

Contents

<i>Introduction</i> <i>F. Mezzadri and N. C. Snaith</i>	<i>page vii</i>
Prime number theory and the Riemann zeta-function <i>D. R. Heath-Brown</i>	1
Introduction to the random matrix theory: Gaussian Unitary Ensemble and beyond <i>Yan V. Fyodorov</i>	31
Notes on pair correlation of zeros and prime numbers <i>D.A. Goldston</i>	79
Notes on eigenvalue distributions for the classical compact groups <i>Brian Conrey</i>	111
Compound nucleus resonances, random matrices, quantum chaos <i>Oriol Bohigas</i>	147
Basic analytic number theory <i>David W. Farmer</i>	185
Applications of mean value theorems to the theory of the Riemann zeta function <i>S.M. Gonek</i>	201
Families of L-functions and 1-level densities <i>Brian Conrey</i>	225
L-functions and the characteristic polynomials of random matrices <i>J.P. Keating</i>	251

Cambridge University Press

0521620589 - Recent Perspectives in Random Matrix Theory and Number Theory

Edited by F. Mezzadri and N. C. Snaith

Table of Contents

[More information](#)

vi

Contents

Spacing distributions in random matrix ensembles	279
<i>Peter J. Forrester</i>	
Toeplitz determinants, Fisher-Hartwig symbols, and random matrices	309
<i>Estelle L. Basor</i>	
Mock-Gaussian behaviour	337
<i>C.P. Hughes</i>	
Some specimens of L-functions	357
<i>Philippe Michel</i>	
Computational methods and experiments in analytic number theory	425
<i>Michael Rubinstein</i>	
 <i>Index</i>
