## Index

**A. V. Roe (aircraft manufacturer)** 79

**academic scientists**
- desire for ‘scientific general staff’ 165–6
- image of self-mobilisation of academic science 161–2
- importance of distinguishing between different roles of academic scientists 165–6
- many leave research corps at end of war 167
- most remain in universities to teach 161
- over-emphasise significance of operational research 204–5
- recruitment to advisory positions and operational research 163–5
- recruitment of selected academics to research corps 162–3
- remain in state service 167
- role in government in Second World War 160–6
- on science and the military in interwar period 122–4

**see also science**

**Acworth, Captain Bernard** 117, 319, 336

**administrative class of the civil service**
- admiration of scientific advisers for 184–5
- concentration in Whitehall 187
- First Division Association defends 139
- growth after the Second World War 168
- role in policy making 182
- in Second World War 147

**see also civil service and state servants and technocratic critique**

**Admiralty** 73, 79

**highest grades in 186**

**permanent secretary on role of professional civil servants 182**

**senior officials of in Second World War 150–6**

**Admiralty Research Laboratory** 115, 119, 125, 126, 130, 131

**Aeroplane, The** 26

**Air League** 25, 26

**aircraft carriers, interwar** 30–1, 33

**aircraft industry**
- 1945–50 101–3
- 1950–5 103
- essentially military 42
- no mass production in 43–5

**Albu, Austen MP** 203

**Alder, Ken** 327

**Amalgamated Engineering Union and arms industry** 85

**Ambler, Eric** 196

**on interwar arms engineers 135**
