# Index

acrimony: as determinant in legal outcomes, 8–9; in nuisance cases, 311–12; spiteful behavior with conditions of, 25–6
anchoring: anchoring effect, 267–8, 274–5; explained, 331; probability judgments based on, 5
antipaternalism and paternalism, 46–7, 49
Argyris, Chris, 161
Arlen, Jennifer, 145
availability cascades: civil actions to deter, 388; generation and effect of, 9, 374, 381; informational and reputational cascades under, 374–5, 383–6; problems raised by, 387–8; public and private aspects of, 382–3; role of courts in preventing, 392–3; vulnerability of Congress to, 389–90; vulnerability of judges to, 394
availability heuristic: as element of individual judgment and perception, 374; exploitation of, 37–8; judges’ reliance on, 394; as mental shortcut, 381; predictability of, 15 See also availability cascades; biases; errors
bargaining: obstacles in nuisance cases to, 310–17; post-judgment outcome, 27; post-trial, 28; reinterpretation using self-serving bias, 363–5; transaction costs as obstacles to, 30, 320; ultimatum game as example of bounded self-interest, 21–6 See also negotiations
bargaining impasse: in negotiations, 355; self-serving bias as cause of, 355, 365–6
Baron, Jonathan, 170–1
Bazerman, Max, 148–50
Becker, Gary S., 14, 17
behavior: influence of market forces on, 19; norms governing, 26; predictions about post-trial events, 28–9; spiteful, 25–6; unrealistic optimism as adaptive, 292–3
behavior, organizational: failure of rationality in, 158–9; rationality of, 144–6; role of belief systems in, 146–53
behavioral economics: argument for, 50–1; in economic analysis of the law, 50–1; insight into estimation of risk, 291
belief systems: effect of overoptimism on company’s, 149–50; fixed organizational, 154; of institutions, 146–7; self-serving beliefs, 151–2
biases: adaptive, 155–7; based on aversion to extremes, 3–4; based on overoptimism, 158; in cognitive theory, 327, 400; in commitment, 151; in corporate decision making, 146–58; hindsight bias, 4; in hypothetical decisions to vaccinate, 168–85; legal implications of, 157–8; omission bias, 168–71; optimistic bias, 4; in people’s thinking, 398–9; persistence of, 153–7; sources and persistence of, 146–57 See also

biases (cont.)
  hindsight bias; self-serving bias; status quo bias

Bodin, Jean, 191

bracket creep, 413–17

Breyer, Stephen, 48

Brun, W., 171

Bryant v. Leftover, 302

Burgelman, Robert, 145

business judgment rule: justification for, 109–10; meaning of, 109; source and development of, 110–11

buyers: in experiments about reluctance to buy and sell, 222–3; in experiments for consumption goods markets, 216–20; in experiments for induced value token markets, 214–16; in experiment to test for misrepresentation of value, 221–2; valuation of entitlements, 211–13; valuation of induced value tokens, 213

Calabresi, Guido, 302–3

Camerer, Colin, 368

Cantril, Hadley, 356–7

Carney, William, 145

choices: of default rules in contract theory-8, 137; difference of actual from rational choice, 15; different, 1–2; evaluation under endowment effect, 261–2; between omission or commission, 169–70; with options, 3–4; preference of inaction over action, 132; small steps as, 201–3; value maximization in, 61 See also preferences; rational choice theory

Coase, Ronald H., 2, 302

Coase Theorem: assignment of legal entitlement under, 5–6, 17–18, 27, 116; experiments to test, 18–19; property rights in, 223; resource allocation under, 5–6, 17–18, 116, 211, 223; statement of, 116; valuation under, 261

