

## Index

---

- Abu-Lughod, Lila 156–157, 161–163  
 admiration 92, 93–94, 96–97  
 affect, as prior to/independent of  
   cognition 228–237  
 affect linking 170–171  
   music and 171  
 affective order 200–202  
 aggression, inter-male 314  
 Ainsworth, Mary 310–311  
*amae* 311  
 amygdala 46, 132–133, 258, 264–265,  
   269, 281, 350–351  
 anger 94, 95, 269, 299, 313–318,  
   344  
 Aristotle 6  
 arousal 168–169, 173, 191–192,  
   197–198, 201–202, 288  
   ergotropic 337  
 attachment 19–20, 125, 128–132, 133,  
   140n10, 309–313  
   adaptive significance of 128–131,  
   140n10  
   in Japan 311–312  
   patterns of 129–131  
 autonomic nervous system 188  
   *see also* sympathetic nervous system,  
   parasympathetic nervous system  
 autonomic-somatic integration theory  
   336–340  
  
*bangga* 78–80, 83–84, 85  
 Bateson, Gregory 43, 49–50, 138n1  
 Belsky, Steinberg, and Draper model  
   125, 133  
 Bengkulu 76  
 biocultural approaches to emotions  
   10–25  
 biogenetic structuralism 330–334,  
   349–350, 351  
 biological determinism/biological  
   reductionism 7–8, 158–159,  
   301–302  
  
 bliss 341, 348  
 body, cognized *see* neurognosis  
   discursive effects on 163–165  
   emotion displays of 84–87; *see also*  
   facial expression  
   plasticity of 11–12, 159–161  
   relationship with self 157–158  
   susceptibility to social control  
   153–155, 163–165, 169  
   traditional approaches to 185  
 Bowlby, John 131–132  
 brain, hemispheric specializations of  
   277–288  
   music processing and 173  
   plasticity of 11–12, 159–161, 164,  
   226, 269–270  
   techniques for research 276–277  
   *see also* cortex; specific brain  
   regions/structures  
 breath, terms for 187–188  
 breathing *see* respiration  
 Buddhist psychology 343, 347–348,  
   354n16  
  
 carbon dioxide, in respiratory cycle  
   189–190  
 chreods 307, 308, 342, 347  
 Clynes, Manfred 167  
 cognized body *see* neurognosis  
 cognized environment 331, 332, 353n4  
 coherence 304–305, 306–308, 312, 313,  
   315–318; *see also* emotion system  
 conscious network 331, 332, 333–334,  
   348  
 consciousness 43, 45–49, 141n14, 186,  
   330–331, 342, 347  
 constructionism 7–10, 156–158,  
   160–161, 225–226, 228, 274,  
   302–304  
 constructivism *see* constructionism  
 contempt 92–94, 95, 96, 98

- cooperation 98–102, 103  
 core emotions 344–345  
 cortex, inferior parietal 267  
   lateral prefrontal 267–268  
   multimodal 266, 270  
   neocortex 222, 260  
   prefrontal 333, 350  
   superior temporal multimodal 267  
 cortical-limbic interactions 223, 225,  
   266–269, 335, 348  
 creative activity 348  
 creodes *see* chreods  
 cultural associations of music 167–168  
 cultural determinism/cultural  
   reductionism 9–10, 51, 274,  
   302–304  
 cultural modulation of respiration  
   196–202  
 cultural relativism *see* constructionism  
 culture 53, 101–102, 103, 105n12,  
   256–257, 259, 269, 270, 283–284,  
   341–342, 343–344  
 culture-bound syndromes 217–218, 350  
  
