### **The Archaeology of Islam in Sub-Saharan Africa**

This book is the first comprehensive study of the impact of Islam in sub-Saharan Africa. Timothy Insoll charts the historical background as well as the archaeological evidence attesting to the spread of Islam across the Sudan, Ethiopia, Eastern Africa, Southern Africa and Nigeria, surveying a time span from the immediate pre-Islamic period through to the present. He also analyses in detail the syncretism which has occurred between Islam and African traditional religions, and looks at the processes – *jihad*, trade, missionary activity, prestige – by which Islam spread. This book will be of great relevance to scholars and students, as well as to all those interested in Africa, archaeology, religion and Islam.

TIMOTHY INSOLL is Lecturer in Archaeology at the School of Art History and Archaeology of the University of Manchester. His previous publications include *Islam, Archaeology and History: The Gao Region, Mali* (1996), *The Archaeology of Islam* (1999), *Urbanism Archaeology and Trade* (2000) and *Archaeology and World Religion* (2001).

The Cambridge World Archaeology series is addressed to students and professional archaeologists, and to academics in related disciplines. Most volumes present a survey of the archaeology of a region of the world, providing an up-to-date account of research and integrating recent findings with new concerns of interpretation. While the focus is on a specific region, broader cultural trends are discussed and the implications of regional findings for cross-cultural interpretations considered. The authors also bring anthropological and historical expertise to bear on archaeological problems and show how both new data and changing intellectual trends in archaeology shape inferences about the past. More recently, the series has expanded to include thematic volumes.

## ACKNOWLEDGEMENTS

Various people have assisted me in writing this volume, and a debt of gratitude is owed to the following, but above all to my wife Rachel and my daughter Freya, for their patience in allowing me to absent myself from long periods of family life. Numerous colleagues have also been of assistance, and many thanks are extended to the following: to Paul Lane for kindly copying photos from the archive of the British Institute in Eastern Africa, Peter Robertshaw for answering various bead-related queries, and David Phillipson for kindly supplying illustrations. Eric Ross is also gratefully acknowledged for providing a copy of a paper in advance of publication, as are Detlef Gronenborn, Richard Helms, Randi Haaland and Adria LaViolette. Anne Haour must also be thanked for providing an extremely useful annotated bibliography and photocopies of otherwise unobtainable articles. John Sutton also kindly provided copies of hard-to-obtain references.

Similarly, I am grateful to Patrick Darling for providing copies of his unpublished conference papers, Detlef Gronenborn for providing offprints, Derek Welsby, John Alexander and David Edwards for answering queries on the Sudan, as well as Pam Rose and Pierre de Maret for supplying obscure references. A special vote of thanks is also due to Peter Shinnie for providing me with several envelopes of photographs from his own archives, his generosity has been exceptional. Pamela Insoll and Rachel MacLean are also thanked for their assistance with some of the illustrations, as are likewise the staff of the Gten Photographic Unit in the University of Manchester, Derek Trillo, Anne Perrott and Michael Pollard. The Egypt Exploration Society is thanked for allowing access under the auspices of John Alexander to the Qasr Ibrim archive in Cambridge, and the staff of the Griffith Institute in Oxford are also thanked for helping me to find the Newbold Archive. Finally, a grateful acknowledgement is also due to the Series Editor, Norman Yoffee, and the two anonymous readers of the manuscript who pointed out its many shortfalls and steered the volume back on course. All remaining errors and shortfalls are obviously my own.

Funding for parts of the research which form the basis of this volume was provided by St John's College, Cambridge, the British Institute in Eastern Africa, the McDonald Institute, Cambridge, the British Academy and the University of Manchester. I am most grateful for the assistance provided. The officers of the British Institute in Eastern Africa, especially John Sutton, the former director,

must also be thanked for providing a hospitable base in which some of the library work was completed. Finally, I am most grateful to His Highness Shaikh Salman bin Hamad al-Khalifa, the Crown Prince of Bahrain, for arranging the funding for the period of research leave in which this volume was completed – a period during which I also tried to juggle the excavation of parts of Bahrain, hopefully not too unsuccessfully.

Every effort has been made to trace copyright holders. The author and publisher would like to apologise in advance for any inadvertent use of copyright material, and thank the following individuals and organisations who have kindly given their permission to reproduce copyright material.