coding: in evaluation of an outcome, 330

cognitive decision theory: about use of probability estimates, 331–2; elements of, 261; ex ante selling price, 262; ex post making whole concept, 262; outcome of first survey, 263–70; outcome of second survey, 270–6; policy implications of, 336–42; cognitive-dissonance theory, 151; cognitive psychology, 398; cognitive theory: analysis of nonindexing, 414–15; analysis of Tax Reform Act (1986), 415–16; cognitive pathologies in, 327; components of, 400; of hindsight bias, 97; relevance to tax system, 400, 419–20; commensurability concept, 285; commissions and omissions, 169–71; compromise effects: with aversion to extremes, 3–4; choices, 61–2; experimental tests of, 62–6, 77–84; in options choices, 61–2; tests in legal decisions, 62–6; conservatism, cognitive, 147–9; consumer sovereignty concept, 47–8; context-dependence: in legal decision making, 71–3; response to context-dependent decision making, 73–6; context-independence: compromise and contrast effects as violation of, 61–2; as consequence of value maximization, 61; in tests of compromise effect, 63–6, 77–84; in tests of contrast effect, 68–71, 84–7; contract default rules: importance of, 137–8; nonenforcement, 141–2; tailored, 141–2; in traditional law and economics analysis, 137–38; contract law: nonenforcement default rules, 141–2; contract negotiation: with application of rational choice theory, 118; effect of network benefits, 127–9; experiments related to subjects’ perception of status quo, 120–5; experiments to test for preferences in, 118–25; inertia theory in, 125–36; in traditional law and economics analysis, 117–18; contract terms: effect of status quo bias on, 119–25; network benefits of, 128; contract terms, mandatory: behavioral analysis account of, 30–32; law and
Index

- economics claim related to, 29–30
- contrast effect: choices, 61–2;
  experimental tests of, 66–71, 84–7; in option choices, 61–2
- control: illusion of, 149–50
- corporate governance: liability standards for, 109–11
- cost-benefit analysis: as check on availability campaigns, 390
- costs: of error and decision, 191; of redistribution through legal rules, 288
- Cox, James C., 368
- Craswell, Richard, 29–30
- cultures, organizational: adaptation of optimistic, 156

- damages: as center of tort theory, 260; golden rule related to arguments about, 267; for pain and suffering, 260
- data: for tests of compromise and contrast effects, 71–3
- debiasing techniques: to avoid hindsight bias, 98, 103–4; in jury instructions, 39; in patent court, 39
- decision making: biases in hypothetical decisions about vaccinations, 168–85; bounded rationality in, 16; business organizations, 146–58; context-dependence in legal, 71–3; contract effect in legal, 62, 66–71; information provided by government, 42–3; overoptimism, 149–50; research related to actual, 15; response to context-dependent, 73–6; self-control in private, 200; tests of ambiguity effect on, 171–85; using heuristic devices and biases, 3–5
- decisions: case-based, 5; costs of, 190–1; delegated, 193–7; hindsight bias in legal, 99–103; rational expectations in decision theory, 328–9; temporal differences in imposition of burdens of, 188, 192–3; timing of planning decisions, 191 See also delegation of decisions
- decisions, second-order: in actuality, 205; choices among strategies in, 187–8; circumstances for making, 190–3; High-High, 203–5; private, 200; small steps, 201–3; strategies that reduce burden (High-Low), 188, 197–200, 203–5; strategy imposing burden on someone else (Low-High), 188, 193–7, 203–5; strategy of minimal burden (Low-Low), 188, 201–5; taxonomy of, 188–90
- default rules. See contract default rules.
- delegation: of authority, 194; factors influencing decision for, 193–5; as second-order strategy, 193–7
- delegation of decisions: choice not to delegate, 199–200; complications arising from, 196–7; delegator power in, 196–7; intrapersonal, 197; picking as, 201–3; rationale for and timing of, 194–6
- demand for law: availability heuristic and social influences, 9; based on bounded self-interest, 32; cooperation, fairness, spite, and homo reciprocans, 8–9; self-serving bias, 8
democracy, majority-rule: instability property of, 337; positive responsiveness, 336–42
deterrence: of criminal behavior, 45–6
- Dorner, Dietrich, 202–3

