

## INDEX

- affine transformation, 42
- almost everywhere, 8
- analytic continuation
  - distributions defined by, 20
  - uniqueness of, 130
- analytic function, 128–30
- anti-dual, 116
  
- Banach space, 147
- Banach–Steinhaus theorem, 15
- base
  - of a topology, 144
  - of neighbourhoods of zero, 145
- bijection, 4
  
- Cauchy–Riemann
  - equations, 129
  - operator, 62
- chain rule, 81, 83
- characteristic, 139
- characteristic function, of a set, 20
- complete space, 115, 145
- continuous
  - function, 144
  - linear form, 149
  - sequentially, 9
- convergence
  - in  $C_c^\infty$ , 34
  - in  $C_c^\infty$ , 9
  - of distributions, 13
  - in a Fréchet space, 147
  - in a metric space, 145
  - in  $\mathcal{S}$ , 93
  - in a topological space, 145
  - weak\*, 149
- convolution
  - equations, 58
  - of functions, 50
  - of distributions, 50–3, 56, 158
  - theorem, 101
- cut-off function, 11
  
- d'Alembertian, 85, 88, 126, 138
- derivative
  - of a distribution, 17
  - of a map, 80
  - of an integral depending on a parameter, 91
- Dieudonné, J., 152
- diffeomorphism, 80
- differential operator, 25
  - adjoint of, 25
  - d'Alembertian, 85
  - constant coefficients, 59, 139
  - Cauchy–Riemann, 62
  - elliptic, 109
  - evolution, 134
  - fundamental kernel of, 76
  - fundamental solution of, 59
  - heat, 63
  - hyperbolic, 139
  - Laplacian, 61
  - Schrödinger, 137, 142
  - symbol of, 26
- dilatation, 44
- Dirac distribution, 8
- distance, of a point from a set, 11
- distributions
  - with compact support, 34
  - convergence of, 13
  - convolution of, 50
  - defined by analytic continuation, 20
  - derivatives of, 17
  - of finite order, 9
  - Fourier transforms of, 98
  - homogeneous, 44
  - kernel, 69
  - localization, 10, 36
  - periodic, 104
  - product with a function, 23
  - singular support of, 108, 146
  - structure theorem, 60, 97
  - support, 12
  - supported at a point, 36
  - with support bounded on the left, 57
  - tempered, 97
  - tensor product of, 45

- division, 27, 88, 139  
 dominated convergence theorem, 14  
 dual  
   of a Hilbert space, 116  
   of a topological vector space, 149  
 duality, 29  
  
 Ehrenpreis, L., 70, 139  
 elliptic  
   differential operator, 109  
   regularity theorem, 109  
 evolution operator, 134  
 exterior product, 148  
  
 form  
   bilinear, 47, 49, 70, 71  
   continuous linear, 149  
   exterior, 85  
   Hermitian, 114  
   linear, 2  
 Fourier series, 106  
   of a convolution, 92, 102  
   of a function, 90  
   of a tempered distribution, 98  
 Fourier inversion theorem, 95  
 Fourier–Laplace transform, 128  
 Fréchet space, 147  
 frequency set, 145  
 Fubini's theorem, 90  
 function  
   analytic, 128  
   characteristic, 20  
   continuous, 144  
   cut-off, 11  
   Heaviside, 18  
   locally integrable, 8  
   of polynomial growth, 97  
   rapidly decreasing, 93  
   support of, 4  
   test, 2, 5  
 fundamental  
   kernel, 76  
   solution, 58, 59  
  
 Gårding, L., 134, 139  
 Gask, H., 70  
 Gel'fand, I. M., 141, 152  
 Grothendieck, A., 70  
  
 Hadamard, J., 89  
 Hahn–Banach theorem, 141  
 Hausdorff  
   separation axiom, 145  
   space, 145  
   –Young inequality, 125  
 heat operator, 63  
 Heaviside function, 18  
  
