Contents

<i>Preface</i>	<i>page</i> ix
<i>Acknowledgments</i>	x
<i>Introduction</i>	1
<i>Notation</i>	8
1 Arbitrary polynomials over an arbitrary field	12
1.1 Lüroth's theorem	12
1.2 Theorems of Gordan and E. Noether	15
1.3 Ritt's first theorem	18
1.4 Ritt's second theorem	24
1.5 Connection between reducibility and decomposability. The case of two variables	52
1.6 Kronecker's theorems on factorization of polynomials	58
1.7 Connection between reducibility and decomposability. The case of more than two variables	63
1.8 Some auxiliary results	71
1.9 A connection between irreducibility of a polynomial and of its substitution value after a specialization of some of the variables	75
1.10 A polytope and a matrix associated with a polynomial	88
2 Lacunary polynomials over an arbitrary field	92
2.1 Theorems of Capelli and Kneser	92
2.2 Applications to polynomials in many variables	103
2.3 An extension of a theorem of Gourin	110
2.4 Reducibility of polynomials in many variables, that are trinomials with respect to one of them	122
2.5 Reducibility of quadrimomials in many variables	167
2.6 The number of terms of a power of a polynomial	186

3	Polynomials over an algebraically closed field	201
3.1	A theorem of E. Noether	201
3.2	Theorems of Ruppert	204
3.3	Salomon's and Bertini's theorems on reducibility	215
3.4	The Mahler measure of polynomials over \mathbb{C}	222
4	Polynomials over a finitely generated field	263
4.1	A refinement of Gourin's theorem	263
4.2	A lower bound for the Mahler measure of a polynomial over \mathbb{Z}	271
4.3	The greatest common divisor of $KP(x^{n_1}, \dots, x^{n_k})$ and $KQ(x^{n_1}, \dots, x^{n_k})$	277
4.4	Hilbert's irreducibility theorem	298
5	Polynomials over a number field	315
5.1	Introduction	315
5.2	The classes $\mathcal{C}_i(\mathbf{K}, r, 1)$	319
5.3	Families of diagonal ternary quadratic forms each isotropic over \mathbf{K}	325
5.4	The class $\mathcal{C}_1(\mathbf{K}, r, 2)$	331
5.5	The class $\mathcal{C}_i(\mathbf{K}, r, 2)$ for $i \neq 1$	339
5.6	The class $\mathcal{C}_0(\mathbf{K}, r, s)$ for arbitrary s	355
5.7	The class $\mathcal{C}_1(\mathbf{K}, r, s)$ for arbitrary s	369
5.8	The class $\mathcal{C}_2(\mathbf{K}, r, s)$ for arbitrary s	375
5.9	A digression on kernels of lacunary polynomials	382
6	Polynomials over a Kroneckerian field	390
6.1	The Mahler measure of non-self-inversive polynomials	390
6.2	Non-self-inversive factors of a lacunary polynomial	420
6.3	Self-inversive factors of lacunary polynomials	435
6.4	The generalized Brauers–Hopf problem	473
	<i>Appendices</i>	481
	Appendix A. Algebraic functions of one variable	481
	Appendix B. Elimination theory	492
	Appendix C. Permutation groups and abstract groups	495
	Appendix D. Diophantine equations	498
	Appendix E. Matrices and lattices	499
	Appendix F. Finite fields and congruences	503
	Appendix G. Analysis	505
	Appendix I. Inequalities	508
	Appendix J. Distribution of primes	510
	Appendix K. Convexity	512
	Appendix by Umberto Zannier. Proof of Conjecture 1	517

Preface

It is my pleasant duty to thank here for all the help I received in the preparation of this book.

Colin Day, Director of the University of Michigan Press has permitted me to reuse material from my book *Selected Topics on Polynomials* published by the Press in question.

Professors Francesco Amoroso, David W. Boyd, Pierre Dèbes, Kálmán Győry, Gerhard Turnwald and Umberto Zannier have on my request read parts of the book, corrected mistakes and suggested many improvements. Chapter 1, Sections 1–3 of Chapter 3 and Section 9 of Chapter 5 have been read by U. Zannier. He has also written a very important appendix ‘Proof of Conjecture 1’. Chapter 2 has been read by G. Turnwald, who has also made most useful comments on Appendix A. Section 4 of Chapter 3 has been read by D.W. Boyd, Sections 1, 2, 3 of Chapter 4 by F. Amoroso, Section 4 of Chapter 5 and Sections 1–8 of Chapter 5 by P. Dèbes, finally Chapter 6 by K. Győry. In addition the whole book has been generously proofread by Jadwiga Lewkowicz and Andrzej Mąkowski, and the beginning of Chapter 1 by Andrzej Kondracki. I have also profited by advice from Dr. Michael Zieve concerning Section 5 of Chapter 4, from Professors Dieter Geyer, David Masser and Peter Roquette concerning Section 4 of Chapter 4 and from Professors Zbigniew Ciesielski, Piotr Mankiewicz, Aleksander Pełczyński and Dr. Marcin Kuczma concerning Appendix G.

The typing was patiently done in the Institute of Mathematics of the Polish Academy of Sciences by Joanna Zemła, Katarzyna Szynekiewicz and Anna Poczmańska with the help of Dr. Jan Kowalski.

In the first stage of the work on the book I was supported by grant PB 500/2/91 from the Polish Committee for Scientific Research.

Andrzej Schinzel