 D'Andrade, Roy 134  
 depression 53–54, 227, 286–287, 335,  
   344–345  
 determinism, biological 7–8, 158–159,  
   301–302  
   cultural 9–10, 51, 274, 302–304  
 development/developmental trajectories  
   *see* ontogeny; plasticity  
 dialectical landscape of emotions  
   308–309, 312–313, 317  
 discourse, effects on the body 163–165  
   emotions and 161–163  
 discriminanda 230–231  
 disgust 92–93, 95  
 displays of emotions, bodily 84–87; *see*  
   *also* facial expression  
 drumming, trance and 166–167  
 dual embodiment 51–55  
 dualism, in conception/study of  
   emotions 1–2, 43–45, 185–186,  
   215–216, 234, 274–275, 300, 329  
 Durkheim, Emile 202  
 Dusun Baguk 76, 97–98  
  
 effort, mating 118, 125, 128, 130–131  
   parenting 118, 125, 129–131, 141n14  
   reproductive 118, 125–126, 128–131,  
   140n9  
   somatic 118  
 Ekman, Paul 3, 9, 226; *see also* facial  
   expression  
  
 embodiment 13–15, 42, 50, 51–55,  
   63–64, 161–165, 169, 183–187,  
   195–202  
 emotion system 20–25, 306–307,  
   312–313, 315, 317; *see also*  
   coherence  
   diachronic development of 22–24  
 emotions, biocultural approaches to  
   10–25  
   biocultural synergy approach to  
   11–13  
   blending of 91–93  
   cognitive approaches to 6–7, 8  
   componential approach to 15–16  
   content-based approaches to 81–84  
   core 344–345  
   defined/described 182–183, 184,  
   203n4, 216, 334–335  
   developmental systems approach to  
   16–18, 26n5, 304  
   dialectical landscape of 308–309,  
   312–313, 317  
   discourse and 161–163  
   display-based approaches to 84–87  
   displays of 84–87; *see also* facial  
   expression  
   dualism in conception/study of 1–2,  
   43–45, 185–186, 215–216, 234,  
   274–275, 300, 329  
   embodiment approach to 13–15  
   entrainment and 343–345, 346–347,  
   348, 349, 350–351, 352–353  
   evolutionary/ethological approaches  
   to 2–3  
   evolutionary/ethological issues and  
   2–3, 86, 90–91, 95–96, 117–138  
   first-order 96–97, 100  
   functions of 41–42, 63, 78, 88–90,  
   97, 100–102, 129–131, 139n8,  
   164–165  
   history of investigation of 1, 26n1  
   hypercognized/hypocognized 81,  
   227–228, 242, 343–344  
   intentionality and 335  
   James-Lange theory of 4, 196, 228,  
   354n5  
   linguistic terms for 226, 283–285,  
   344–345  
   local biology approach to 18–20  
   music and 166–174  
   Navajo terms for 344–345, 348, 352  
   neural substrates of 44–45, 46,  
   220–225, 257–270, 277–288, 303,  
   335–341, 350–351; *see also* limbic  
   system

