<i>List of figures</i>	<i>page</i> xii
<i>List of tables</i>	xvi
<i>Preface</i>	xix
<i>Preface to second edition</i>	xxi
<i>Acknowledgments</i>	xxiii
1 A brief introduction to lithic analysis	1
The organization of the book	1
Early historical development	3
A perspective on microwear	5
The truth about replication	7
2 Basics of stone tool production	11
Basic terminology	12
Fracture mechanics	24
Stone tool morphological dynamics	30
Summary	38
3 Lithic raw materials	41
A brief review of geochemical techniques	43
Rock genesis	46
Igneous rocks	47
Sedimentary rocks	50
Metamorphic rocks	56
Summary	59

X CONTENTS

4	Getting started in lithic analysis: identification and classification	61
	Attributes and attribute states	62
	Types and typologies	66
	A basic chipped stone typology	74
	Summary	84
5	Flake debitage attributes	86
	Debitage condition and termination	87
	Debitage striking platforms	89
	Debitage size	98
	Debitage dorsal cortex	103
	Debitage curvature	109
	Summary	111
6	Approaches to debitage analysis	113
	Typological analysis of debitage	114
	Aggregate analysis of debitage	131
	Dissecting debitage assemblages	140
	Summary	141
7	Approaches to stone tool analysis	143
	Core analysis	144
	Flake tool analysis	160
	Biface analysis	177
	Tool function	195
	Summary	199
8	Artifact diversity and site function	201
	Artifact types and function	202
	Site function models	210
	Summary	221
9	Lithic analysis and prehistoric sedentism	224
	Sedentism and archaeology	224
	Sedentism in North America	227

Cambridge University Press

0521615003 - Lithics: Macroscopic Approaches to Analysis, Second Edition

William Andrefsky

Table of Contents

[More information](#)

CONTENTS xi

Occupation duration and the Mousterian of west-central Italy	231
Raw-material qualities and relative sedentism	235
Summary	243
10 Conclusion	245
<i>Glossary</i>	252
<i>References</i>	263
<i>Index</i>	296
