

## INDEX

N.B.: The index does not cover the notes.

- abacus, 516–17  
 abacus arithmetic, 520  
 d'Abano, Pietro, 222, 597–8, 603  
 ʿAbbāsīd dynasty  
   astronomy during time of, 36, 116–18, 169  
   general discussion, 22, 31–7, 46, 54, 169  
   mathematics during time of, 68  
   medicine during time of, 143–5  
   translation during, 22, 34–5, 36–8, 116–18  
   translators and patrons, 34–5, 95, 97, 116–18  
 Abbo of Fleury, 297–8  
 ʿAbd al-Laṭīf al-Baghdādī, 156  
 abdominal surgery, 163–4  
 Abelard, Peter, 216, 275  
 abridgements, of *The Canon of Medicine*, 150–1  
 Abū al-ʿAlāʾ Zuhri, 147  
 Abū al-Ḥasan ʿAlī, 39  
 Abū Kāmil, 72, 74  
 Abū Zakariyāʾ Yahyā ibn Abī al-Rajāʾ, 152  
 acceleration of falling bodies, 59, 424–6  
 active (practical) sciences, 245–6, 249–50, 261–3, 537  
 Adams, Henry, 630  
 Adelard of Bath  
   internationalism of scientific learning, 364  
   *philosophia*, 370  
   potential of man, 383, 384  
   *Questions on Natural Science*, 381, 383  
   *On the Same and the Different*, 384  
   specialization, 373  
   translation by, 346, 518  
   use of methodology of *Timaeus*, 381  
 administration, systematization of, 367–8  
*Advancement of Learning*, *The* (Bacon), 8  
 Aegidius of Rome, 413  
 aether, 43, 401, 432, 440–1, 443  
 Africa, medicine in, 332–3  
 agricultural technology, 635–6  
 d'Ailly, Pierre, 443–4, 450–1  
 air, as a nonnatural, 603–4  
 Albert of Saxony, 415, 426  
 Alberti, Leon Battista, 562  
 Albertus Magnus  
   alchemy, 391–2, 394  
   *On Animals*, 573–8  
   change and motion, 407–8  
   classification of sciences, 256  
   *Commentary on De caelo*, 451–2  
   cosmology, 451–2  
   geography, 554  
   harmonization of Aristotelian corpus with Christian thought, 279  
   mathematics, 262  
   *On Minerals*, 391–2, 573–8  
   natural history, 573–8  
   observations in natural philosophy, 259  
   optics, 500–1  
   *On Plants*, 573–8  
 albiion, 467–8  
 Albucasis, 146, 159, 163–4  
 alchemy, 385–403  
   Albertus Magnus, 391–2, 394  
   Byzantine science, 203  
   calcination in, 396  
   intrinsic sulfur in, 391  
   in Islamic natural philosophy, 45  
   Jewish science, 183–4  
   in late Middle Ages, 397–402  
   origins of medieval European, 385–90

