

INDEX

- adjoint operator 181–184
- affine hyperplane 75–77
- algebra homomorphism 161
- algebra norm 79
- algebraic conjugate 72
- algebraic dual 72
- algebraic embedding 131
- algebraically reflexive 124, 131
- Amir 33, 40, 47
- analytic 219
- ancestor 255
- annihilator 118, 121
- Apollonius' identity 46
- Apostol 101
- approximate eigenvalue 228
- approximate spectrum 228
- Aronszajn and Smith 234
- Ascoli–Arzelà Theorem 208
- associated normed linear space 7
- Axiom of Choice 113, 254

- Bachman and Narici 249
- Baire category 140–152
- Baire space 141
- Baire's Theorem 142
- Banach 11
- Banach algebra 79–170
- Banach limit 121
- Banach space 4
- Banach–Steinhaus Theorem 165
- basis 15
- Basis Problem 17, 214
- Bessel's inequality 54
- best approximation 29, 52, 64
- bilinear mappings 167
- Bishop–Phelps Theorem 136
- Boas 87
- Bonsall and Duncan 186, 225
- Borel–Lebesgue Theorem 24

- bounded variation 107
- Brown and Page 109, 235
- B^* algebra 184
- Cantor's Ternary Set 36, 140
- cardinal number 254
- Cauchy–Schwartz inequality 24, 31, 74
- Cauchy sequence 4
- Cayley transform 195
- chain 252
- Chebyshev polynomials 65
- Clarkson's inequalities 49
- classical Hilbert space 38, 62
- closed graph 157, 178
- Closed Graph Theorem 158
- codimension one 13, 75, 152
- codimension n 90
- commutant 195
- compact 24, 206
- compact normal operator 237–242
- compact operator 206–216, 230–236
- comparable 252
- complemented 197
- complete 4
- complete normed algebra 79
- completion 49, 87, 129–130
- complex linear functional 77
- complex linear space 77
- conjugate mapping 171–180, 226
- conjugate space 72
- continuous linear mapping 9
- continuous spectrum 224
- contraction 194
- contravariant vector 95
- convex functional 2, 120
- convex set 2, 132
- convex hull 132
- coordinate functional 18, 23, 162
- coset 7

- countable 232, 254
- countable orthonormal basis 61
- countably infinite 254
- covariant vector 95
- C* algebra 195

- dense 13, 71, 87, 140
- diagonal operator 86, 210, 227
- dimension 16
- Dini's Theorem 163
- discontinuity 144
- dissipative operator 229
- division algebra 221
- dual space 72, 92–112
- du Bois Reymond Theorem 168

- eigenspace 222
- eigenvalue 222
- eigenvector 222
- Ekeland 132
- Enflo 17, 203, 214
- equicontinuous 208
- equivalent norms 13, 132, 156, 162
- Euclidean space 3, 24–30, 33, 63, 76, 191
- even function 48
- extension 71
- extreme point 48

- factor space 7, 118
- final space 247
- finite dimensional space 16, 24–30, 73, 80–81, 88, 92–94, 12
207, 223, 241
- Finite Dimensional Spectral Theorem 237
- finite rank operator 207
- first category 141
- Fourier coefficients 62
- Fourier series 56–58, 168
- Fredholm integral equation 239, 242
- Fredholm operator 208, 216
- F_G set 148

- functional 13
- functional calculus 243
- gauge 22
- G_δ set 148
- Gelfand and Naimark 184
- Gelfand–Naimark Theorem 189
- general polarisation formula 187
- GM–AM inequality 42
- Gram–Schmidt orthogonalisation 50, 52, 64
- greatest lower bound 253
- Hahn–Banach Theorem 115
- Halmos 60
- Hamel basis 15, 152, 256
- Hamel dimension 61, 27, 257
- hermitian form 30
- hermitian operator 229
- Hilbert sequence space 33
- Hilbert space 33, 94–97, 124
- Hölder inequality 47
- hyperplane 13, 75
- hyperplane of support 89
- inclusion mapping 174
- infimum 253
- infinite 254
- initial space 247
- inner product isomorphism 47, 192
- inner product space 30–45, 74
- integral inner product spaces 35
- invariant metric 2
- invariant subspace 202
- Invariant Subspace Problem 203
- invariant subspace property for compact operators 233
- involution 184
- isometric isomorphism 11, 63, 87, 123
- isometry 11
- isomorphism 12, 87

- James 125, 128
- James characterisation of reflexivity 128, 131, 137
- joint continuity 2, 32, 79, 167
- Jordan and von Neumann 33

- kernel 14

- Laurent series 219
- least upper bound 253
- left regular representation 90, 170
- left shift operator 227
- Legendre polynomials 51, 64
- linear functional 13
- linear homeomorphism 10
- linear operator 13
- linear topological invariants 12
- Liouville's Theorem 219
- Lomonosov's Theorem 234
- lower bound 253
- lower semicontinuous 145

- matrices 68, 80, 182, 184
- maximal element 116, 253
- maximal orthonormal set 58
- Mazur and Ulam 11
- meagre 141
- mean square 57
- metric generated by the norm 2
- Minkowski inequality 31, 43
- minimal element 253
- Moebius transform 195
- monotone 18, 23, 88, 107
- multiplicative 161
- multiplicative inverse 81
- Murray 197

- natural embedding 122–125, 175
- Neumann series 83
- nonreflexive 126
- norm 1
- norm generated by the inner product 31

- norm increasing 179
- normal operator 189
- normalised 109
- normed algebra 79, 184
- normed linear space 2
- normed linear subspace 5
- norming 120
- nowhere dense 140
- nowhere differentiable functions 146
- numerical equivalence 59, 254
- numerical radius 185, 225
- numerical range 185, 224-225

- odd function 48
- open mapping 153
- Open Mapping Theorem 155
- operator 13
- operator algebra 41, 79-86
- orthogonal 38, 41, 197
- orthogonal coefficients 51
- orthogonal complement 198
- orthogonal dimension 60
- orthogonal projection 200
- orthonormal basis 60
- orthonormal set 50, 53
- oscillation 144
