

Index

Note: This index concentrates on legal issues as decided by the relevant judicial or quasi-judicial body. Facts, summaries (except where they are the only record in this volume) and parties' arguments are very lightly indexed concentrating on points necessary to an understanding of the legal argument. Material relating to treaties and treaty interpretation is usually indexed by concept. For entries by article, readers should consult the Table of Treaties.

References to the EEC/EC Treaty are to the Treaty of Rome (1957) as amended *inter alia* by the Single European Act (1986), the Treaty of Maastricht (1992) and the Treaty of Amsterdam (1997). Numbers in square brackets represent the article number as it currently stands.