## 366 Index

- emotions (*cont.*)  
 neural substrates of, predicts cultural variation 266–270  
 non-verbal communication of 277–283  
 physiological approach to 3–5  
 power and 154–155, 169  
 preconscious information processing and 45–49  
 psychodynamic approaches to 5–6  
 relativist approaches to *see* constructionism  
 respiration and 186, 191–202  
 second-order 96–97, 100–101, 101–102, 103  
 self-attribution theory of 229  
 social relations and 97–104, 161–163, 165, 169, 184–185, 196–202  
 software/hardware metaphors of 218–219, 242–244, 249n25  
 systems theory approach to 15–18  
 traditional approaches to 2–7, 185–186  
 universal aspects of 81–86, 105n11, 217–218, 223, 234–236, 237, 277–290, 345  
 universalistic approaches to 301–302, 329–330  
 variations in 215–218, 223, 234–236, 237, 241–242, 275–276, 289–290, 345  
 verbal communication of 283–285
- empathy 91
- entrainment 17, 331, 343–345, 346–347, 348, 349, 350–351, 352–353  
 emotions and 343–345, 346–347, 348, 349, 350–351, 352–353
- environment, cognized 331, 332, 353n4  
 operational 332–333, 353n4  
 risk and uncertainty in 127, 129–134
- envy 92, 93–94, 96–97
- epigenesis 11–12, 16–17, 160
- epigenetic landscape 45, 307, 308
- ergotropic arousal 337
- ergotropic system 337, 338–340, 341–343
- ergotropic–trophotropic complementarity 338–340
- ergotropic–trophotropic tuning *see* tuning
- essentialism 135, 157–159, 161
- ethnopsychology 274 *see also* constructionism
- ethos and eidos 43
- evolutionary/ethological issues, and emotion 2–3, 86, 90–91, 95–96, 117–138
- facial expression, perception/recognition of emotions in 84–87, 226, 280–283  
 influenced by directionality of script 281–282  
 production of affect in 84–87, 282–283, 345–346
- facial feedback hypothesis 345–346
- feminism 158–159
- fight-or-flight responses 337
- first-order emotions 96–97, 100
- fitness 118–119, 122, 127–128
- Foucault, Michel 153, 163
- Freud, Sigmund 5, 136
- frustration-aggression hypothesis 314–315
- Gage, Phineas 286
- Geertz, Clifford 215–216
- Gelernter, David 170–171
- Gellhorn, Ernst 336–337, 340–341, 346
- genetic envelope 308, 309
- Goodenough, Ward 275
- guilt *see* shame vs. guilt cultures
- Gunto, Samuel 176
- habitus 183–184, 194
- hemispheric specializations of the brain 277–288
- hippocampus 46, 222
- hormones 46, 62
- hostility 60–63
- human nature, as local 135–136
- Husserl, Edmund 329, 353n2
- hypercognized/hypocognized emotions 81, 227–228, 242, 343–344; *see also* Levy, Robert
- hyperventilation 190–191, 192–193, 194, 197–199  
 psychotherapy and 197–198  
 ritual and 198–199
- hypocapnia *see* hyperventilation
- hypothalamus 220
- hypoxia 189–190
- Ilongot 226, 299, 313–318
- inferior parietal cortex 267
- intentionality 333–334, 335
- intentionality, emotions and 335
- internal working models 125–126, 131–132, 133–134; *see also* schemata

- intonation 279  
investment, parental 129–131, 140n8
- James, William 195–196, 334, 354n5  
James–Cannon dispute 3–4, 228–229  
James–Lange theory of emotions 4, 196, 228, 354n5  
Japan 217, 311–312  
Japan, attachment in 311–312
- Kagan, Jerome 235, 304–305
- Lamaze 198  
Langer, Susanne 168, 177n9  
language, neural substrates of 267, 279, 283–286  
Lardil 350  
*latah* 350  
lateral prefrontal cortex 267–268  
Lazarus, Richard 231, 233–236  
levels of analysis 13, 22–24  
Levy, Robert 81, 227–228, 242, 343–344, 354n6  
life history strategies *see* reproductive strategies  
life history theory 117–137, 141n13  
principle of allocation 118  
lifeworld 331–332, 353n2  
*liget* 313–318  
limbic system 12, 44–45, 46, 220, 221, 222–225, 246n8, 256–270, 279, 335, 348, 350–351  
in non-human primates 260–265  
linguistic terms for emotions 226, 283–285, 344–345, 348, 352  
local biology 11, 18–20, 42, 51–53, 65, 135  
Lock, Margaret 274–275  
love 312–313  
low-focus thought 170–171  
Lutz, Catherine 7, 8, 10, 156–157, 159, 161–163, 274
- Machiavellian intelligence hypothesis 90–91, 99, 123  
MacLean, Paul 220–221, 260, 335–336, 340–341  
Malay 76, 350  
*malgri* 350  
*malu* 76–78, 82–83, 84, 94, 95  
rank and 77–78  
*mane* (angry, offended) 94  
mating effort 118, 125, 128, 130–131  
Mauss, Marcel 183–184  
meaning 168–169, 184, 270, 342–343  
Minangkabau 218
- model of mind, capacity for 90–91, 93–94, 98–100, 122–123  
modernism, subject in 157–158  
mood 286–287  
mortality 120–122, 124–126, 138n3, 141n14  
multimodal cortex 266, 270  
music, affect linking and 171  
cultural associations of 167–168  
defined 156  
emotions and 166–174  
neural processing of 173  
power and 169  
religion and 174–175  
musical ineffability 171–172  
Muzak 156  
Navajo 344–345, 348, 351–352  
emotion terms 344–345, 348, 352  
Naven 43  
Neher, Andrew 166–167  
neocortex 222, 260  
neoteny 238–239  
Nesse, Randolph 242–244  
neural substrates of emotion 44–45, 46, 220–225, 257–270, 277–288, 303, 335–341, 350–351; *see also* limbic system  
neural substrates of language 267, 279, 283–286  
neurognosis 331–332, 346–347, 349  
neurotransmitters 57–58, 61–62  
new mammalian (neomammalian) brain *see* neocortex; triune brain model  
non-verbal communication of emotions 277–283
- object relations theory 5–6  
old mammalian (paleomammalian) brain *see* limbic system; triune brain model  
olfaction/olfactory system 263–266  
ontogeny 16, 49–55, 135–136, 238–239, 301–302, 307–308, 309, 312–313, 331–332, 346–347; *see also* plasticity  
operational environment 332–333, 353n4  
optimal development, selection for 123–124, 139n4  
optimality 118–119, 123, 135, 139n4  
overbreathing *see* hyperventilation
- paleomammalian brain *see* limbic system; triune brain model  
Papez, James 220, 223, 229

