Dedication

To Martin Jones and Tim Clutton-Brock

Notice to teachers

It is illegal to reproduce any part of this work in material form (including photocopying and electronic storage) except under the following circumstances:

- (i) where you are abiding by a licence granted to your school or institution by the Copyright Licensing Agency;
- (ii) where no such licence exists, or where you wish to exceed the terms of a licence, and you have gained the written permission of Cambridge University Press;
- (iii) where you are allowed to reproduce without permission under the provisions of Chapter 3 of the Copyright, Designs and Patents Act 1988.

ACKNOWLEDGEMENTS

The authors are particularly grateful to Dr Mike Hansell who read through the entire manuscript and suggested valuable improvements, to Diane Abbott, Aidan Gill and Sue Kearsey, our patient, helpful and efficient editors, and to Janice Ainsworth for help with the typing.

The authors and publisher would like to thank the following for permission to reproduce their material.

Contents

1	The science of behaviour	1
1.1	Introduction	1
1.2	Ethology, anthropology, psychology, sociology and sociobiology	2
1.3	Tinbergen's four 'Why's'	3
1.4	The functions of behaviour	4
1.5	The unit of natural selection	8
1.6	Behavioural genetics	9
1.7	The evolution of behaviour	10
2	The development of behaviour	13
2.1	Nature/nurture	13
2.2	Instinctive behaviour	17
2.3	Attachment and imprinting	19
2.4	Play	24
3	Responding to the environment	28
3.1	Detecting stimuli	28
3.2	Processing information	29
3.3	Principles of communication	31
3.4	Territorial advertisement	33
3.5	Communication to resolve conflicts	38
3.6	The bee language controversy	40
3.7	Language	43
4	Learning	44
4.1	Habituation	45
4.2	Classical conditioning	46
4.3	Operant conditioning	48
4.4	Latent learning	51
4.5	Insight learning	52
4.6	Observational learning	53
4.7	Memory	54
4.8	Intelligence	56
5	Obtaining food and avoiding being eaten	59
5.1	Optimal foraging	60
5.2	Factors influencing foraging decisions	64
5.3	Strategies used by animals searching and hunting for food	65
5.4	Selecting what to eat	67
5.5	Avoiding attack by predators	68
5.6	Avoiding capture by predators	71

Contents

6	Courtship and mating behaviour	74
6.1	Life in a gull colony – an example of courtship	74
6.2	Must there always be a father?	75
6.3	How do males compete?	77
6.4	Female competition and selection of mates	83
6.5	Female–male conflict	86
6.6	Mating systems	88
6.7	Human courtship and reproduction	90
7	Social behaviour	96
7.1	Parental behaviour	96
7.2	Costs and benefits of being social	97
7.3	Evolution of altruism	100
7.4	The social life of insects	104
7.5	The social life of African wild dogs	109
7.6	Chimpanzee society	110
7.7	Human society	112
	Further reading and videos	113
	Index	115
