Subject Index

- act-state independence, 20
- admissibility, 207, 212–214, 222
- agency theory, 146
- agreeing utility, 88, 93, 96, 173
- almost agreeing utility, 86
- almost periodic, 287
- almost state-independent utilities, 94, 96
- ancillary statistic, 296, 297, 299–303
- arbitrage, 142
- Archimedean axiom, 42, 49, 52–55, 72, 78–81, 87, 109, 152, 171
- Arrow's impossibility theorem, 28, 36, 173
- Axiom of Choice, 319
- backward induction, 9, 247–251, 255–257, 265
- barycentric coordinates, 60
- Bayes' theorem, 351, 354, 356, 359–361
- Behrens–Fisher problem, 298
- bias, 294–296, 300, 304, 305, 307, 308
- Borel paradox, 224
- bounded preference, 82
- bounded set of utilities, 83
- bounded utilities, 86, 88, 208
- called-off act, 96
- called-off bet, 47, 58
- called-off choice, 91
- called-off horse lottery, 90
- called-off preference, 172, 175
- censoring, 299
- certainty, 10, 333–336, 343–346
- clinical trials, 294, 308–310
- coherence, 157, 170, 194, 204–207, 212, 217, 378
- common knowledge, 246, 258, 260, 262–264
- common prior, 247, 259–263
- compact, 334, 341, 346, 347
- compactification of sets of strategies, 268
- complete information, 254
- complete market, 134, 142
- complete metric space, 282
- conditional conglomerability, 221–223
- conditional indifference, 97
- conditional odds, 60
- conditional preference, 74, 96–98, 155
- conditional probability, 48, 58, 96, 176
- conditionally conglomerable, 220
- conglomerability, 206, 209, 212–217, 219, 223, 273, 355, 362, 364
- consensus, 10, 333–338, 343, 345, 346
- consequences, 3, 7, 67, 70, 146, 194, 195, 197–202, 205–207, 209
- Consistency (Axiom 5) for state-dependent utility, 164, 175
- constant act, 149, 159, 161–163, 166, 176, 195, 201
- constant horse lottery, 171
- constant utility, 166
- convergence, almost everywhere, 341
- convergence, in probability, 341
- convex sets, 32, 54–56, 60, 88, 93, 101, 102
- cooperative group, 30, 170
- correlated equilibrium, 247, 259, 261, 265
- countable additivity (for probability), 195–197, 200, 202, 206, 213
- countable additivity, non-conglomerability of, 224, 226
- counterfactual situation, 256
- data censoring, 304
- deFinetti's representation theorem, 345
- DeGroot–Kadane game, 247, 251, 254–256, 258, 260, 262, 263
- diffuse probability, 271
- discrete horse lottery, 75
- discrete lottery, 74, 80
- discrete topology, 334
- disintegrability of a probability distribution, 213, 273, 363
- dollar–yen example, 157–160
- dominance, 81, 202–204, 206, 212, 214, 222
- Dutch Book, 40, 46, 47, 55, 57, 58, 62, 194–196, 204, 216
- dynamic coherence, 333, 335, 346
- E-admissibility, 29–32
- e*-called-off horse lottery, 84

extraneous probability, 171, 195
finite additivity (for probability), 2, 3, 8, 11, 194, 196, 199, 203, 207, 211–213, 217, 219, 267, 268, 271, 273, 289, 290, 354–356, 359, 362–365, 367, 376, 377
finite intersection property for sets of strategies, 279, 280, 282, 283
finitely additive prior, 215
finitely additive probability, convergence to a, 218
Fisher–Buehler–Feddersen paradox, 222
Flatland example, 215
foregone conclusions, 349–381
Fubini's theorem, 270
gambles, 195, 196, 201
game theory, 235, 236, 252, 306
Goldstein-coherence, 359, 361, 362
group decision, 20
Hahn–Banach theorem, 289
Harsanyi–Selten theory, 254–255
Heath–Sudderth coherence, 220–222, 362–365
Hölder's inequality, 318
horse lottery, 3, 22–25, 35–38, 48, 56, 70–74, 90, 153, 158, 164–175
horse lottery axioms, 172
ignorable statistic, 302
imperfect equilibria, 253, 254
improper prior, 2, 10–12, 212, 217, 218, 288, 289, 353–354, 365–67, 369, 377, 378
improper priors and the transformation of variables technique, 225
incentives, 145
incoherence, 157
incomplete elicitation, 100
Independence (Axiom of), 42, 49, 53, 62, 72, 77, 152, 171
independence assumption, 5
independence of irrelevant alternatives, 36
indifference, 77, 78
infinite regress in game theory, 237, 239
interpersonal utility, 19, 28, 36–37
“Lady Tasting Tea” example, 300
law of the iterated logarithm, 371
law of total probability, 351, 366, 372, 376
Lebesgue density theorem, 333–344
lexicographic utility, 62–63, 66, 87
likelihood principle, 294, 349, 350, 370–371
limiting frequency, 289
linear opinion pool, 182
logarithmic opinion pool, 316, 323–324, 330–331
lotteries, 133, 135, 146, 156, 171
marginalization paradoxes, 223
market, 141
market at equilibrium, 133
market price, 134
martingale convergence theorem, 343, 352
maximin strategy, 270, 289
maximin value, 288
measure completion, 344
merging of opinions, 10
metric completion, 268, 281–282, 287, 290
minimax principle, 8–9, 237–239
minimax strategy, 241, 269–270, 275, 282, 284, 287, 290, 367
minimax theorem, 267–270, 278, 286–287, 290
minimax value, 268, 284
mixed strategies, 268–271, 274, 276, 286–289
mixture set, 62
model for a game, 250–251
multiplayer games, 239–240
mutually absolutely continuous distributions, 336–338, 340–343, 346
Nash equilibrium, 246, 254, 257–259
necessitarian probability, 238
Neyman–Pearson theory, 42, 46
no-stakes condition, 133, 134, 136–141, 143–145
nonautocratic Pareto compromises, 179
non-conglomerability, 11, 12, 203, 224, 267, 268, 273, 274, 354–356, 360, 362, 365
normal form, 253, 261
nuisance factors, 301
null event, 84, 153, 155, 172, 174, 198, 202
null hypothesis, 42
optional stopping, 1, 2, 349, 350, 365, 378
ordering postulate for preferences, 5, 41–42, 46, 49–53, 62, 72, 80–81, 87–89, 91, 152, 171, 177, 198