- parallel distributed processing 333–334, 340–341
- parasympathetic nervous system 338
- parental investment 129–131, 140n8
- parenting effort 118, 125, 129–131, 141n14
- pars triangularis 265
- phantom limb phenomenon 332
- pity 92–94, 96
- plasticity, neural/bodily 11–12, 159–161, 164, 226, 269–270
- phenotypic 122–124, 135  
*see also* ontogeny
- play 240
- postmodernism/poststructuralism 157–158, 275
- power 153–155, 176n2  
bodily aspects of 153–154, 163, 165, 169  
emotions and 154–155, 169  
music and 169
- preconscious information processing, emotions and 45–49
- preferenda 230–231
- prefrontal cortex 333, 350
- pride 80, 83–84, 85; *see also* Protopride
- Pride 84, 85–88, 95–97, 98, 102–104
- primacy of affect problem, the 228–237
- principle of allocation 118
- processualism 304–305, 312, 318–319
- propositional learning 46
- prosody 277–280
- Protopride 88, 89–90, 92–93, 96–97, 102–103; *see also* pride and Pride
- Protoshame 88, 89–90, 92–93, 95, 97, 102–103; *see also* shame and Shame
- psychotherapy 197–198, 241  
respiration and 197–198
- Raffman, Diana 171–172
- rank *see* superiority
- reductionism, biological 7–8, 301–302
- reductionism, cultural 9–10, 302–304
- reproduction, current vs. future 119–122, 124, 125–126, 128–129, 133–134
- reproductive effort 118, 125–126, 128–131, 140n9
- reproductive strategies 118–130, 133–134, 137  
long-term vs. short-term 119–122, 125–126, 128–129, 133–134  
optimal 118–122, 123–124, 126, 128–129, 133–134  
trade-offs in 118–122, 123–129, 133–135, 137
- reptilian brain *see* triune brain model
- resources, allocation of 118–122, 124, 125–130, 137
- respiration 182–202  
anatomy of 188  
cultural modulation of 196–202  
dual control of 186–187, 188  
emotions and 186, 191–202  
Lamaze and 198  
physiology of 189–191  
psychotherapy and 197–198  
yoga and 197
- returning 340, 354n13
- rhythm 194, 200–202  
social relations and 200–202
- risk and uncertainty, in environment 127, 129–134
- ritual 166, 168–169, 196–197, 198–200, 241, 340, 345–346  
respiration and 198–200
- Rosaldo, Michelle 10, 299, 315–316
- Rosaldo, Renato 225, 226
- Schachter, Stanley 229
- schemata, affective and cognitive 125–126, 131–132, 133–134  
hierarchy of 134