- economic theory: analysis of deterring criminal behavior, 45–6; parsimony of conventional, 20–1; prediction about behavior in ultimatum game, 21–2; predictions about post-trial events, 28–9; redistributive legal rules and taxes in neoclassical, 298 See also behavioral economics; law and economics
- Eisenberg, Theodore, 367
- Ellsberg, Daniel, 171
- endowment effect: choices between goods, 225–9; in cognitive decision theory, 261; conditions for likelihood of, 27; constituent elements of, 261–2; created by legal entitlement, 6; defined, 19, 213; experiment in bilateral bargaining, 223–5; factors influencing, 222; perception of entitlements in, 29–32; situations with no, 213
entitlement, legal: allocation of, 6, 116; in Coase Theorem, 5–6, 17–18, 27, 116; effect on outcome of bargaining, 27–8; endowment effect in, 6; evidence of valuation of, 211–13; status quo effect, or endowment effect, 116
entrepreneurs: availability entrepreneurs, 38, 48, 375, 385; fairness entrepreneurs, 32
errors: cost-benefit analysis to contain availability errors, 390; costs of, 190–1; effect of errors in judgment, 37–8; examples of availability errors, 376–80
evaluation. See valuation.
evidence: beyond a reasonable doubt standard, 41; clear and convincing evidence standard, 41; conditions for suppression of, 108–9; preponderance of evidence standard, 40–1
exchange: experiment in bilateral bargaining, 223–5; experiment in exchange between two goods, 225–9

Farnsworth, Ward, 28
Fischhoff, Baruch, 95–8
framing effects: in cognitive decision theory, 261–2; in mental accounting, 6–7; in surveys related to cognitive decision theory, 276, 282–3; in theory of outcome evaluation, 330
Frisch, Daniel D., 171

game theory: ultimatum game, 8; ultimatum game as example of bounded self-interest, 21–6
Goia, Dennis, 161
golden rule effect, 267, 270–1, 282
goods: evaluated as losses, 213; induced value technique to value, 213; willingness to pay (WTP), 211
Gruber, Jonathan, 30

Hastorf, Albert H., 356–7
heuristic devices, or rules of thumb: anchoring, 5; availability heuristic, 5, 15, 38, 331; case-based decisions, 5; in decision making, 3; erroneous conclusions of, 15
heuristics: in cognitive theory, 327, 400; representativeness heuristic, 330
hindsight: adaptations in legal system to rule of, 103–11; fraud by hindsight, 107–8; judging in, 95–6
hindsight bias: adaptation to avoid, 103–11; causes of, 96–8; cognitive strategies to avoid, 98; comparison of negligence and strict liability under, 101; creeping determinism theory, 97; defined, 38, 95; economic effects of, 100–103; in negligence determinations, 38–9; prescriptions for, 40–2; responding to, 40; in tort system, 39–40 See also debiasing; learning from experience
homo reciprocans, 8–9

indexing for inflation: absence of tax rate bracket indexing, 412–15; of tax rates, 412–15
inertia: behavioral theory in contract negotiation, 125–36; in contract term preferences, 120–5; in experiments to test for contract negotiation preferences, 120–5; psychological power of, 136 See also regret theory
inflation: effect on levels of taxable income, 412–15; indexing for, 412–15
information: ability to accurately process, 47; delegation to entity with, 193–4; errors in estimating probabilities from, 331; limits in bounded rationality, 206; prescriptions for provision of, 42–5; salience of missing, 171
informational cascades, 374–5, 383–6
institutions: belief systems of, 146–7; delegation to, 195–6; exercising delegated authority, 194; making High-Low second-order decisions, 196–200; picking instead of choosing, 201–3
Index

intuition: related to omission and commission, 169–70
Isaac, R. Mark, 368

Joy v. North, 111

judgments, legal: influence of hindsight bias on, 95–6, 98–9; procedures to avoid biased, 103–4; translation into dollar amounts, 7
jurors: golden rule effect, 267, 270–1, 282; informed of hindsight bias, 39; requirements of negligence standard for, 38
Kahan, Marcel, 127–8
Kahneman, Daniel, 15, 118, 131–2, 170
Kamin, Kim, 99, 103
Kaplow, Louis, 290
Klausner, Michael, 127–8
Knetsch, Jack, 118–19
Kreps, David, 156

