

INDEX OF DEFINITIONS

The numbers refer to the pages on which the definitions will be found

- Analytic independence, 67
 Ascending chain condition, 19

 Basis theorem of Hilbert, 26

 Calculus of ideals, 4
 Cauchy sequence, 85
 Completion of a local ring, 92
 Composition series, 51
 Concordant rings, 87
 Contraction of an ideal, 38 (also 44)
 Convergence in a local ring, 84

 Dimension of a local ring, 63
 — of an ideal, 57
 Divisor, 78
 — of zero, 25

 Embedded prime ideal, 17
 Extension of an ideal, 38 (also 45)
 — ring, 38

 Field, 25
 Finitely generated ideal, 9
 Full ring of quotients, 40

 Generalized ring of quotients, 44

 Homomorphism, 32

 Ideal, 4
 — generated by a set, 8
 Indeterminates, 25
 Integral closure, 73
 — dependence, 73
 — divisor, 79
 — domain, 25
 Irreducible ideal, 21
 Irredundant decomposition, 15
 Isolated component of an ideal, 17
 — set of prime ideals, 18
 Isomorphism, 32

 Kernel of a homomorphism, 34

 Length of a primary ideal, 52
 Local ring, 48

 Maximal condition for ideals, 20
 — ideal, 37
 — prime ideal, 23
 Minimal ideal bases, 69
 — prime ideals of an ideal, 13
 Multiplicatively closed set, 17

 Natural homomorphism, 34
 Nilpotent element, 36
 Noetherian ring, 19
 Normal decomposition, 15
 Nucleus of a homomorphism, 34
 Null divisor, 79

 Ordinary ring of quotients, 44

 Polynomial ring, 25
 Power series, 89
 Primary ideal, 10
 — ring, 54
 Prime ideal, 9
 — — belonging to an ideal, 17
 Principal ideal, 9
 Proper ideal, 4

 Radical of an ideal, 13
 Rank of an ideal, 57
 Regular local ring, 70
 Residue class, 33
 — — ring, 34
 — field of a local ring, 63
 Ring, 1 (also 4)
 — of quotients, 41 (also 44)

 S -component, 17
 Symbolic prime power, 51
 System of parameters, 64

 Union of a family of sets, 13
 Unit, 24
