<i>Preface</i>	<i>page</i> ix
1 Introduction	1
1.1 Fluids, structures, and acoustics	1
1.2 Equations of motion of a fluid	2
1.3 Equations of motion of an elastic solid	12
1.4 Equations for vibrating membranes, plates, and shells	15
1.5 Boundary conditions	24
1.6 Sound propagation in homentropic, irrotational flow	27
1.7 Fundamental solutions of the acoustic wave equations	33
1.8 Multipoles, radiation efficiency, and the influence of source motion	43
1.9 Reciprocity	50
1.10 General solution of the inhomogeneous wave equation	59
1.11 Compact Green's functions	65
1.12 The radiation of sound from vibrating bodies: matched expansions	74
1.13 The acoustic energy equation	80
1.14 Vorticity	85
2 Aerodynamic sound in unbounded flows	101
2.1 Aerodynamic sound	101
2.2 The Ffowcs Williams–Hawkings equation	110
2.3 Vorticity and entropy fluctuations as sources of sound	121
2.4 Two-phase flow	133
2.5 Absorption of aerodynamic sound	138
2.6 Jet noise	149

3	Sound generation in a fluid with rigid boundaries	157
3.1	Influence of rigid boundaries	157
3.2	Special cases treated by the method of compact Green's functions	167
3.3	Vortex–airfoil interaction noise	186
3.4	Boundary layers and boundary layer noise	204
3.5	Trailing edge noise	215
3.6	Sound generation by moving surfaces	234
4	Sound generation in a fluid with flexible boundaries	253
4.1	Sources near an elastic plate	253
4.2	Scattering of bending waves by cracks, joints, and ribs	271
4.3	Sources adjacent to an inhomogeneous elastic wall	286
4.4	Scattering of flexural waves at edges	293
4.5	Aerodynamic sound generated at an elastic edge	303
5	Interaction of sound with solid structures	317
5.1	Damping of sound at a smooth wall	317
5.2	Attenuation of sound by vorticity production at edges	333
5.3	Interactions with perforated screens	353
5.4	Influence of surface compliance	385
5.5	Tube banks	399
5.6	Nonlinear interactions	410
6	Resonant and unstable systems	431
6.1	Linear theory of wall aperture and cavity resonances	431
6.2	Nonlinear theory of cavity resonances	453
6.3	Edge tones and organ pipes	472
6.4	Combustion instabilities	494
6.5	Thermoacoustic engines and heat pumps	520
	<i>References</i>	533