LaBine, Gary, 9
LaBine, Susan, 99
Landman, Janet, 133

law: approach of behavioral law and economics to, 13–21; bounded rationality and self-interest in, 32–8; demand for, 7–9; economic analysis of, 117–18; explanations of content of, 32; fairness norms in, 32–8; rational choice theory in economic analysis of, 117–18 See also demand for law
law and economics: arguments for behavioral approach to, 50–1; defining features of, 13–14, 16–18; explanations of content of law, 32
law and economics, behavioral: effect on work incentive of redistributive legal rules and taxes, 298; framework and applications, 51–3; normative orientation, 48–9
law and economics, traditional: based on neoclassical economics, 49–50; contract negotiation inaction in, 126; contract negotiation in traditional, 117; normative orientation, 46–8; preference exogeneity assumption, 117–20, 137
learning from experience, 96

legal rules: golden rule effect, 267, 270–1, 282; inefficient, 28; wealth redistribution through, 288–90
legal rules, redistributive: criticism of, 295–6; defined, 288; effect of insurance on effect of, 293–4; effect on work incentive, 289–90, 292–8; mental accounting in context of, 294–7
legal system: adaptations to hindsight bias, 103–11; adaptation to avoid hindsight bias, 103–11; effect on preferences and values, 2
liability: Hand Formula to determine negligence, 260; professional, 110; prohibition against hindsight-based, 107–8; reducing impact of hindsight bias in judgments of, 109 See also negligence standard; strict liability
Loewenstein, George, 368

loss aversion: in cognitive decision theory, 261–2; in reference effect, 329; relevance to taxation, 401–2; theory of, 19, 133; in thinking about gains and losses, 5–6; weighting of value of losses, 213

making whole concept: in cognitive decision theory, 262; decision and experienced utility in assessing, 283–4; in first experimental survey, 263–70; injury awards in context of, 282; in second experimental survey, 270–6

March, James, 146
Margolis, Howard, 48
markets: absence in nuisance cases, 310–17; experiments for consumption goods, 216–20; experiments for induced value tokens, 214–16; role in dictating behavior, 19; signals for exchange in, 316; substitutions in, 315–17
Melamed, A. Douglas, 302–3

mental accounting: implications for law and policy, 6–7; occurrences and effects, 294–7
Messick, David, 148–9, 357
Miller, Dale, 132, 170

motivation: bias arising from, 155–6; related to second-order decisions, 206
negligence standard: converted to strict liability by hindsight bias, 100–103, 110; effect of defendants’ perception of, 39; effect of hindsight bias in, 38–9, 99, 100–103; Hand formula to determine liability under, 260; requirements of jurors under, 38 negotiations: bargaining impasse in, 355; before judgment in nuisance cases, 314–15 See also bargaining; contract negotiation network benefits: use of standard terms for contracts, 127–9 nonenforcement: as status quo contract term, 141–2 norms: compliance with ex ante, 105–6; fairness-related, 26, 32–7 norm theory, 132–3 nuisance cases: acrimony as obstacle to bargaining in, 311–12; analysis of behavior in real, 303–5; appealed cases, 318; bargains in, 311–12; Calabresi and Melamed’s illustration of, 302–3; Coase’s illustration of, 302; decisions of courts in, 318–19; distaste for bargaining as obstacle in, 312–17; illustrative, 305–10; with market mechanisms, 315–17; negotiations before judgment, 314–15; obstacles to bargaining, 312–17, 320; settlement versus litigated to judgment, 317–18; transaction costs as obstacles to bargaining, 320

