Subject Index

- abstraction, in definition of social mechanism, 24–5
- action-formation mechanism, 23–4
- actions (*see also* behavior): causes of, 58; collective, 271; communicative (Habermas), 208; contingent and imitative social (Weber), 310; in definition of social mechanism, 24; grounded on reasons, 174–5; imitative behavior as form of, 308; macro-micro-macro model of social action, 21–2; problem of (Alexander), 225–7, 230; rational, 176–7; suggested by *habitus* (Bourdieu), 214–16
- actors: as causal agents, 11–12; with complex attributes (Marx), 91–2; identification of, 93–4; in imitation simulation model, 315–23; in models of social change, 97–100; purposive actor theory (Coleman), 256; in social mechanism, 95–7
- additive models, 248–9
- agents: causal, 11–12; equipped with *habitus* (Bourdieu), 215
- Allais's paradoxes, 180, 195
- anticonformism, 69–70
- appropriation: in Commons's definition of competition, 269; forms of (Weber), 297–9; precarious, 271; relation between organizations and opportunities, 295–8
- attainment process: modeling mechanisms of, 257–63; simple models, 261–2; sociological research in, 257; vacancy competition model, 259–60; variables in, 260–1
- Axelrod's paradox, 196–7
- behavior: Bourdieu's explanations of social, 220; contingent, 310; seeing social mechanisms behind, 36–7; threshold theory of collective, 19–21; values as judges of, 155
- behavior, imitative: explanation for, 311–12; as form of action, 307–8; forms of, 309–10; mechanisms producing, 308
- belief-formation mechanism: principles in, 313–14; statement of, 21
- beliefs: magical, 186; mechanism as explanation for, 49; mechanism of social proof operating on, 324; normative, 188; rationality of false, 184–8; RCM explanations, 182–4; in RCM theory, 182–90; self-fulfilling prophecy as initial belief, 320
- belief traps, 110, 121
- black box: as antonym of mechanism, 47–8; explanations of, 8–10; socialization as, 173
- catastrophe theory, 67–9
- causal analysis: using multivariate analysis, 242–4; variables used in, 247–54
- causal modeling: explanatory mechanism in, 9–10; in social theory, 15–17

SUBJECT INDEX 335

- choices: of different sets of values, 165; framing of, 165; preference-based in hedonic framing, 65
- circularity, 167
- CM, *see* Cognitivist Model (CM)
- Coase theorem, 135
- coefficients, standardized, 245
- cognitive dissonance, *see under* dissonance
- Cognitivist Model (CM): advantages of, 192–9; RCM as, 190–1; solving of RCM paradoxes, 195
- comparative statics models, 255
- compartmentalization, moral: contextual, temporal and locational, 164–5; operation of, 164–5
- compensation effect: in behavior choices, 54–5; in Tocqueville effect, 61
- competition (*see also* fields, competitive): Commons's definition of, 269; among firms in markets, 270–4; flow of benefits from, 281; market mechanisms related to, 89–91, 97–100; among nation–states in world system, 277–80; suppression within corporate groups, 288; among universities in reputational systems, 274–7; use of opportunities in, 289–90
- competition, monopolistic: defined, 268n2; as mechanism, 281–2
- competitive advantage, maintained by corporate group, 282
- computing power: effect of increase in, 263–4; making direct estimates using, 255; using multivariate analysis with, 242–4
- conformism, 69–70
- consequences: concept of unintended, 133–4; with contract and transaction costs concepts, 134–5
- consumption effect, 57–8
- contracts (Coase theorem and visible hand), 134–6
- contrast effect: conditions for absence of, 57–8; individual dominated by, 60–1; past and present requirements, 56–7; of past experience, 56; of type B₂ mechanism, 56
- corporate groups: changing identity of, 298; going concern value of, 281; ideal, 288; liberties turned into opportunities, 289–90; as network, 281; suppression of competition within, 288; utility function, 289
- corporate identity, 297–8
- crowding-out effect, 54–5
- data: cross-sectional, 254–6, 261; longitudinal, 255–6; for simple attainment model, 262; from surveys, 15
- deduction: CM, 195; RCM, 193–5
- deprivation, relative, 114–19; concept of, 115; emulation effect extension of, 117–18; as a mechanism, 14–15
- disaggregation, 69–71
- dissonance: cognitive, 52; cognitive reduction of, 109, 121; conditions for, 311; defined, 148; generation of, 53; reduction or avoidance, 52–3, 311–12, 314, 324
- dissonance, expressive: change in aggregate, 151–4; dissipation through internalization, 150–2; example of, 148; factors changing levels of, 153–4; meaning of, 148–50; mechanisms interacting with those of moral dissonance, 166–7; in preference falsification, 152; sources of, 155
- dissonance, moral: in events of Reformation, 162–3; experiencing, 168; mechanisms interacting with those of expressive dissonance, 166–7; occurrences of, 154; reducing, 159–67; sources of, 148, 154–5, 158; values generating, 156–7
- dissonance theory, 67–8
- dualist theories, 252
- duality of structure (Giddens), 222–3
- economic equilibrium: models of, 130; in terms of social mechanism, 129–30
- economics (*see also* neoclassical economics): explanations in terms

