## Contents

<b>Preface</b>	viii
<b>O Preliminaries</b>	1
1 <i>Notation</i>	1
2 <i>Infinitely divisible distributions</i>	2
3 <i>Martingales</i>	3
4 <i>Poisson processes</i>	4
5 <i>Poisson measures and Poisson point processes</i>	6
6 <i>Brownian motion</i>	8
7 <i>Regular variation and Tauberian theorems</i>	9
<b>I Lévy Processes as Markov Processes</b>	11
1 <i>Lévy processes and the Lévy-Khintchine formula</i>	11
2 <i>Markov property and related operators</i>	18
3 <i>Absolutely continuous resolvents</i>	24
4 <i>Transience and recurrence</i>	31
5 <i>Exercises</i>	39
6 <i>Comments</i>	41
<b>II Elements of Potential Theory</b>	43
1 <i>Duality and time reversal</i>	43
2 <i>Capacitary measure</i>	48

vi	<i>Contents</i>	
	3 <i>Essentially polar sets and capacity</i>	53
	4 <i>Energy</i>	56
	5 <i>The case of a single point</i>	61
	6 <i>Exercises</i>	68
	7 <i>Comments</i>	70
<b>III</b>	<b>Subordinators</b>	71
	1 <i>Definitions and first properties</i>	71
	2 <i>Passage across a level</i>	75
	3 <i>The arcsine laws</i>	81
	4 <i>Rates of growth</i>	84
	5 <i>Dimension of the range</i>	93
	6 <i>Exercises</i>	99
	7 <i>Comments</i>	100
<b>IV</b>	<b>Local Time and Excursions of a Markov Process</b>	103
	1 <i>Framework</i>	103
	2 <i>Construction of the local time</i>	105
	3 <i>Inverse local time</i>	112
	4 <i>Excursion measure and excursion process</i>	116
	5 <i>The cases of holding points and of irregular points</i>	121
	6 <i>Exercises</i>	123
	7 <i>Comments</i>	124
<b>V</b>	<b>Local Times of a Lévy Process</b>	125
	1 <i>Occupation measure and local times</i>	125
	2 <i>Hilbert transform of local times</i>	134
	3 <i>Jointly continuous local times</i>	143
	4 <i>Exercises</i>	150
	5 <i>Comments</i>	153
<b>VI</b>	<b>Fluctuation Theory</b>	155
	1 <i>The reflected process and the ladder process</i>	155
	2 <i>Fluctuation identities</i>	159
	3 <i>Some applications of the ladder time process</i>	166
	4 <i>Some applications of the ladder height process</i>	171
	5 <i>Increase times</i>	176

<i>Contents</i>	vii
6 <i>Exercises</i>	182
7 <i>Comments</i>	184
<b>VII Lévy Processes with no Positive Jumps</b>	<b>187</b>
1 <i>Fluctuation theory with no positive jumps</i>	187
2 <i>The scale function</i>	194
3 <i>The process conditioned to stay positive</i>	198
4 <i>Some path transformations</i>	206
5 <i>Exercises</i>	212
6 <i>Comments</i>	214
<b>VIII Stable Processes and the Scaling Property</b>	<b>216</b>
1 <i>Definition and probability estimates</i>	216
2 <i>Some sample path properties</i>	222
3 <i>Bridges</i>	226
4 <i>Normalized excursion and meander</i>	232
5 <i>Exercises</i>	237
6 <i>Comments</i>	240
<b>References</b>	<b>242</b>
<b>List of symbols</b>	<b>261</b>
<b>Index</b>	<b>264</b>
