<i>Preface</i>	<i>page xi</i>	
1	Introductory Material	1
1.1	Multilinear Algebra and Combinatorics	1
1.2	Homological and Commutative Algebra	12
1.3	Determinants of Complexes	27
2	Schur Functors and Schur Complexes	32
2.1	Schur Functors and Weyl Functors	32
2.2	Schur Functors and Highest Weight Theory	49
2.3	Properties of Schur Functors. Cauchy Formulas, Littlewood–Richardson Rule, and Plethysm	57
2.4	The Schur Complexes	66
	Exercises for Chapter 2	78
3	Grassmannians and Flag Varieties	85
3.1	The Plücker Embeddings	85
3.2	The Standard Open Coverings of Flag Manifolds and the Straightening Law	91
3.3	The Homogeneous Vector Bundles on Flag Manifolds	98
	Exercises for Chapter 3	104
4	Bott’s Theorem	110
4.1	The Formulation of Bott’s Theorem for the General Linear Group	110
4.2	The Proof of Bott’s Theorem for the General Linear Group	117
4.3	Bott’s Theorem for General Reductive Groups	123
	Exercises for Chapter 4	132
5	The Geometric Technique	136
5.1	The Formulation of the Basic Theorem	137
5.2	The Proof of the Basic Theorem	141
5.3	The Proof of Properties of Complexes $F(\mathcal{V})$.	146

x	<i>Contents</i>	
	5.4 The G-Equivariant Setup	149
	5.5 The Differentials in Complexes $F(\mathcal{V})_\bullet$	152
	5.6 Degeneration Sequences	154
	Exercises for Chapter 5	156
6	The Determinantal Varieties	159
	6.1 The Lascoux Resolution	160
	6.2 The Resolutions of Determinantal Ideals in Positive Characteristic	168
	6.3 The Determinantal Ideals for Symmetric Matrices	175
	6.4 The Determinantal Ideals for Skew Symmetric Matrices	187
	6.5 Modules Supported in Determinantal Varieties	195
	6.6 Modules Supported in Symmetric Determinantal Varieties	209
	6.7 Modules Supported in Skew Symmetric Determinantal Varieties	213
	Exercises for Chapter 6	218
7	Higher Rank Varieties	228
	7.1 Basic Properties	228
	7.2 Rank Varieties for Symmetric Tensors	234
	7.3 Rank Varieties for Skew Symmetric Tensors	239
	Exercises for Chapter 7	245
8	The Nilpotent Orbit Closures	251
	8.1 The Closures of Conjugacy Classes of Nilpotent Matrices	252
	8.2 The Equations of the Conjugacy Classes of Nilpotent Matrices	263
	8.3 The Nilpotent Orbits for Other Simple Groups	278
	8.4 Conjugacy Classes for the Orthogonal Group	283
	8.5 Conjugacy Classes for the Symplectic Group	296
	Exercises for Chapter 8	309
9	Resultants and Discriminants	313
	9.1 The Generalized Resultants	314
	9.2 The Resultants of Multihomogeneous Polynomials	318
	9.3 The Generalized Discriminants	328
	9.4 The Hyperdeterminants	332
	Exercises for Chapter 9	355
	<i>References</i>	359
	<i>Notation Index</i>	367
	<i>Subject Index</i>	369