336 SUBJECT INDEX

- of mechanism, 125; mechanisms in, 3–4; models with multiple equilibria, 137–43; use of MIP–RCM model by, 178; verbal treatment of mechanisms, 131–2
- emulation effect, 117–18
- endowment effect: individual dominated by, 61; of past experience, 56–7
- environment, competitive, as mechanism, 267–70
- equilibrium: defined, 129; defined by economists, 130; in economics, 129–30; Nash equilibrium, 138; notion of mechanism in, 4; trembling-hand, 140
- fairness norm, 55
- false beliefs, rationality of, 184–8
- falsification, *see* preference falsification
- feminism, as response to moral crisis, 164
- fields: organization's position in, 294; structure of opportunities, 270; as system of liberties, 293–4; as systems of opportunities, 301
- fields, competitive: modeling of, 267–70; as systems of liberties, 289
- firm (*see also* corporate groups): Coase's theory of, 282–3; going-concern value of, 290
- frames, cognitive, 179–80
- game theory: evolutionary, 142; Markov perfection, 140; mechanisms in, 141–3; Nash equilibrium in, 138; Rousseau's intuitions in language of, 178; Tit-for-Tat strategy, 138–9; trembling-hand equilibrium, 140
- going-concern value: appropriation of, 298, 301; Commons's concept of, 281, 290–1; of national governments, 298
- governments, national, going-concern value of, 298
- habitus* concept (Bourdieu), 214–20
- hedonic framing: hypothesis, 65; objection to, 65–6
- hopes, excessive, 116
- human capital theory: mechanism for change in attainment, 260; status attainment research linked to, 251
- IEO model, 193–5
- imitation: genuine and apparent, 309–10; importance of, 308; rational, 307; reasons for, 312; simulation model, 315–24; as useful strategy, 314
- incentives: incentive mechanisms, 127n4; reputational, 152
- individualism, methodological, 11–13, 32, 47, 94
- individuals: decision mechanisms of, 111–14; forms of appropriation available to, 299; mechanisms of, 102–4; threshold concept, 19
- inertia principle, 184–5
- innovation: firm's exploitation of, 283n4; Schumpeter's concept of, 272–3, 283, 291
- intention concept, 134
- invisible hand: market failure as example of, 136–7; mechanisms, 125, 127n4, 135
- labor market theory, socioeconomic attainment process in, 258
- law of nature, 75
- laws: assertions and form of, 48; covering-law model or explanation, 8, 48; explanation by, 51–2; mechanisms anchored in, 66; notion of, 3; social, 128–9; in social sciences, 40–1, 62
- liberties: appropriation as set of, 301; of corporate group, 297; sovereignty as set of, 293–4
- lifeworld (Habermas), 207–11
- linear models, 249, 252–3
- loss aversion principle, 57
- macro-micro-macro model (Coleman), 21–3, 205, 233

