978-0-521-63246-1 - Geometric Theory of Singular Phenomena in Partial Differential Equations, Cortona 1995

Edited by Jean Pierre Bourguignon, Paolo de Bartolomeis and Mariano Giaquinta

Table of Contents

[More information](#)

## Contents

Preface	ix
Problemes de Monge-Ampere, courbes pseudo-holomorphes <i>F. Labourie</i>	1
Multiplier ideal sheaves and Futaki's invariant <i>Alan M. Nadel</i>	7
Gluing and moduli for noncompact geometric problems <i>Rafe Mazzeo &amp; Daniel Pollack</i>	17
Metrics on Riemann surfaces and the geometry of moduli spaces <i>Lutz Habermann &amp; Juergen Jost</i>	53
The orbifold fundamental group of Persson-Noether-Horikawa surfaces <i>Fabrizio Catanese &amp; Sandro Manfredini</i>	71
Introduction to differential geometry of twistor spaces <i>Paolo de Bartolomeis &amp; Antonella Nannicini</i>	91
Energy minimizing maps from a domain of $\mathbf{R}^3$ into $\mathbf{S}^2$ <i>M. Giaquinta, G. Modica &amp; J. Soucek</i>	161
