- Achlya* spp.
sexual reproduction 262–6
- actin
A. nidulans cytoskeleton 236–9
cytoskeleton in polarized yeast growth 230–1
effect of lysocellin 168–70
in yeast budding 203–4
in yeast fission 204
phosphoinositide regulation of cytoskeleton 160–2
role in septation 201, 215–17, 220–1, 222
transduction of positional information to cytoskeleton 232–5
vesicle transport to hyphal tip 238–9
- action potential
in cords and rhizomorphs 149–51
see also signal transduction
- Alternaria* sp.
oligotrophic growth 183
- amino acids
as components of intracellular nitrogen 134–6
composition in *S. lacrymans* 135
in nitrogen translocation 145–6
intracellular storage 142–5
see also nitrogen
- ammonium uptake, *see also* nitrogen 139
antheridiol, *see also* sexual interactions 262–6
- Armillaria* spp.
action potential 40, 149
cords of rhizomorphs 17, 55
definition of fungal genet 285–8
genotype mapping 286–8
karyotypic stability 290–3
- Arthrobotrys oligospora*
lectin as nitrogen source 37, 38
- ascomycetes
ascospore discharge 97–8
ascospore production 126
septation in *A. nidulans* 208–28
sexual signalling system 271–4
- Aspergillus nidulans*
cellularization 201–28
conidiophore formation 210
cytoskeleton and polarity 236–9
duplication cycle 243
genetic analysis of septation 218–21
growth and branching 242–5
hyperbranching mutants 247–52
hyphal polarity 236–45, 240–1, 241–2
loss of duplicated DNA 295–6
morphological mutants 245
physiological controls on septation 217–18
signal transduction and polarity 239–40
spore germination 209–10
- Aspergillus niger*
glucoamylase production 114–22
metal oxalate production 191, 193
metal solubilization 188–91
- Aspergillus oryzae*
growth of colonial mutant 111–12, 122
- ascospores
periodic discharge 97–8
- basidiomycetes
definition of fungal genet 285–8
karyotypic stability 290–3
metabolism and hyphal differentiation 126–56
sexual signalling systems 274–7
unit mycelium concept 283
- Blakeslea trispora*
sexual reproduction 268–71
- branching
effect on culture viscosity 112–13
highly branched (colonial) mutants 108–11
influence on extracellular enzyme yield 111–12
see also colonies, mycelium
budding yeast, *see Saccharomyces cerevisiae*
- Ca²⁺, *see* calcium, phosphoinositides, signal transduction
- calcium
calmodulin (CAM) 85–6, 164
cell signalling in *N. crassa* 85–7
in regulation of polarity 239–40
Ins(1,4,5)P₃-mediated release 162–4, 170–1
