

## Contents

<b>Acknowledgements</b> .....	xi
<b>Basic notation</b> .....	xii
<b>Introduction</b> .....	1
<b>1. General measure theory</b> .....	<b>7</b>
Some basic notation .....	7
Measures .....	8
Integrals .....	13
Image measures .....	15
Weak convergence .....	18
Approximate identities .....	19
Exercises .....	22
<b>2. Covering and differentiation</b> .....	<b>23</b>
A $5r$ -covering theorem .....	23
Vitali's covering theorem for the Lebesgue measure .....	26
Besicovitch's covering theorem .....	28
Vitali's covering theorem for Radon measures .....	34
Differentiation of measures .....	35
Hardy–Littlewood maximal function .....	40
Measures in infinite dimensional spaces .....	42
Exercises .....	43
<b>3. Invariant measures</b> .....	<b>44</b>
Haar measure .....	44
Uniformly distributed measures .....	45
The orthogonal group .....	46
The Grassmannian of $m$ -planes .....	48
The isometry group .....	52
The affine subspaces .....	53
Exercises .....	53
<b>4. Hausdorff measures and dimension</b> .....	<b>54</b>
Carathéodory's construction .....	54
Hausdorff measures .....	55
Hausdorff dimension .....	58
Generalized Hausdorff measures .....	59
Cantor sets .....	60
Self-similar and related sets .....	65
Limit sets of Möbius groups .....	69

Dynamical systems and Julia sets .....	71
Harmonic measure .....	72
Exercises .....	73
<b>5. Other measures and dimensions .....</b>	<b>75</b>
Spherical measures .....	75
Net measures .....	76
Minkowski dimensions .....	76
Packing dimensions and measures .....	81
Integralgeometric measures .....	86
Exercises .....	88
<b>6. Density theorems for Hausdorff and packing measures ...</b>	<b>89</b>
Density estimates for Hausdorff measures .....	89
A density theorem for spherical measures .....	92
Densities of Radon measures .....	94
Density theorems for packing measures .....	95
Remarks related to densities .....	98
Exercises .....	99
<b>7. Lipschitz maps .....</b>	<b>100</b>
Extension of Lipschitz maps .....	100
Differentiability of Lipschitz maps .....	100
A Sard-type theorem .....	103
Hausdorff measures of level sets .....	104
The lower density of Lipschitz images .....	105
Remarks on Lipschitz maps .....	106
Exercises .....	107
<b>8. Energies, capacities and subsets of finite measure .....</b>	<b>109</b>
Energies .....	109
Capacities and Hausdorff measures .....	110
Frostman's lemma in $\mathbf{R}^n$ .....	112
Dimensions of product sets .....	115
Weighted Hausdorff measures .....	117
Frostman's lemma in compact metric spaces .....	120
Existence of subsets with finite Hausdorff measure .....	121
Exercises .....	124
<b>9. Orthogonal projections .....</b>	<b>126</b>
Lipschitz maps and capacities .....	126
Orthogonal projections, capacities and Hausdorff dimension ...	127
Self-similar sets with overlap .....	134
Brownian motion .....	136
Exercises .....	138
<b>10. Intersections with planes .....</b>	<b>139</b>
Slicing measures with planes .....	139

*Contents*

ix

Plane sections, capacities and Hausdorff measures .....	142
Exercises .....	145
<b>11. Local structure of <math>s</math>-dimensional sets and measures .....</b>	<b>146</b>
Distribution of measures with finite energy .....	146
Conical densities .....	152
Porosity and Hausdorff dimension .....	156
Exercises .....	158
<b>12. The Fourier transform and its applications .....</b>	<b>159</b>
Basic formulas .....	159
The Fourier transform and energies .....	162
Distance sets .....	165
Borel subrings of $\mathbf{R}$ .....	166
Fourier dimension and Salem sets .....	168
Exercises .....	169
<b>13. Intersections of general sets .....</b>	<b>171</b>
Intersection measures and energies .....	171
Hausdorff dimension and capacities of intersections .....	177
Examples and remarks .....	180
Exercises .....	182
<b>14. Tangent measures and densities .....</b>	<b>184</b>
Definitions and examples .....	184
Preliminary results on tangent measures .....	186
Densities and tangent measures .....	189
$s$ -uniform measures .....	191
Marstrand's theorem .....	192
A metric on measures .....	194
Tangent measures to tangent measures are tangent measures ...	196
Proof of Theorem 11.11 .....	198
Remarks .....	200
Exercises .....	200
<b>15. Rectifiable sets and approximate tangent planes .....</b>	<b>202</b>
Two examples .....	202
$m$ -rectifiable sets .....	203
Linear approximation properties .....	205
Rectifiability and measures in cones .....	208
Approximate tangent planes .....	212
Remarks on rectifiability .....	214
Uniform rectifiability .....	215
Exercises .....	218
<b>16. Rectifiability, weak linear approximation and tangent measures .....</b>	<b>220</b>
A lemma on projections of purely unrectifiable sets .....	220

Weak linear approximation, densities and projections .....	222
Rectifiability and tangent measures .....	228
Exercises .....	230
<b>17. Rectifiability and densities .....</b>	<b>231</b>
Structure of $m$ -uniform measures .....	231
Rectifiability and density one .....	240
Preiss's theorem .....	241
Rectifiability and packing measures .....	247
Remarks .....	247
Exercises .....	249
<b>18. Rectifiability and orthogonal projections .....</b>	<b>250</b>
Besicovitch–Federer projection theorem .....	250
Remarks on projections .....	258
Besicovitch sets .....	260
Exercises .....	264
<b>19. Rectifiability and analytic capacity in the complex plane</b>	<b>265</b>
Analytic capacity and removable sets .....	265
Analytic capacity, Riesz capacity and Hausdorff measures .....	267
Cauchy transforms of complex measures .....	269
Cauchy transforms and tangent measures .....	273
Analytic capacity and rectifiability .....	275
Various remarks .....	276
Exercises .....	279
<b>20. Rectifiability and singular integrals .....</b>	<b>281</b>
Basic singular integrals .....	281
Symmetric measures .....	283
Existence of principal values and tangent measures .....	284
Symmetric measures with density bounds .....	285
Existence of principal values implies rectifiability .....	288
$L^p$ -boundedness and weak $(1, 1)$ inequalities .....	289
A duality method for weak $(1, 1)$ .....	292
A smoothing of singular integral operators .....	295
Kolmogorov's inequality .....	298
Cotlar's inequality .....	299
A weak $(1, 1)$ inequality for complex measures .....	301
Rectifiability implies existence of principal values .....	301
Exercises .....	304
<b>References .....</b>	<b>305</b>
<b>List of notation .....</b>	<b>334</b>
<b>Index of terminology .....</b>	<b>337</b>
