978-0-521-64557-7 - Level Set Methods and Fast Marching Methods: Evolving Interfaces
in Computational Geometry, Fluid Mechanics, Computer Vision, and Materials Science

J. A. Sethian

Index

[More information](#)

Index

- Accuracy of Fast Marching Method, 141, 151
- Accuracy of Level Set Method, 141
- Adaptive mesh refinement, 78
- Aircraft collision, 305
- Area
 - calculation of, 71
- Artificial viscosity, 54

- Boolean operations on shapes, 278
- Boundary conditions, 72
- Boundary value formulation, 4
 - iterative schemes, 68, 87

- Cell methods, 39
- CFL condition, 10, 67
- Characteristics, 45, 49
- Chopp surfaces, 172
- Combustion, 241
 - deflagrations, 247
 - detonations, 248
 - flame fronts, 241
- Computer vision, 218
 - shape recognition, 231
- Conservation form, 55
- Convex
 - functions, 56, 63
 - schemes, 63
- Crystal growth, 249
- Curvature, 17
 - equation of motion, 19, 24
 - Fast Marching calculation of, 9
 - Gaussian, 70
 - level set calculation of, 9, 69
 - mean, 70
 - motion under, 167
 - singularity in, 21
 - smoothing effects of, 24

- De-noising, 200

- Delta function, 241, 245, 257
- Dendritic solidification, 249
- Deposition, 314
- Diffusion methods, 188
- Dijkstra's method, 93
- Discontinuous speed functions, 330
- Domain of dependence, 45, 49
- Domain of influence, 45

- Eikonal equation, 5, 216, 267
- Entropy condition, 22, 25
- Entropy solution, 52
- Etching, 314
- Eulerian formulation, 4, 38, 41
- Extension velocities, 127
 - need for, 128
 - re-initialization, 138

- Fast level set methods, 77
 - adaptive mesh refinement, 78
 - narrow band methods, 80
 - parallel algorithms, 77
- Fast Marching Method, 86, 342
 - accuracy, 151
 - advantages, xvi, 8
 - boundary value formulation, 4
 - causality, 87
 - cost, 100
 - for general static H-J eqns., 99
 - heap sort, 90
 - higher order versions, 96
 - history, 11
 - implementation philosophy, 161
 - optimal ordering, 96
 - triangulated version, 120
 - update procedure, 90
- Fast marching methods, 342
 - cost, 92
 - relation to network path algorithms, 93

377

- Film boiling, 260
- Finite difference approximations, 46
- Flame stability, 242
- Flux function, 53
 - numerical flux function, 55, 62
- Gaussian filter, 200, 220
- Geodesics on surfaces, 292
- Godunov, 56
- Grayson's theorem, 168, 169
- Grid generation, 191
- Groundwater flow, 260
- Hamilton–Jacobi equation, 31
 - Fast Marching methods for, 99
 - static, 293
- Hamiltonian, 31, 61, 328
- Heap sort, 90
- Huygens' principle, 22, 42, 94
- Hyperbolic conservation law, 26, 27, 30, 44
- Image, 200
 - intensity map, 200
- Image processing, 200
 - Alvarez–Morel–Lions scheme, 202
 - de-noising, 200
 - Gaussian filter, 200
 - gray scale, textured, color images, 207
 - Min/Max flow, 203
 - min/max flow, 205
 - Notion of scale, 203, 205
 - notion of scale, 200
 - stopping criteria, 203, 206
- Immersed interface method, 249
- Influence matrix, 185
- Initial value formulation, 6
- Intensity map, 200
- Intrinsic properties, 9
- Inverse problems, 229
- Ion–milling, 328
- Irreversible, 23
- Lagrangian formulation, 18, 34
- Lax–Friedrichs, 56
- Lax–Wendroff, 48
- Length
 - calculation of, 71
- Level Set Method
 - advantages, xvi, 8, 41
 - boundary conditions, 72
 - central difference approximation, 42
 - conservation of mass, 143
 - convex schemes, 63
 - diffusion methods, 188
 - finite element version, 101
 - first order schemes, 65
 - higher order time schemes, 67
 - history, 11
 - implementation philosophy, 161
 - initial value formulation, 6, 63
 - initialization, 72
 - narrow band method, 80
 - non-convex schemes, 69, 329
 - second order schemes, 66
 - variational formulation, 183
- Marangoni effect, 260
- Marker particle schemes, 34
 - disadvantages, 36
- Masking, 157
- Metric
 - calculation of, 70
- Microfabrication, 313
- Min/Max flow, 203
 - gray scale, textured, color images, 207
 - prescribed scale, 205
 - stopping criteria, 205
- Minimal surfaces, 270
 - catenoid, 273
 - surfaces of prescribed curvature, 274
- Monotone schemes, 55
- Motion under
 - curvature, 167
 - mean curvature, 169
 - second derivative of curvature, 177
- Multiple interfaces, 183
- Narrow Band Method, 80
 - advantages, 80
 - algorithm, 83
 - cost, 81, 100
 - variants, 85
- Neural network, 235
- Non-convex
 - functions, 328
 - schemes, 69, 328, 329
- Normals
 - calculation of, 70
- Numerical flux function, 55, 62
- Optical character recognition, 233, 235
- Optimal path planning, 284
- Oscillations in front, 18
- Parallel algorithms, 77
- Parameterized formulation, 17
- Photolithography development, 313, 342
- Projection method, 255
- Rankine–Hugoniot, 54
- Rarefaction fan
 - in conservation law, 51
 - in front, 23
