Contents

<i>List of Illustrations</i>	<i>page</i> x
<i>List of Tables</i>	xii
<i>Preface</i>	xiii
1 Real Algebraic Curves	1
1.1 Parametrized and Implicit Curves	1
1.2 Introductory Examples	3
1.3 Curves in Planar Kinematics	12
2 General Ground Fields	20
2.1 Two Motivating Examples	20
2.2 Groups, Rings and Fields	22
2.3 General Affine Planes and Curves	25
2.4 Zero Sets of Algebraic Curves	28
3 Polynomial Algebra	33
3.1 Factorization in Domains	33
3.2 Polynomials in One Variable	35
3.3 Polynomials in Several Variables	38
3.4 Homogeneous Polynomials	42
3.5 Formal Differentiation	44
4 Affine Equivalence	47
4.1 Affine Maps	48
4.2 Affine Equivalent Curves	49
4.3 Degree as an Affine Invariant	51
4.4 Centres as Affine Invariants	53
5 Affine Conics	60
5.1 Affine Classification	61
5.2 The Delta Invariants	64
5.3 Uniqueness of Equations	68

Table of Contents

[More information](#)

viii	<i>Contents</i>	
6	Singularities of Affine Curves	71
6.1	Intersection Numbers	71
6.2	Multiplicity of a Point on a Curve	77
6.3	Singular Points	80
7	Tangents to Affine Curves	85
7.1	Generalities about Tangents	85
7.2	Tangents at Simple Points	86
7.3	Tangents at Double Points	88
7.4	Tangents at Points of Higher Multiplicity	91
8	Rational Affine Curves	95
8.1	Rational Curves	96
8.2	Diophantine Equations	101
8.3	Conics and Integrals	106
9	Projective Algebraic Curves	108
9.1	The Projective Plane	108
9.2	Projective Lines	110
9.3	Affine Planes in the Projective Plane	115
9.4	Projective Curves	117
9.5	Affine Views of Projective Curves	118
10	Singularities of Projective Curves	125
10.1	Intersection Numbers	125
10.2	Multiplicity of a Point on a Curve	129
10.3	Singular Points	130
10.4	Delta Invariants viewed Projectively	134
11	Projective Equivalence	137
11.1	Projective Maps	137
11.2	Projective Equivalence	140
11.3	Projective Conics	142
11.4	Affine and Projective Equivalence	144
12	Projective Tangents	148
12.1	Tangents to Projective Curves	148
12.2	Tangents at Simple Points	149
12.3	Centres viewed Projectively	150
12.4	Foci viewed Projectively	152
12.5	Tangents at Singular Points	156
12.6	Asymptotes	159
13	Flexes	162
13.1	Hessian Curves	163
13.2	Configurations of Flexes	169

Table of Contents

[More information](#)

<i>Contents</i>		ix
14	Intersections of Projective Curves	173
14.1	The Geometric Idea	173
14.2	Resultants in One Variable	175
14.3	Resultants in Several Variables	177
14.4	Bézout's Theorem	179
14.5	The Multiplicity Inequality	184
14.6	Invariance of the Intersection Number	187
15	Projective Cubics	190
15.1	Geometric Types of Cubics	190
15.2	Cubics of General Type	194
15.3	Singular Irreducible Cubics	196
15.4	Reducible Cubics	198
16	Linear Systems	201
16.1	Projective Spaces of Curves	201
16.2	Pencils of Curves	203
16.3	Solving Quartic Equations	207
16.4	Subspaces of Projective Spaces	208
16.5	Linear Systems of Curves	210
16.6	Dual Curves	213
17	The Group Structure on a Cubic	217
17.1	The Nine Associated Points	217
17.2	The Star Operation	221
17.3	Cubics as Groups	222
17.4	Group Computations	226
17.5	Determination of the Groups	229
18	Rational Projective Curves	234
18.1	The Projective Concept	234
18.2	Quartics with Three Double Points	236
18.3	The Deficiency of a Curve	240
18.4	Some Rational Curves	242
18.5	Some Non-Rational Curves	245
	<i>Index</i>	247
