

Index

Abbreviations are not listed in this index; please see the list of abbreviations for the corresponding entry. Fleeting references, of a kind not likely to be of interest to a reader concerned with that person or institution as such, are not listed. Publications cited are listed here under the name of each author named in the bibliography, but only very exceptionally under the title of a book. The sole-authored publications come first, followed by joint-authored ones where the person is the first author, and then those where s/he is not or the publication is a contribution to an edited volume. The 'publications' include the interviews which are part of the data.
