CONTENTS

Volume I

Introduction	ix
Radical rings and products of groups	
B Amberg & Y P Sysak	1
Homogeneous integral table algebras of degrees two, three and four with a faithful element	
Z Arad	20
A polynomial-time theory of black box groups I	
L Babai & R Beals	30
Totally and mutually permutable products of finite groups	
A Ballester-Bolinches, M D Pérez-Ramos & M C Pedraza-Aguilera	65
Ends and algebraic directions of pseudogroups	
A Bisí	69
On locally nilpotent groups with the minimal condition on centralizers	
V Bludov	81
Infinite groups in projective and symplectic geometry	
F Bogomolov & L Katzarkov	85
Non-positive curvature in group theory	
M R Bridson	124
Group-theoretic applications of non-commutative toric geometry	
C J B Brookes	176
Theorems of Kegel-Wielandt type	
A Carocca & R Maier	195
Singly generated radicals associated with varieties of groups	
C Casacuberta, J L Rodríguez & D Scevenels	202
The word problem in groups of cohomological dimension 2	
D J Collins & C F Miller III	211
Polycyclic-by-finite groups: from affine to polynomial structures	
K Dekimpe	219
On groups with rank restrictions on subgroups	
M R Dixon, M J Evans & H Smith	237
On distances of multiplication tables of groups	
A Drápal	248
The Dade conjecture for the McLaughlin group	
G Entz & H Pahlings	253
Automorphism groups of certain non-quasiprimitive almost simple graphs	
X G Fang, G Havas & J Wang	267

Cambridge University Press

978-0-521-65588-0 - Groups St Andrews 1997 in Bath, I

Edited by C. M. Campbell, E. F. Robertson, N. Ruskuc and G. C. Smith

TABLE OF CONTENTS

Subgroups of the upper-triangular matrix group with maximal derived length and a minimal number of generators S P Glasby	275
On p -pronormal subgroups of finite p -soluble groups M Gomez-Fernandez	282
On the system of defining relations and the Schur multiplier of periodic groups generated by finite automata R I Grigorchuk	290
On the dimension of groups acting on buildings J Harlander	318
Dade's conjecture for the simple Higman-Sims group N M Hassan & E Horváth	329
On the F^* -theorem M Hertweck & W Kimmerle	346
Covering numbers for groups M Herzog	353
Characterizing subnormally closed formations M C Hofmann	356
Symmetric words in a free nilpotent group of class 5 W Hołubowski	363
A non-residually finite square of finite groups T Hsu & D T Wise	368

Cambridge University Press

978-0-521-65588-0 - Groups St Andrews 1997 in Bath, I

Edited by C. M. Campbell, E. F. Robertson, N. Ruskuc and G. C. Smith

Table of Contents

[More information](#)**Contents of Volume II**

Introduction	ix
Galois groups through invariant relations	
J A Hulpke	379
Construction of C_{03} . An example of the use of an integrated system for computational group theory	
J A Hulpke & S A Linton	394
Embedding some recursively presented groups	
D L Johnson	410
The Dedekind-Frobenius group determinant: new life in an old problem	
K W Johnson	417
Group characters and π -sharpness	
K W Johnson & E Poimenidou	429
Permutation group algorithms via black box recognition algorithms	
W M Kantor & A Seress	436
Nonabelian tensor products of groups: the commutator connection	
L-C Kappe	447
Simple subalgebras of generalized Witt algebras of characteristic zero	
N Kawamoto	455
Applications of the Baker-Hausdorff formula in the theory of finite p -groups	
E I Khukhro	460
Generalizations of the restricted Burnside problem for groups with automorphisms	
E I Khukhro	474
The Σ^m -conjecture for a class of metabelian groups	
D H Kochloukova	492
Rings with periodic groups of units II	
J Krempa	503
Some free-by-cyclic groups	
I J Leary, G A Niblo & D T Wise	512
The residually weakly primitive geometries of the Suzuki simple group $Sz(8)$	
D Leemans	517
Semigroup identities and Engel groups	
P Longobardi & M Maj	527
Groups whose elements have given orders	
V D Mazurov & W J Shi	532
The Burnside groups and small cancellation theory	
J P McCammond	538
Solvable Engel groups with nilpotent normal closures	
R F Morse	560

Cambridge University Press

CONTENTS OF VOLUME II

Nilpotent injectors in finite groups	
A Neumann	568
Some groups with right Engel elements	
W Nickel	571
The growth of finite subgroups in p -groups	
A Yu Ol'shanskii	579
Symplectic amalgams and extremal subgroups	
C Parker & P Rowley	596
Primitive prime divisor elements in finite classical groups	
C E Praeger	605
On the classification of generalized Hamiltonian groups	
D M Reboli	624
Permutability properties of subgroups	
D J S Robinson	633
When Schreier transversals grow wild	
A Rosenmann	639
Probabilistic group theory	
A Shalev	648
Combinatorial methods: from groups to polynomial algebras	
V Shpilrain	679
Formal languages and the word problem for groups	
I A Stewart & R M Thomas	689
Periodic cohomology and free and proper actions on $\mathbb{R}^n \times S^m$	
O Talelli	701
On modules over group rings of soluble groups of finite rank	
A V Tushev	718
On some series of normal subgroups of the Gupta-Sidki 3-group	
A C Vieira	728