SUBJECT INDEX 337

- market mechanisms: competition related to, 89–91; structural changes generated by, 99–100
- Markov perfection, 140
- mathematical models, 254–5, 264
- mathematics: in study of social mechanisms, 36; as tool in statistical methods, 257
- mechanisms (*see also* going-concern value; market mechanisms; preference falsification; social mechanisms): abstract elements in, 92; action-formation mechanism, 23–4; actor- and structure-oriented, 93–7; aggregate-based, 131; appropriation of going-concern value as, 301; cognitive, 116; concatenations of, 105–10; concept of, 2–3; definitions of, 45, 74, 78, 240, 267; explanatory, 7–13; filter-based, 130; in game theory, 141–3; Habermas's systematic, 209, 211–12; hedonic manipulation of, 66; individual-level, 102–4; as intended or unintended consequence, 134; interaction among, 105; invisible hand, 125, 127n4, 135; to lighten moral dissonance, 158–66; of Marx, 91–2; molecular intra- and interpersonal, 60–1; of monopoly power and competitive environments, 267; paired, 49–50; predicting triggers, 66; producing imitative behavior, 308–9; relative deprivation, 114–19; situational, 23–4; of social change, 98–100; of social proof, 314, 317, 322, 324; Stinchcombe's definition, 6–7, 23; transformational mechanism, 23–4; type A, 46, 50; types B, B₁, and B₂, 46, 50, 56; as unobserved analytical constructs, 13; use of concept in sociology, 4–7
- methodological individualism paradigm (MIP) (*see also* MIP–RCM model): social mechanisms analyzed in terms of, 172–3, 177; used by Tocqueville, 177–8
- Mills's paradox, 197–8
- MIP, *see* methodological individualism paradigm (MIP)
- MIP–RCM model, 177–9
- models (*see also* causal modeling; IEO model; imitation, simulation model; Rational-Choice Model (RCM); vacancy competition model): causal, 247–54; Cognitivist Model, 190–9; economic, 131–2; of economic equilibrium, 129–30, 132–3; interaction, 102; with multiple equilibria, 137–43; of social mechanisms, 38, 132, 254–63; social sciences and, 14–15; used in social science, 74–6
- monopoly power: measures of, 267–8; as mechanism, 267
- moral base, 155
- moral crisis, 162–3, 167–8
- moral overload, 155, 161, 166
- moral systems: personal, 166; reconstruction of, 161–2; with social segmentation, 165–6
- Nash equilibrium concept, 140–1
- neoclassical economics: human capital theory within, 251; notion of mechanisms in, 3–4; rationality concept used by, 17; use and creation of social mechanisms, 126; values of, 169
- neofunctionalism (Alexander), 224
- network: corporate group as, 281; vulnerability of, 281
- network diffusion, as social mechanism, 18–21
- opponent-process effect, 66
- opportunities, monopolized by corporate groups, 289
- organizations: imitation by, 312; uniqueness and distinctive opportunity, 273–4
- pairs of mechanisms, 49–50, 68
- paradoxes: Allais's, 180, 195; Axelrod's, 196–7; CM solving of RCM, 195–6; Mills's, 197–8; not

338 SUBJECT INDEX

- voting, 198; overreaction paradox, 181; of RCM, 181
- path analysis, 241, 247
- precision: in definition of social mechanism, 24
- predictions: of cognitive dissonance reduction, 109; of mechanisms from outcomes, 63–6; in neoclassical economics, 169; RCM, 193; related to mechanisms triggered, 66–9; of resolution of moral dissonance, 166–8
- preference falsification: conditions for, 166; consequences of, 149–50; with expressive dissonance, 148; operation of, 151; protecting reputation through, 168; public preference resting on, 152; self-correcting, 151
- preference formation: adaptive, 60–1; counteradaptive, 61, 69
- preferences: adaptive, 52–3, 117; conformity, 311; role of values forming, 154–5
- pressure groups, role in moral reconstruction, 162–3
- prisoner's dilemma: defection strategy, 197; equilibria in multiperiod game, 138; Markov perfection in multiperiod, 140; Nash equilibrium in one-shot, 138; Tit for Tat repeated game, 196–7
- proto-concept (Merton), 5
- public opinion, shifts of, 152–3
- q*-ratio (Tobin), 267, 272, 274–5, 290, 292, 296
- quantitative analysis in sociology, 256
- rational choice: defined, 129; rational-choice analysis, 121; social mechanism concept in, 125
- Rational-Choice Model (RCM) (*see also* MIP–RCM model): advantages and shortcomings of, 192–3; challenges to, 180–1; interpretation in neoclassical economics, 177; MIP and rationality in, 173; Smith's lack of use of, 188–9; success and importance of, 175, 176–82; weaknesses of, 182–3
- rationality: axiological, 198–9; cognitive dimension of, 188, 196; in concatenation of mechanisms, 105–10; concept in context of sociology, 173–4; of false beliefs, 184–8; of normative beliefs, 188; of Rational-Choice Model, 173, 176–7; related to MIP, 175–6; theory of, 199–200; utilitarian definition, 177–82, 196
- rationalization: of lifeworld (Habermas), 209–10; reducing moral dissonance through, 159–61
- RCM, *see* Rational-Choice Model (RCM)
- reconstruction, moral, 161–5
- redemption, reducing moral dissonance through, 160–1
- reduction: or avoidance of dissonance, 52–3, 311–12, 314, 324; in definition of social mechanism, 24–5; of moral dissonance, 159–67; predicted reduction of dissonance, 109
- regression analysis: additive models as regression models, 249, 264; of Coleman et al., 264; function of, 243n4
- scientific law, as antonym of mechanism, 48
- segmentation, social, 165–6
- segregation, as account of social mechanism, 126–7
- self-defeating process: defined, 321; in imitation simulation model, 321–4
- self-fulfilling prophecy: in imitation simulation model, 321–3; Merton's concept of, 128, 320–1; as social mechanism, 18–21
- simplification, moral (*see also* compartmentalization, moral): uniform, 164–5; variable, 164
- situational mechanism, 23

