<b>Preface</b>	<b>page xi</b>
<b>Illustration credits</b>	<b>xiii</b>
<b>Part I The setting of the problem</b>	<b>1</b>
1 Outline history of investigations	1
2 Current contributions on origin	6
3 Challenges to customary procedures	13
4 Working principles	21
5 Stratigraphic framework	27
6 General Mesozoic palynologic evidence	34
7 Integration of Mesozoic floras and faunas	43
<b>Part II The evidence for Cretaceous origin</b>	<b>55</b>
8 Mesozoic megafossils	55
9 English Barremian monosulcate pollen	118
10 First convincing angiospermous fossils	197
11 Cretaceous angiosperm consolidation	215

x      **Contents**

<b>Part III</b>	<b>Consequences and conclusions</b>	<b>225</b>
12	Cenozoic angiosperm radiation	225
13	Research unattained but possible	231
14	Principles, time and choice	234
15	General biological conclusions	246
	<b>Glossary</b>	<b>255</b>
	<b>References</b>	<b>270</b>
	<b>Index</b>	<b>291</b>
