118
9.2	The intrinsic volumes of the unit ball	120
9.3	Crofton's formula	123
9.4	The mean projection formula revisited	125
9.5	Mean cross-sectional volume	128
9.6	The Buffon needle problem revisited	129
9.7	Intrinsic volumes on products	130
9.8	Computing the intrinsic volumes	135
9.9	Notes	140
10	Kinematic formulas for polyconvex sets	146
10.1	The principal kinematic formula	146
10.2	Hadwiger's containment theorem	150
10.3	Higher kinematic formulas	152
10.4	Notes	153

<i>Contents</i>		ix
11	Polyconvex sets in the sphere	154
11.1	Convexity in the sphere	154
11.2	A characterization for spherical area	156
11.3	Invariant valuations on spherical polytopes	159
11.4	Spherical kinematic formulas	162
11.5	Remarks on higher dimensional spheres	164
11.6	Notes	166
	<i>Bibliography</i>	168
	<i>Index of symbols</i>	174