- alchemy (*cont.*)  
 practical, 393–4  
 Roger Bacon, 392–4  
*Summa perfectionis* of Geber, 394–7  
 as terrestrial astronomy, 389–90  
 theoretical, 392–3  
 thirteenth century, 390–7  
 Alcuin of York, 248, 314–15  
 Alexander of Tralles, 324, 331  
 Alexandria, 16, 20, 48, 51, 60, 85, 91, 103, 149, 190  
   medical schools, 142–4  
 Alexandrian summaries, 329  
 Alfanus, 380  
 Alfonsine Tables, 235, 459–60, 468–70  
 Alfonso X, king of Castile and León, 344, 468–9  
 algebra, 71–3, 519, 521–2, 523, 525  
*Algebra*  
   by Abū Kamil, 72, 74  
   by al-Khwarizmi, 77–8  
 algorism/algorithm, 519, 521  
 Alhacen. *See* Ibn al-Haytham  
 ‘Alī, 31  
*Almagest* (Ptolemy)  
   *Abbreviated*, 472  
   commentaries on, 191, 195–6, 206  
   geography, 552–3  
   and Islamic astronomy, 121  
   in official curriculum, 234  
   planetary models, 121–3, 446  
   translation of, 118, 346  
   *See also Epitome*  
*Almanac of Health* (*Kitāb Taqwīm al-ṣiḥbah*),  
   Ibn Buṭlān, 150  
 almanacs  
   astrological, 477  
   astronomical, 461  
 Almohad dynasty, 33, 53, 348, 350  
 amicable numbers, 75  
 ‘Ammār ibn ‘Alī al-Mawṣilī, 151  
 ampliation, 543  
 analogical terms, in signification, 542  
 analytical languages, 281–2  
 Anastasius of Sinai, 331  
 Anatoli, Jacob, 177, 352  
*Anatomia* (Mondino de’ Luzzi), 594  
 anatomy, 153–6, 489–90, 496, 592–6  
 ancient sciences, in Islam, 27–9. *See also* Greek  
   science  
 Andalò da Nigro, 473  
 Andalusia  
   Islamic astronomy in, 118, 127–9  
   Jewish science in, 171–2  
 angels, in cosmology, 449  
 Anglo-Saxon medicine, 337–8  
 animal (psychical) spirit, 599–600, 604  
 animals. *See* natural history; soul  
 animate beings, in Islamic natural philosophy, 44  
 Anselm of Canterbury, 275, 376  
 al-Anṭākī, Dāwūd, 158  
 Anthemius of Tralles, 194  
 antisepsis use, in Islamic medicine, 160  
 Apian, Peter, 467–8  
 apogee, solar, 119, 124–5  
 Apollonius, 64  
 apothecaries, 581–3  
 appearances, in optics, 507–8  
 Aquinas, Thomas  
   Aristotelianism and church, 279  
   creation versus eternity of world, 440  
   existence beyond cosmos, 453  
   logic, 258  
   motion in void, 413  
   sciences versus arts, 255  
 Arabic  
   Jewish scientific works in, 171  
   texts on astronomy in, 117–18  
   translation of ancient mathematics, 62–3  
   translation of Greek mixed sciences to, 91–4  
   translation of Greek natural philosophy to,  
     34–40  
   used in translation of Greek natural  
     philosophy, 40  
   *See also specific entries beginning with* “Islamic”  
 arbor-diagrams, 149  
 Archimedes  
   *Measurement of the Circle*, 64  
   simplicity of mathematics of, 523–4  
   *Sphere and Cylinder*, 64  
 argument, methods of scientific, 377–83  
 Aristippus, Henricus, 373  
 Aristotelianism  
   and Islamic astronomy, 128  
   in Islamic natural philosophy, 41, 42–4, 52–3,  
     56–7  
   in Jewish natural philosophy, 182–3  
   in twelfth-century Renaissance, 379–80

*Index*

- transmission of knowledge, and universities, 235–6
- transmutation, alchemical, 391–2, 395, 396–7
- travel
- books and ideas, 165, 197, 202, 210, 212, 235, 254
  - and medicine, 140, 153, 157
  - students and masters, 178, 197, 201, 215
- Treatise on the Circumference* (al-Kāshī), 79
- Treatise on the Ratios of Speeds in Motions* (Bradwardine), 414–15, 416–18, 428
- Treatise on the Solar Year*, 119–20
- trebuchet, 640
- tree diagrams, 149
- Tree of Science* (Lull), 565
- trepidation, 120, 127–9, 447
- triangular numbers, 75
- trigonometry, 57–8, 81–2, 470
- trivium, 244, 252
- Trotula, 208, 213
- Turisanus, 598, 601
- Tuscius, Leo, 355
- Ṭūsī couple, 131–2
- al-Ṭūsī, Naṣīr al-Dīn
- The Complete Quadrilateral*, 82
  - optical work, 88
  - patronage of, 95
- al-Ṭūsī, Sharaf al-Dīn, 73
- tutors, Muslim, of mathematics, 63
- twelfth-century Renaissance, 365–84
- language, refinement of, 375–7
  - overview, 365–7, 517–19
  - philosophia*, widening boundaries of, 370–2
  - potential of man, 383–4
  - Roman and Greek culture, recovery of, 368–70
  - scientific argument, methods of, 377–83
  - specialization, rise of, 372–5
  - systematization during, 367–8
  - translation in, 373–4, 376–7
- Ulug Begh, 26
- Umayyad dynasty, 21–2, 31, 35–6, 116–17, 142–3
- uniform motion, 429, 431
- units of measurement, geographical, 550
- unity of ritual, 295
- universal astrolabe, 83, 464–6
- universities
- anatomical dissection, 594–5
  - Aristotle in, 218, 220–1, 223, 226–8, 231, 247, 254, 258, 266, 275–9, 284
  - astrology, 473–4
  - church support of, 284
  - clerical status and social parameters, 224–8
  - curricular tradition, innovation, and specialization, 230–4
  - expansion of, 228–30
  - faculty structure, 219–22
  - as guilds, 217–19
  - knowledge about nature, circulation of, 235–6
  - law, 214–15, 218, 219–22
  - logic, 258, 533–5
  - mathematics, 234, 523–7
  - medicine, 219–22, 591–2, 619
  - natural philosophy in, 219–22
  - rise of, 208
  - small group supervision in, 231–2
  - social parameters in, 224–8
  - specialization in twelfth-century Renaissance, 374–5
  - teaching and learning in, 222–4
  - theology, 219–22
  - translations commissioned by, 353
