

Contents

<i>Preface</i>	vii
<i>Introduction to algebraic groups and Lie algebras</i> by R. W. Carter,	1
<i>Weyl groups, affine Weyl groups and reflection groups</i> by R. Rouquier,	21
<i>Introduction to abelian and derived categories</i> by B. Keller,	41
<i>Finite groups of Lie type</i> by M. Geck,	63
<i>Generalized Harish-Chandra theory</i> by M. Broué and G. Malle,	85
<i>Introduction to quantum groups</i> by J. C. Jantzen,	105
<i>Introduction to the subgroup structure of algebraic groups</i> by M. W. Liebeck,	129
<i>Introduction to intersection cohomology</i> by J. Rickard,	151
<i>An introduction to the Lusztig Conjecture</i> by S. Donkin,	173
<i>Index</i>	189
