Contents

Preface *page* ix

I Introduction and main assumptions **1**

1 Introduction **3**
1.1 The aim of the book 3
1.2 Channels for a monetary impact on natural production 4
1.3 Assumptions regarding the wage formation 7
1.4 Microeconomic foundation 8
1.5 The structure of the book 9

2 The literature **11**
2.1 Introduction 11
2.2 The view of monetary neutrality 12
2.3 The impact on natural unemployment of inflation 15
2.4 The impact on natural unemployment of monetary regimes 23
2.5 The empirical evidence 23
2.6 Summary and conclusion 34

3 The wage formation process **36**
3.1 Introduction 36
3.2 Basic assumptions 37
3.3 Trade union wage setting 43
3.4 Individual monopoly wage setting 50
3.5 Optimisation of consumption and leisure 56
3.6 The firm’s wage setting 57
3.7 A general preference function 60
3.8 Model modifications 64
3.9 Summary and conclusion 65

II The impact of monetary policy and inflation 67

4 Imperfect integration of securities markets 69
4.1 Introduction 69
4.2 Explanations of imperfect financial integration 70
4.3 Model specification 74
4.4 Determination of natural production 89
4.5 Policy implications 96
4.6 Summary and conclusion 101

5 Monopolistic competition in bank markets 102
5.1 Introduction 102
5.2 The literature 103
5.3 Model specification 105
5.4 Determination of natural production 113
5.5 Policy implications 121
5.6 Other channels for an impact of bank deposits on bank lending 125
5.7 Summary and conclusion 127

6 Utility from securities holdings 128
6.1 Introduction 128
6.2 The substitution between money and securities 129
6.3 Model specification 131
6.4 Determination of natural production 136
6.5 Policy implications 140
6.6 Summary and conclusion 142

7 Hysteresis effects from monetary policy 143
7.1 Introduction 143
7.2 Hysteresis arising from capital accumulation 144
7.3 Other sources of hysteresis 155
7.4 Summary and conclusion 158

8 The impact of inflation on bank earnings 160
8.1 Introduction 160
8.2 The theoretical framework 160
8.3 The impact of real bank earnings on the real economy 164
8.4 Empirical evidence 166
8.5 Summary and conclusion 167

III The impact of monetary regimes **169**

9 Centralised wage formation **171**
9.1 Introduction 171
9.2 The impact of inflation on the demand for goods 172
9.3 Model specification 174
9.4 Determination of natural production 177
9.5 Policy implications 180
9.6 Summary and conclusion 181

10 Fiscal policy **183**
10.1 Introduction 183
10.2 The literature 185
10.3 Model specification 186
10.4 Determination of natural production and inflation 191
10.5 Policy implications 198
10.6 The relationship between production and inflation 201
10.7 Summary and conclusion 202

11 Price stability goal **203**
11.1 Introduction 203
11.2 Model specification 204
11.3 Determination of natural production 206
11.4 Policy implications 209
11.5 Summary and conclusion 210

12 Uncertainty concerning policy formation **212**
12.1 Introduction 212
12.2 Policy uncertainty affected by inflation 213
12.3 Model specification 214
12.4 Determination of natural production 217
12.5 Policy implications 219
12.6 Summary and conclusion 223

13 Policy uncertainty in a fixed-but-adjustable exchange rate regime **225**
13.1 Introduction 225
13.2 Uncertainty regarding exchange rate adjustments 227
13.3 Model specification 228
13.4 Determination of equilibrium production 231
13.5 The dynamic adjustment 235
13.6 Policy implications 235
13.7 Summary and conclusion 238

14 The impact of uncertainty on wage setting **240**
14.1 Introduction 240
14.2 Model specification 241
14.3 Determination of natural production 244
14.4 Policy implications 247
14.5 Summary and conclusion 248

IV Policy implications **251**

15 Policy implications of monetary non-neutrality **253**
15.1 Introduction 253
15.2 Money affects real activity 254
15.3 The optimal inflation rate 256
15.4 Should exchange rates be fixed? 257
15.5 Does an independent central bank increase welfare? 258

Appendix: Microeconomic foundations **260**
A.1 Introduction 260
A.2 The firm's profit optimisation 261
A.3 The household's optimisation 262
A.4 The government 270
A.5 Foreign position 272
A.6 Domestic demand 273
A.7 Goods market equilibrium 276
A.8 Short-term dynamics 278
A.9 Bank deposits 281
A.10 The securities markets 283
A.11 Summary and conclusion 284