0521649757 - Rethinking the Foundations of Statistics

Joseph B. Kadane, Mark J. Schervish and Teddy Seidenfeld

Index

[More information](#)

- Pareto principle, 4, 5, 7, 17, 18, 20–23, 26–29, 31–36, 38, 39, 71, 73, 79, 86, 88, 102, 169, 170, 173, 176–178, 180–185, 249
- partial order for preferences, 5, 53–58, 62–63, 66, 71–72, 74, 77, 81, 86–88, 102, 173, 185
- perfect equilibrium, 255–256
- perfect information, 256
- permutation test, 298
- perturbed version of a game, 253
- Pick the Bigger Integer (Wald's) game, 270, 274, 284, 289–290
- pooling operator, 10, 176, 314–319, 323–324, 327–330
- potentially null event, 84, 92–93
- Pratt–Arrow risk-aversion function, 137
- precluded indifference, 113
- precluded preference, 113
- precompact set of strategies, 287
- predictive distribution, 240, 336, 346, 347
- preference, 3–6, 17–39, 40–68
- prevision, 157, 195, 204–205
- principal–agent problem, 307
- Prisoner's Dilemma, 240, 306
- prize–state lotteries, 164–167, 175, 177–180
- promissory notes, 133, 140–142, 146
- proper scoring rules, 138, 241
- pseudo-metric for strategies, 267, 276–277
- pure strategies, 267–270, 284, 286–288
- purely atomic, 318, 324, 327, 329
- purely finitely additive probability, 271, 274, 289
- Radon–Nikodym derivative, 336, 340, 346, 347
- randomization, 9, 293–302, 304, 305, 307–311
- rational group behavior, 184–185
- rationalizable strategies, 247–248
- refined equilibria, 251
- regular conditional distribution, 346
- relevant betting procedures, 222–224
- risk aversion, 139
- robust Bayesian statistics, 69–70
- Robust Pareto principle, 184–185
- Savage's Postulates, 196, 201–204, 208–209
- Savage's sure-thing postulate (P2), 203–204
- scoring rules, 133, 138, 139, 141, 146
- semi-relevant betting procedures, 223
- separable metric space, 347
- separating hyperplanes, 102–103
- sequential choices, 62
- sequential games, 246
- sequential incoherence, 50–53
- sequentially compact, 347
- shared preferences, 169, 170
- significance level of a test, 350, 365, 366, 370, 371, 378
- simple bet, 46
- simple horse lottery, 75
- simple lottery, 74, 171
- Small Worlds, 7, 146, 150, 156, 161–162, 163
- social welfare function, 34
- solution concepts for games, 235, 236
- squared-error loss, 288
- stakes, 134
- state dependent utility, 36, 38, 77, 89–91, 95, 146, 149, 151, 159–160, 164, 166–170, 174–177
- state independent utilities, 6, 7, 27, 38, 74, 76, 90–92, 99, 158–160, 172, 181
- static coherence, 333, 335, 344, 346
- statistical test, 43
- stochastic dominance, 94, 152
- Stone-compactification, 287
- stopping rule, 349, 370
- strong equilibrium, 249
- strong inconsistency from finite additivity, 216–217, 220
- subjective expected (state-dependent) utility, 89
- subjective expected (state-independent) utility, 77
- subjective expected utility thesis, 41
- sufficient statistic, 296
- super-relevant betting strategy, 220, 223, 224
- suppressible information, 296, 298–300, 304
- sure loss, 3
- Tonelli's theorem, 229
- topology, 10
- tracing procedure, 237
- trembling-hands model, 247, 251, 254–256, 258
- two-person, zero-sum game, 238, 268–270
- type-1 error, 43
- type-2 error, 43
- unbounded utility, 82
- uniform distance metric, 337, 345
- uniform-distance topology, 334, 341, 346
- upper and lower probabilities, 23, 60, 61
- utility is linear in money, 133
- utility target set, 85, 93, 94, 110
- value of a game, 270–271, 275, 278, 281–282, 285
- weak dominance, 57, 80
- weak inconsistency, 222
- weak-star topology, 10, 334, 339, 340, 347
- Zorn's lemma, 209