SUBJECT INDEX 339

- SMS, *see* social mechanisms
- social action, Coleman's model of
collective, 21–2
- social change: models and
mechanisms of, 97–100; questions
asked in models of, 98
- socialization, as black box, 173
- social mechanisms: analyzed in terms
of MIP, 172–3, 177; chains of
causation in, 128; concept of, 125;
definitions of, 95, 128, 172;
distinct from other phenomena, 92–
3; examples of, 17–21; families of,
37–40; formal definition, 24–5;
function and requirement of, 127–8;
identification and analysis of, 7; as
interpretation, 33–4; interpretation
of, 125; of Merton, 6; network
diffusion, 18–21; as plausible
hypothesis, 32–3; self-fulfilling
prophecy, 18–21; Small's
conception, 5; social revolt, 152–4;
threshold theory of behavior, 19–
21; typology of, 21–3
- social order: collective macro level
(Alexander), 225; individuals at
micro level of (Alexander), 225
- social phenomena, explaining, 104,
172
- social pressure, 68–9
- social processes, mathematical models
mirroring, 254–5, 264
- social proof principle, 314, 317, 322, 324
- social revolt, 152–4
- social sciences: difference from
natural sciences, 75; laws in, 8, 40–
1; mechanism-based explanations,
3–4; mechanisms in, 75, 92; search
for mechanisms, 47; two worlds of,
87–8, 100; use of mechanisms,
74–5
- social system, of imitation simulation
model, 315–17
- social theory: mechanism-based
approach, 2; modern, 1; use of
variables in analysis, 15
- society: Habermas's theory of modern,
206–12; as lifeworld (Habermas),
207–11
- sociology: black-box explanations, 9–
10; challenges to RCM model, 180–
1; current theory, 14; explanations
in terms of mechanisms, 125;
explanatory, 2; mathematical, 254,
256–7; methodological
individualism in, 11–13; midrange,
24; quantitative data analysis, 238–
9, 263–4; rational-choice, 129n6,
131, 144; rationality defined in
context of, 173; revolution in
quantitative, 240–1; testing dual
labor market theory, 253; theory
in, 205–6; use of mechanisms
concept in, 4–7; use of
methodological individualism in,
13; use of quantitative analysis in,
256
- sovereignty, as set of liberties, 293–4
- spillover effect: described, 54–5; in
Tocqueville effect, 61
- statistical analysis: for explanation, 69;
used to generate theories, 17
- statistical analysis, multivariate: data
sets used by, 240–1; with
independent variables, 243–4;
relative importance of variables in,
245
- statistics (*see also* data): discipline of,
239; used by sociologists, 239
- status: meanings of term, 292–3;
relation to reputation, 292–3
- status attainment: models, 247–50;
research linked to human capital
theory, 251
- structural functionalism (Parsons),
224
- structuration theory (Giddens), 221–4
- structure: assumptions related to, 94–5;
changes by actors, 97–100; as
determinant of individual-level
variables, 253–4; duality of
(Giddens), 222–3; effect in linear
models, 252–3; lack in black-box
explanations, 9; normative
approach to social (Alexander),
226–7; structural models with path
models, 247
- sure-thing principle, 65

340 SUBJECT INDEX

- tabular analysis: relationships among variables in, 243; relative importance of variables in, 245; use of simple, 264
- threshold, concept of individual's, 19
- Tocqueville effect, dynamic and static, 58–60
- transaction costs: Coase's approach, 134–5; concept of, 134; general equilibrium model, 135
- transformational mechanism, 23–4
- utility: expected, 199; expressive, 149–50; intrinsic, 149; reputational, 149
- vacancy competition model, 259–63
- values (*see also* going-concern value): causing moral overload, 164; choices of, 165; conflict in moral reconstruction over, 162–3; generating moral dissonance, 156–7; impractical or infeasible, 148, 154; as metapreferences and judges of behavior, 155; with moral compartmentalization, 164–5; of neoclassical economics, 169; relation to moral overload, 155; role in generation of moral dissonance, 156–9; role in preference formation, 154–5; satisfied through rationalization and redemption, 161
- variables: assessing importance of, 245–6; in causal modeling, 16; human capital, 251; individual, 257; interaction effects, 253–4; structural, 257; theories linked to structural, 251–2; theory as, 249–54; used in status attainment research, 250; using computing power with, 244–5; vacancy competition model, 260–1
- visible hand concept, 136
- X-efficiency (Leibenstein), 273
- zero-sum effect, 54
