<i>Preface</i>	xi
1 Introduction	1
Part I: History of the understanding of stratospheric ozone	
2 Stratospheric ozone before 1960	9
3 Chlorinated fluorocarbons	17
4 The Supersonic Transport (SST) debate	23
5 Molina and Rowland: chlorine enters the story	29
6 Too much of a good thing? Crucial data backlog in the Antarctic ozone hole discovery	38
7 Antarctic ozone hole – theories and investigations	53
8 Completing the picture: from AAOE to 1994	66
Part II: Philosophical issues arising from the history	
9 Prediction in science	73
10 The crucial experiment	93
11 Positive and negative evidence in theory selection	122
12 Branches and sub-branches of science: problems at disciplinary boundaries	149
13 Scientific evidence and powerful computers: new problems for philosophers of science?	159
14 The scientific consensus	169
