- Cartan–Killing classification of simple Lie algebras over \mathbb{C} , 308
- Cartan–Killing form, 309
- Cartan subgroup for $SL(n)$, 77
- character formula
 - for discrete series representations of $SL(2, \mathbb{R})$, 200
 - for principal and supplementary series representations, 73
 - for principal series representations of $SL(n)$, 96
 - of $SL(2, \mathbb{C})$, 73
- character
 - of finite-dimensional representations, 18
 - of irreducible representation, as a distribution, 128; relation to infinitesimal equivalence, 129
 - of a locally compact abelian group, 10
 - of principal series representations, 96; as Fourier transforms of orbital integrals, 93
 - of \mathbb{R}^n , 6
 - of \mathbb{T}^n , 5
- class function, 18
- cocycles, 58
- complete reducibility
 - of representations of a compact group, 20
 - of rational representations of $SL(n, \mathbb{C})$, 49
- completeness theorem
 - for compact groups, 21
 - for \mathcal{C}_{inv} , 272
 - for $\mathcal{C}(SL(2, \mathbb{R}))$, 281
- cuspidal forms, 282
- degenerate series of representations, 71
- differentiable vectors for a representation, 106
- differential operators on Lie groups, 101, 305
- discrete series representations, 188
 - formal degree of, 188, 192
 - of $SL(2, \mathbb{R})$, 189
- discriminant of $U(n)$, 25
- distributions
 - differentiation of, 297
 - on manifolds, 298
 - on \mathbb{R}^n , 296
 - supports of, 298
 - with unipotent supports on $SL(2, \mathbb{R})$, 217; transversal order of, 218
- dual group of a locally compact abelian group, 10
- dual measure to Haar measure on a locally compact abelian group, 12
- duality theorem of Pontrjagin–van Kampen, 11
- eigendistributions on $SL(2, \mathbb{R})$, 208
- factor, 299
- factor representation of a locally compact group, 65
- Flag, 69
 - full, 69
 - full isotropic, 70
 - isotropic, 70
 - of type (d_j) , 69
- formal adjoint on the universal enveloping algebra, 120
- formal transpose
 - of differential operators, 307
 - on the universal enveloping algebra, 120
- Fourier series
 - of a differentiable vector, 109
 - of a function on a compact group, 23
- Fourier transform

- of a function on \mathbb{R}^n , 6
- of a function on \mathbb{T}^n , 5
- of a tempered distribution on \mathbb{R}^n , 9, 299
- Fréchet space, 291
- Frobenius reciprocity, 62
- functional equation of type (m, n) , 225, 244
- functions of type (m, n) on $SL(2, \mathbb{R})$, 221
- fundamental theorem of Lie, 306
- (\mathfrak{g}, K) -modules, 112
 - finite multiplicity theorem for, 114
 - Harish-Chandra finiteness theorem for, 113
 - infinitesimal character of, 113
 - infinitesimal equivalence of, 122
 - unitary, 121
- Haar measure, 301
 - left, 301
 - right, 301
- Harish-Chandra
 - density theorem of, for analytic vectors, 109
 - finiteness theorem of, for (\mathfrak{g}, K) -modules, 113
 - matching conditions of, for invariant eigendistributions on $SL(2, \mathbb{R})$, 214
 - regularity theorem for invariant eigendistributions on $SL(2, \mathbb{R})$, 215–20
 - subquotient theorem, 118
- Harish-Chandra module, 115
- Harish-Chandra transform
 - on \mathcal{C}_m , 242
 - on $\mathcal{C}(SL(2, \mathbb{R}))$, 277
 - of a tempered distribution on $SL(2, \mathbb{R})$, 285
- highest weight,
 - integrality criterion for, 47
 - of a representation of a compact Lie group, 30
 - of a representation of a semisimple Lie algebra, 46
- imprimitivity theorem, 60
- induced representation, 58
- infinitesimal character, 113
- integrable representations of $SL(2, \mathbb{R})$, 193
- integration formula
 - for Lie algebra of $SL(n, \mathbb{C})$, 161
 - for $SL(2, \mathbb{R})$, 175
 - for $SL(n)$, 95
- integration on manifolds, 306
- invariant Harish-Chandra transform,
 - characterization of, 288
 - of invariant tempered distribution on $SL(2, \mathbb{R})$, 289
 - on Schwartz space of $SL(2, \mathbb{R})$, 285
- inversion formula
 - for locally compact abelian groups, 11
 - for \mathbb{R}^n , 8
- Iwasawa decomposition for $SL(n)$, 76, 81
- jump relations of Harish-Chandra for orbital integrals
 - for compactly supported smooth functions on $SL(2, \mathbb{R})$, 185
 - for functions on Schwartz space of $SL(2, \mathbb{R})$, 268
- K -finite vectors of a representation, 108
- lattice in a locally compact abelian group, 11
- Lie algebra
 - of a Lie group, 302
 - over a field, 302
- Lie group, 302
- limit formula
 - for Lie algebra of $SL(n, \mathbb{C})$, 163
 - for $SL(n, \mathbb{C})$, 165
 - for $SL(2, \mathbb{R})$, 185; on the Schwartz space, 268
 - for $U(n)$, 33
- limits of discrete series of representations of $SL(2, \mathbb{R})$, 201
- locally convex space, 291
- Maass–Selberg relations, 248
- matrix elements
 - of representations of compact groups, 19
 - of representations of Lie group, 123
- Mellin transform, 15
- mock discrete series for $SL(2, \mathbb{R})$, 193
- Mumford’s conjecture, 3
- norm topology for operators, 299
- Ω -finite eigendistributions on $SL(2, \mathbb{R})$, 208
- operators
 - of Hilbert–Schmidt class, 295
 - integral, 296
 - summable, 296
 - of trace class, 295
- orbital integral
 - on Lie algebra of $SL(2, \mathbb{R})$, 170, 174
 - on Lie algebra of $SL(n, \mathbb{C})$, 159
 - on Schwartz space, 265, 267
 - on $SL(2, \mathbb{R})$, 170, 175
 - on $SL(n, \mathbb{C})$, 165
 - on $U(n)$, 32
- orthogonality relations
 - for characters of compact groups, 19
 - for matrix elements of compact groups, 19
 - for matrix elements of discrete series, 188
