Foreword xiii

Preface xv

Acknowledgments xvii

Introduction xix

Chapter 1: Why You Should Learn Java
History and Overview of Java 3
The Popularity of Java 5
What Makes Java Different? 5
Java Is Simple 6
Java Is Object-Oriented 6
Java Is Portable 7
Will Java Replace COBOL? 10
The Goal of This Book 13
Summary of Key Points 16
Glossary 17
Bibliography 19

Chapter 2:
An Introduction to Object-Oriented Programming 21
History of OO 22
Objects 24
Classes 25

Table of Contents
More information

Diagramming Classes and Instances 26
Inheritance 30
Class Relationships 34
Aggregation 34
Association 37
Object Communication 38
Polymorphism 41
Dynamic Binding 41
Summary of Key Points 43
Glossary 45
Bibliography 47

Chapter 3: Java Structure 49
A Class Program 50
Java Column Restrictions 55
Writing Comments in Java 55
Naming Rules and Conventions 57
Creating Instances 58
Invoking Methods 61
Working With Subclasses 66
Summary of Key Points 72
Glossary 74

Chapter 4: Defining Data 77
COBOL Picture Clause 78
Defining Java Variables 79
Writing Java Literals 81
The Scope of Variables 82
Defining Java Constants 83
String Variables 83

Table of Contents
More information

Changing Variable Types 87
Variables for Community National Bank 89
Summary of Key Points 91
Glossary 93

Chapter 5: Computation 95
Exceptions 96
Custom Exception Classes 100
A Review of Primitive Data Types 105
Wrapper Classes 106
Arithmetic Operators 110
The Math Class 112
The NumberFormat Class 116
Summary of Key Points 120
Glossary 121

Chapter 6: Decision Making 123
The If Statement 125
Using the ELSE Clause 127
Nested IF Statements 129
Writing Compound Conditions 130
Java's Conditional Operator 130
Condition Names 131
Computing the Service Charge with if Statements 132
Case Structure: COBOL EVALUATE & Java switch 136
Computing the Service Charge Using switch 137
Summary of Key Points 141
Glossary 144

Chapter 7: Loops 145
The Loop Structure 146

Table of Contents
More information

The COBOL PERFORM Statement 147
The Java while Statement 148
The Java do Statement 152
The Java for Statement 155
Nested Loops 158
Java break and continue Statements 160
Producing a Loan Amortization Schedule 161
Summary of Key Points 165
Glossary 166

Chapter 8: Arrays 167
Declaring One-Dimensional Arrays 168
Populating One-Dimensional Arrays 171
Creating String Arrays 173
Declaring Two-Dimensional Arrays 176
Populating Two-Dimensional Arrays 178
Passing Arrays as Arguments 182
Searching Arrays 183
Summary of Key Points 188
Glossary 189

Chapter 9: Data Access 191
Java's I-O Class Library (java.io) 192
Object Persistence 193
Sequential File I-O 194
Database Access 200
Object Serialization 207
Network Access 212
Summary of Key Points 214
Glossary 215

Table of Contents
More information

Chapter 10: Graphical User Interfaces 217
Java's Abstract Windowing Toolkit 218
Event-driven Programming 218
Displaying & Closing a Window 220
Adding a Button to a Window 225
Adding Labels, TextFields, and Panels to a Window 231
Creating Pull-Down Menus 239
Writing Applets 243
Summary of Key Points 246
Glossary 248

Chapter 11: Object-Oriented Development Issues 249
Developing OO Systems 250
OO Methodologies 251
OO Analysis 252
OO Design 254
Three-Tier Design 256
Architecture Issues 266
Performance Issues 268
Summary of Key Points 270
Glossary 271
Bibliography 273

Appendix: Programs on the CD-ROM 275

Glossary 344
