

## CONTENTS

<i>Preface</i>	xi
<b>1 Radon</b>	1
1.1 Physical properties	1
1.2 Radon in air – methods of measurement	3
1.3 Emanation of radon and thoron from the soil	5
1.4 Radon in air – variations in space and time	10
1.5 Radon indoors	12
1.6 Radon in mines	14
1.7 Thoron ( $^{220}\text{Rn}$ ) in air	14
1.8 Decay products of radon	15
1.9 Radon and thoron decay products as small ions	20
1.10 Mobility of decay products	23
1.11 Diffusivity of decay products	25
1.12 Attachment of decay products to nuclei	29
1.13 Deposition of decay products on surfaces	32
1.14 Potential alpha energy of unattached decay products	35
1.15 Radiation dose from inhalation of radon and decay products	39
1.16 Dose equivalent	45
1.17 Risk of cancer from inhalation of radon and decay products	46
1.18 Lead 210 and its daughter products	47
1.19 Residence time in atmosphere	48
1.20 Release of $^{210}\text{Po}$ in accident to Windscale reactor	51
Appendix 1.1	52
Appendix 1.2	52
Appendix 1.3	53
References	53
<b>2 Fission product aerosols</b>	61
2.1 Process of fission	61
2.2 Major releases of fission products	64
2.3 Particle size and chemical fractionation	65
2.4 Emission from reactors	66
2.5 Windscale emissions, 1952–6	69
2.6 Windscale accident of October 1957	71
2.7 Accident to SL-1 reactor	77
2.8 Chemical explosion in USSR	77
2.9 Accident at Three Mile Island	80
2.10 Chernobyl accident	81
2.11 Deposition of fission products	90
2.12 Interception by foliage	95
2.13 Field loss of activity from foliage	98

## viii Contents

2.14	Normalised specific activity	100
2.15	Transfer to milk	102
2.16	Transfer of fission products from soil to crops	106
	References	108
<b>3</b>	<b>Radioiodine</b>	115
3.1	Formation in fission and release to atmosphere	115
3.2	Characterisation of radioiodine	117
3.3	Identification of penetrating forms of radioiodine	121
3.4	Environmental sampling of radioiodine	123
3.5	Particulate and gaseous stable iodine	125
3.6	Deposition of radioiodine to surfaces	127
3.7	Deposition of iodine in the field	129
3.8	Deposition near a reprocessing plant	133
3.9	Retention of $^{131}\text{I}$ on herbage	134
3.10	Transfer of radioiodine to milk	136
3.11	$^{131}\text{I}$ in milk following single episodes of deposition	136
3.12	Dose to human thyroids from inhalation and from intake in milk	139
3.13	Relation between fallout of $^{131}\text{I}$ and external gamma dose rate	141
	References	148
<b>4</b>	<b>Tritium</b>	153
4.1	Definitions	153
4.2	Natural tritium	154
4.3	Tritium from weapons tests and reactors	154
4.4	Transport of HTO in the atmosphere	155
4.5	Deposition of HTO	159
4.6	Uptake of HTO by human body	163
4.7	Transport and deposition of HT	164
4.8	Field measurements of deposition of tritium gas	165
	References	167
<b>5</b>	<b>Plutonium</b>	170
5.1	Formation of plutonium aerosols	170
5.2	Detection of airborne plutonium	176
5.3	Plutonium in the environment	178
5.4	The inhalation of plutonium	186
5.5	Entry of plutonium into diet	188
	References	190
<b>6</b>	<b>Mass transfer of radioactive vapours and aerosols</b>	193
6.1	Application of radioactive measurement techniques	193
6.2	Notation	193
6.3	Conductances and resistances	195
6.4	Vapour transport to and from surfaces	196
6.5	Transport of small particles by Brownian diffusion	199
6.6	Deposition by impaction	200
6.7	Profiles of wind speed over extended surfaces	203
6.8	Profiles of vapour concentration over surfaces	206
6.9	Dependence of $B^{-1}$ on $u_*$ and $z_0$	208

	<b>Contents</b>	<b>ix</b>
6.10	Deposition of particles to canopies in the wind tunnel	210
6.11	Field experiments on deposition of particles	215
6.12	Deposition of particles to forests	218
6.13	Resuspension of particles	219
6.14	Resuspension – wind-tunnel experiments	223
	References	225
<b>7</b>	<b>Studies with radioactive particles and human subjects</b>	<b>228</b>
7.1	Introduction	228
7.2	Deposition of particles in the upper respiratory tract	230
7.3	Clearance of particles from the NP region	231
7.4	Deposition in the TB and P regions	232
7.5	Effect of smoking and of disease on mucociliary clearance	236
7.6	Clearance from the pulmonary region	236
7.7	Cigarette tar	237
7.8	Airborne lead from vehicle exhausts	238
7.9	Inhalation of lead aerosols	240
7.10	Radioactive labelling of exhaust lead	242
7.11	Deposition in the lungs of <sup>203</sup> Pb-labelled exhaust particles	244
7.12	Clearance of <sup>203</sup> Pb from the lung and transfer to blood	245
7.13	Contribution of petrol lead to blood lead	247
	References	249
	<i>Index</i>	253
