Index

- akratic states, 112
- animals, higher, 48, 89
 - behavioral integration of, 52
 - common properties of, 9, 56
 - development of, 99
 - as functional individuals, 91
 - as paradigmatic individuals, 9, 58
- aphids, 11, 88, 99
- archetypes, Platonic, 17
- Aristotle
 - explanation of biological form, 28–29
 - on substantial forms, 17, 29
 - use of artifacts to explain the individuation of living things, 6
- Armillaria bulbosa*, 23–25, 59, 89
- asexual reproduction, *see* reproduction, asexual
- biological origins
 - and continuity with zygote, 78
 - and *d*-continuity, 78–79, 90
 - necessity of, 37, 72, 79
 - and sexual phenotype, 80–83
- Black, Max, 125
- Bonner, J. T., 92
- Buss, Leo, 93–96
- cancer, 93
- compossibility, 73
- concepts as tools, 15
- Darwin, Charles, 17
- Dawkins, Richard, 26, 64–66
 - definition of an organism, 52
 - on selfish genes, 67
- Descartes, René, 12, 114
- development
 - “bottlenecks,” 26, 65–66, 100–101
 - environmental factors in, 80–81
 - of the functional individual, 91–92
 - and multicellularity, 96
 - patterns of, 54, 94
- Disney, Walt, 86, 130
- Empedocles, 28–29
- essential properties
 - assumptions for, 16
 - and biological species, 16
 - as derived from the causal theory of reference, 37
 - nominal, for Locke, 30
 - sortal, challenges to, 70
 - temporal, 16, 70–71
- evolutionary individual, 25
- folk ontology
 - and natural kinds, 57
 - role of in conceptual analysis, 9
- Forbes, Graeme, 75–77
- functional individuality, 89–99
 - evolution of multicellularity, 92, 93
 - and human beings, 106
 - multicellular functional integration, 87–89
 - and organ transplant, 107
 - persistence conditions for, 99
 - in plants, 97
 - symbiosis and, 98
 - zygote as, 77–78, 90
- functional integration, 63–64
- Gale, Richard, 15
- Geach, Peter, 120–123
- genet, 26, 88
- genetic individuality, 64–66
 - and human beings, 105
 - possible forms of growth, 86–89
- Ghiselin, Michael, 61–62, 130
- Haldane, J. B. S., 11
- Harper, John, 26, 65–66, 88

- hermaphrodites, 80
- Hull, David, 10, 67
- Huxley, J. S., 57, 58, 64
- Huxley, T. H., 25–26, 48, 64
- Identity of Indiscernibles, *see* Leibniz's Law
- Indiscernibility of Identicals, *see* Leibniz's Law
- Janzen, Daniel, 25, 88
- Kripke, Saul, 36–39
- Leibniz's Law, 120, 124–125
- Lewontin, R. C., 66–67
- Locke, John
 - criteria for the continuation of life, 2–3, 6
 - criticism of Aristotle's use of substantial forms, 31
 - definition of 'sortal', 17
 - material constitution of living entities, 2
 - mechanistic account of individuation, 31, 103
 - nominalist account of individuation, 29–33
 - on the role of personal identity in moral judgments, 115–117
- Lowe, E. J., 19, 122–123
- Mackie, Penelope, 69
- Margulis, Lynn, 63
- McGinn, Colin, 77–79
- metamorphosis, 7–8, 43, 100
- metazoan, *see* animals, higher
- Modern Synthesis, 94–95
- monophylogeny, 84
- multiple personality disorder, 117
- Nanomia cara*, 6–7
- natural kinds, 20
 - empirical revision of, 44, 46
 - as patterns, 42
 - Putnam's account of, 36, 39–42
 - subjectivity in recognition of, 45
- ontological pluralism, 46–47, 59, 68
- origins, *see* biological origins
- Parfit, Derek, 14
- particulars, 49, 60–62
 - bare, 18
 - non-material, 129
 - substantial, 18
- Penis-at-Twelve, 82
- personal identity
 - the brain's role in, 108–109, 112
 - as the continuation of a human functional individual, 111–118
 - and memory, 109–111, 112
- pluralism, *see* ontological pluralism
- ramet, 26
- reproduction, asexual
 - as analogous to growth, 65, 88
 - in plants, 8
- resurrection, 101–104
- rhizocephalans, 2, 11, 98–99, 100–101
- Ship of Theseus, 12, 108
- siphonophores
 - comparison with jellyfish, 7
 - development of, 6–7
- slime mold, life cycle of, 8, 97
- sortal
 - definition of, 17
 - empirical revision of, 34
 - phase, 17
 - substantial, 17, 18
- sortal-relative identity, 120–122
- species, biological
 - essentialism and, 16, 17
 - as individuals, 83
 - Linnaeus's views on, 83
 - numerical phenetics, 83
 - as substantial kinds, 29, 34
- Strawson, P. F., 60
- substantial kinds
 - empirical nature of, 20
 - modal attributes of, 36
 - person as a, 113–115
 - role in the identity relation, 119
- superorganism, 129
- symbiosis
 - and the evolution of eukaryotic cells, 63, 98
 - in lichens, 9
- tardigrades, 86, 101–102
- thought experiments
 - in discussions of identity, 12
 - history of in philosophy, 9
 - lack of background conditions for, 10–11
- transubstantiation, 20–21
- transworld identity, 73, 77
- unit of selection, 54, 67–68

Index

- van Inwagen, Peter
 - on composition, 51
 - on imaginary examples, 13
 - individuation of a life, 4
 - on interrupted lives, 102–103
 - view of personal identity, 109
- Wiggins, David
 - defense of sortal essentialism, 70
- rejection of sortal-relative identity, 123–125
