

Contents

	Preface	XI
	Introduction	1
I	Alignments	3
	1 Partially ordered sets	3
	2 Aligned spaces	6
	3 Anti-exchange alignments	14
	4 Antimatroids	16
	5 Exchange alignments	20
	6 Notes	24
II	Convexity	27
	1 Examples	27
	2 Convex geometries	31
	3 Additional axioms	36
	4 Examples (continued)	43
	5 Notes	47
III	Linearity	49
	1 Lines	49
	2 Linear geometries	54
	3 Helly's theorem and its relatives	66

VIII	<i>Contents</i>	
IV	Linearity (continued)	71
1	Faces	71
2	Polytopes	74
3	Factor geometries	81
4	Notes	84
V	Density and Unendingness	85
1	Dense linear geometries	85
2	Unending linear geometries	95
3	Cones	103
4	Polyhedra	109
5	Notes	114
VI	Desargues	115
1	Introduction	115
2	Projective geometry	119
3	The Desargues property	124
4	Factor geometries	131
5	Notes	135
VII	Vector Spaces	137
1	Coordinates	137
2	Isomorphisms	143
3	Vector sums	150
4	Notes	154
VIII	Completeness	157
1	Introduction	157
2	Separation properties	164
3	Fundamental theorem of ordered geometry	172
4	Metric and norm	178
5	Notes	182

IX Spaces of Convex Sets	185
1 The Hausdorff metric	185
2 The space $\mathcal{C}(X)$	189
3 Embeddings of $\mathcal{C}(X)$	192
4 The Krein–Kakutani theorem	196
5 Notes	209
References	211
Notations	216
Axioms	217
Index	218
