State-Trait Anxiety Inventory (STAI-T) 191
stimulus-response theories (S-R) 32–33, 108–109
stress 345–346, 353–354
sub-goal scaffolding 21–23

temperament 416, 440–442
temporal bridging 22
threat perception 16
'top-down' and 'bottom-up' approaches to personality 143, 155–157, 489–492
  factor analysis 156, 490–492
trait psychology 489–492, 500–502
transmarginal inhibition (TMI) 5

utility theory 17–18

visual perception 32