Office of Information and Regulatory Affairs (OIRA), 392 omissions and commissions, 169–71 optimism: adaptability of, 158; as bias, 4; culture of, 156; optimism effect, 334; relation to trust, 156; unrealistic, 4, 291–3, 298 See also overoptimism options: choice with, 3–4; compromise and contrast effects, 61–2; value maximization in choice of, 61 outcomes: of bargaining, 27–8; coding in evaluation of, 330; cognitive decision theory surveys, 263–70; estimating probabilities of, 331; evaluation under prospect theory, 43–4, 331–2; framing effects in evaluation of, 330; outcome valuation functions, 329–31; perception in reference transaction, 26; role of acrimony in, 8–9 outrage model, 234–5 overconfidence: bias in, 36; in estimating outcomes, 331; in risk judgments, 4 overestimation: self-serving bias in, 356–7 overoptimism: biases based on, 39, 158; combined with salience, 47; effect on company’s belief system, 149–50 patent law: effect of hindsight bias in, 39, 106–7 paternalism and antipaternalism, 46–7, 49 perception: in availability heuristic, 374; of entitlements, 29–32; in hindsight bias, 38, 95; of negligence standard, 39; of outcomes, 26; of risk, 47; of status quo, 120–5 personal injury cases: questionnaire about trial practices in, 277–82 policy issues: efficient contract default rules, 137–41; using nonenforcement default rules, 141–2 Polinsky, A. Mitchell, 46 Posner, Richard A., 16 predictions: based on rationality, 20–1; of compromise effect, 62–6; of contrast effect tests, 66–71; of post-trial events, 28–9; of prospect theory, 335–6; related to law, 2; in ultimatum game, 21–2 preferences: actions related to different, 25; with allocated legal entitlement, 116; constructed, 1–3; context-dependent, 71–3; effect of status quo bias on contract terms, 119–20; legal system’s effect on, 2; in traditional law and economics analysis, 117–20, 137 prescriptions: to deter criminal behavior, 46; for hindsight bias, 40–2; for provision of information, 42–5 prescriptive analysis: bounded rationality in, 42–5; bounded willpower in, 45–6
Index

probabilities: assessments based on relevant examples, 374; based on anchoring, 5; estimation of risk, 290–4; information errors effect, 331 product disparagement laws, 388–9 prominence: defined, 408; in explanation of hidden taxes, 408; in indexing for inflation issue, 413 property rights: in Coase Theorem, 223; effect on resource allocation, 18–19 See also entitlement, legal prospect theory: evaluation of outcomes under, 43–4, 331–2; to explain observed behavior, 15–16; loss aversion, 401–2; predictions of, 335–6 punitive awards: outrage model, 234–5

Raab v. General Physics Corp. (1993), 158 Rabin, Matthew, 24–5 Rachlinski, Jeffrey, 39, 99, 103 ratio-difference principles, 330 rational choice theory: assumptions of, 118; behavioral model, 117–20; models, 1; preference under, 117–18 rationality: of conventional economics, 20–1; managerial, 144–5; organizational, 144; of second-order decisions, 206 rationality, bounded, 14, 16; bias arising from, 155; defined, 144; in deterring criminal behavior, 45; framework for behavioral law and economics, 52–3; leaning toward antipaternalism, 46–7; second-order decisions as response to, 203, 206; in traditional law and economics, 50 Raz, Joseph, 202 reference effect: in prospect theory, 333–4; as valuation function, 329 reflection effect, 329 regret theory: explained, 130–5; regret avoidance hypothesis, 134–5 regulation: effect of availability heuristic on, 37–8 reputational cascades, 374–5, 383–6 resource allocation: in Coase Theorem, 5–6, 17–18, 116, 211, 223; effect on property rights, 18–19 responsibility: avoidance of, 194; for decisions, 191 Revenue Act (1978), 415 Revenue Reconciliation Act (1993), 416 rights: in market environment, 316; in nuisance cases with no substitutes or commensuration, 313–14 See also Coase Theorem; entitlement, legal; property rights risk: coding in responses to risk, 330; decisions based on optimistic bias, 4; estimation of probability of, 290–4; perception with combined overoptimism and salience, 47 risk judgments: of availability heuristic, 5; overconfidence in, 4 Ritov, Ilana, 170 rounding, 330 rules: with exceptions, 207n2; in High-Low second-order decisions, 198–9; private self-control, 200; as strategies for decision making, 188 See also business judgment rule; contract default rules; golden rule; legal rules rules of thumb. See heuristic devices, or rules of thumb.

sellers (cont.)
about reluctance to buy and sell, 222–3; in experiments for consumption goods markets, 216–20; in experiments for induced value token markets, 214–16; valuation of entitlements, 211–13; valuation of induced value tokens, 213
selling price concept: in cognitive decision theory, 262; in first experimental survey, 263–70; injury rewards in context of, 282; in second experimental survey, 270–6
Sen, Amartya, 285
