Preface	<i>page xi</i>
<b>1 MATRICES AND DETERMINANTS</b>	
General remarks	1
1.1 Matrices	1
1.2 Determinants	3
1.3 The exterior powers of a matrix	4
1.4 Determinantal ideals	6
1.5 Some useful formulae	8
1.6 The higher adjugates	12
1.7 Localization of rings and matrices	14
Solutions to the Exercises on Chapter 1	19
<b>2 FREE MODULES</b>	
General remarks	22
2.1 Free modules	22
2.2 Finitely presented modules	26
2.3 Direct summands of free modules	28
2.4 Localization of modules	37
2.5 Supplementary remarks	44
Solutions to the Exercises on Chapter 2	46
<b>3 THE INVARIANTS OF FITTING AND MACRAE</b>	
General remarks	53
3.1. The Fitting invariants	54
3.2 The ranks of a matrix	61
3.3 Finite free resolutions	66
3.4 Restricted projective dimension	71
	vii

## *Contents*

3.5	The Euler characteristic	<i>page</i> 75
3.6.	MacRae's invariant	85
	Solutions to the Exercises on Chapter 3	90
4	STABILITY AND FINITE FREE RESOLUTIONS	
	General remarks	99
4.1	Further results on matrices	99
4.2	Stable homomorphisms	104
4.3	Further results on Euler characteristics	109
4.4	The rôle of idempotents	119
	Solutions to the Exercises on Chapter 4	126
5	LATENT NON-ZERODIVISORS	
	General remarks	131
5.1	$R$ -sequences	132
5.2	Polynomials	137
5.3	Zerodivisors in a polynomial ring	142
5.4	Further properties of $R$ -sequences	145
5.5	Classical grade and true grade	148
5.6	Grade and exact sequences	158
5.7	A general criterion for exactness	164
	Solutions to the Exercises on Chapter 5	166
6	GRADE AND FINITE FREE RESOLUTIONS	
	General remarks	173
6.1	Finite free resolutions in the quasi-local case	174
6.2	The integral character of MacRae's invariant	180
6.3	Greatest common divisors	182
6.4	Grade and finite free resolutions	188
	Solutions to the Exercises on Chapter 6	200
7	THE MULTIPLICATIVE STRUCTURE	
	General remarks	206
7.1	Grade and proportionality	207
7.2	Factorization of matrices	212

*Contents*

7.3	Factorization ideals	<i>page</i> 215
7.4	Extension of the theory of MacRae's invariant	225
7.5	The Hilbert–Burch theorem	227
	Solutions to the Exercises on Chapter 7	232
Appendices		
A.	A NON-FREE SUPPLEMENTABLE PROJECTIVE MODULE	
	General remarks	235
	A. 1 A non-free supplementable projective module	235
B.	A FURTHER RESULT ON EXACT SEQUENCES	
	General remarks	238
	B. 1 Considerations involving a change of ring	239
	B. 2 Conditions for exactness	242
C.	SOME SPECIAL FREE COMPLEXES	
	General remarks	250
	C. 1 Differentiations on an exterior algebra	250
	C. 2 Generalized Koszul complexes	252
	References	265
	General index	269
	Index of special symbols	271
