0521643597 - Milton and the Natural World: Science and Poetry in Paradise Lost

Karen L. Edwards

Frontmatter

[More information](#)

Milton and the Natural World overturns prevailing critical assumptions by offering a fresh view of *Paradise Lost*, in which the representation of Eden's plants and animals is shown to be fully cognizant of the century's new, scientific natural history. The fabulous lore of the old science is wittily debunked, and the poem embraces new imaginative and symbolic possibilities for depicting the natural world, suggested by the speculations of Milton's scientific contemporaries including Robert Boyle, Thomas Browne, and John Evelyn. Karen Edwards argues that Milton has represented the natural world in *Paradise Lost*, with its flowers and trees, insects and beasts, as a text alive with meaning and worthy of experimental reading.

Karen L. Edwards is Lecturer in the School of English at the University of Exeter, and has previously taught at Kenyon College in the USA.

Acknowledgments

I have learned that writing a book creates and is sustained by community. The community that has made it possible for me to write this book stretches between two continents and across a lifetime. Without Denis Pereira Gray, Bettine Fitzgerald Costa, and Cloriene S. Barrett (who contradicted me at a crucial moment), I wouldn't have begun to begin the writing.

My former colleagues at Kenyon College, especially Don and Sally Rogan, Royal Rhodes, Linda Metzler, and Terry Schupbach, have taught me that community nourishes body as well as spirit. Generations of my students at Kenyon College and the University of Exeter, especially those intrepid Kenyon–Exeter Program students who traveled between the two, have shown me that community doesn't ever stop growing.

My heartfelt thanks to Anthony Fothergill, Michael Wood, and Gordon Campbell for generously reading and commenting on early drafts of this book, and for encouraging me to continue the project. Thanks, too, to members of the British Milton Seminar, who listened to work-in-progress and shared the wealth of their expertise with me. My colleagues at the University of Exeter have contributed in richly individual ways to this undertaking. I am especially grateful to Mark Davie, Diane Davies, Charles Page, and Robert Lawson-Peebles. The Research Committee of the University funded travel for research and conferences related to this book, as did the School of English.

I owe many thanks to the librarians and staff of the British Library, the Rockerfeller, Sciences, and John Hay Libraries of Brown University, and the libraries of Exeter University. A National Endowment for the Humanities Fellowship made it possible for me to do research at the John Carter Brown Library in Providence, Rhode Island, an experience both highly productive and highly pleasurable, thanks to Norman Fiering and his staff. An Audrey Lumsden-Kouvel Fellowship in Renaissance Studies

supported three months at the Newberry Library in Chicago, where I had the good fortune to meet and work with Julie Mulroy; my thanks to Fred Hoxie and to a fine reference staff headed by Hjordis Halvorson. I owe special thanks to Andrew Baster and the Wills Library of Guy's Hospital. Josie Dixon at Cambridge University Press has been a most patient and supportive editor, and my book has benefited from the comments of two anonymous readers at the Press.

It may be that the demands made upon community are most strenuous as a project enters the last stage, or perhaps it is just that community shows its strength when the need is greatest. It is with love and pleasure that I acknowledge the community that has sustained me in this last year: Adele Davidson, Brian Edgar, David and Carol Edwards, George and Winnie Edwards, Avril Henry, Nancy Leopold, Peter and Inna New and Lia Matyushina, Brigid Pailthorpe, Edwyna Prior and David Beaumont, Esther Rashkin, and Jo Whitmore. My deepest gratitude to them – and, finally, to Santina Siena, who magnificently expresses community in ways practical and spiritual, with unfailing generosity, intelligence, and humor, and who has done so for as long as I have known her.