 Hermitian form, 114  
 Hilbert  
   space, 115  
   transform, 126  
 homogeneous distribution, 44  
 Hörmander, L., 70, 140, 152  
 hyperbolic operator, 139  
  
 implicit function theorem, 82  
 inductive limit topology, 149  
 initial value problem, 63, 88, 126  
 injective, 4  
 inner product, 114  
  
 kernel, *see* distributions, regular kernel  
 kernel theorem, 70  
  
 Laplace transform, 128  
 Laplacian, 61  
 Leibniz's theorem, 24  
 Lions, J. L., 134  
 localization, 10, 36  
 locally convex topological vector space, 146  
 locally integrable, 8  
  
 Malgrange–Ehrenpreis theorem, 139  
 measure, 10  
 measure zero, set of, 8  
 metric space, 145  
 metrizable, 145  
 multi-index, 5  
 multiplier, 102  
  
 neighbourhood, 144  
   of zero, 145  
 norm, 146  
 normed space, 146  
  
 open set, 145  
 order  
   of a differential operator, 25  
   of a distribution, 9  
  
 Paley–Wiener–Schwartz theorem, 130  
 parameters, dependence on, 40–2  
 parametrix, 110  
 Parseval's identity, 118, 119  
 partition of unity, 10, 13  
 Peetre, J., 78  
 periodic distribution, 104  
 Plancherel's theorem, 118  
 Poisson's summation formula, 104, 106  
 primitive, of a distribution, 22  
 principal value, 19, 30  
 product  
   differentiation of, 24  
   of a distribution and a function, 23

- of two distributions (tensor product), 45
  - inner, 114
  - of topological spaces, 144
- propagation of singularities, 159–60
- proper map, 55
- pullback
  - of a function, 80
  - of a distribution, 80–3, 150, 154–5
- push-forward, 149, 156
- rapidly decreasing test function, 93
- reflection map, 44
- regular kernel, 73
- regularization, 53
- Riemann–Lebesgue lemma, 93, 124
- Riesz, M., 89
- Riesz representation theorem, 115
- Rudin, W., 152
- Schwartz, L., 38, 68, 70, 93, 130, 152
- Schwartz kernel theorem, *see* kernel theorem
- Schwarz's inequality, 114
- semi-norm, 146
  - estimate, 7
- sequentially continuous, 9
- Shilov, G. E., 141, 152
- singular support, 108
- Sobolev
  - space, 120
    - embedding theorem, 124
- space
  - Banach, 147
  - complete, 145
  - Euclidean, 4
  - Fréchet, 147
  - Hausdorff, 145
  - Hilbert, 115
  - locally convex, 115
  - metric, 145
  - normed, 146
  - Sobolev, 120
  - topological, 144
- structure theorem, 60, 97
- subordinated, 13
- submersion, 84
- support
  - of a convolution, 51
  - of a distribution, 12
  - of a function, 4
  - singular, 108
  - of a tensor product, 47
- surjective, 4
- symbol, of a differential operator, 26
- Taylor's formula, 28
- Taylor's theorem, 38
- tempered distributions, 97
- tensor product, 45
- test functions, 2, 5
- topological space, 144
- topological vector space, 145
- topology, 144
  - generated by semi-norms, 146
  - weak\*, 149
- translate, 42
- transpose, 29
- triangle inequality, 145
- Trèves, F., 152
- uniqueness
  - of analytic continuation, 130
  - of solutions of a differential equation, 87, 137, 139
- unitary operator, 119
- vector sum, difference, 50
- wavefront set
  - behaviour under
    - compositions, 157
    - convolution, 158
    - exterior product, 148
    - pull-back, 155
    - push-forward, 149, 156
  - definition, 144
- wave equation, wave operator, *see*  $d^*$ Alembertian
- weak\*
  - topology, 149
  - convergence, 149
- Yoshida, K., 152
- Zemanian, A., 152
