Contents

| | |
|--|-----------|
| <i>Preface</i> | page xiii |
| <i>Introduction</i> | 1 |
| <i>'E.C.' – A personal memoir</i> | 3 |
| 1 Polyphenols – structure and biosynthesis | 10 |
| 1.1 Phenolic metabolism in plants | 10 |
| 1.2 Plant polyphenols (vegetable tannins) | 18 |
| 1.2.1 Properties and classification | 20 |
| 1.3 Condensed proanthocyanidins | 23 |
| 1.3.1 Flavan-3-ols and dimeric procyanidins – structure and stereochemistry | 24 |
| 1.3.2 Proanthocyanidins of the A group | 31 |
| 1.3.3 Higher oligomeric and polymeric proanthocyanidins | 31 |
| 1.3.4 Biosynthesis of proanthocyanidins | 35 |
| 1.4 Shape and conformation of proanthocyanidins | 42 |
| 1.4.1 Flavan-3-ol conformations | 43 |
| 1.4.2 ¹ H NMR spectroscopy of procyanidin dimers | 45 |
| 1.4.3 Procyanidin conformations – MM2 calculations | 48 |
| 1.5 Gallic acid metabolism | 51 |
| 1.5.1 Biosynthesis of galloyl esters | 52 |
| 1.5.2 Depside metabolites | 55 |
| 1.5.3 Hexahydroxydiphenoyl esters and related metabolites | 58 |
| 1.5.4 Oxidative metabolism – pathway (b) | 63 |
| 1.5.5 Oxidative metabolism – pathway (c) | 68 |
| 1.5.6 Oxidative metabolism – pathway (d) – ‘open chain’ derivatives of D-glucose | 70 |
| References | 76 |

| | | |
|----------|---|-----|
| x | <i>Contents</i> | |
| 2 | Molecular recognition | 84 |
| 2.1 | Introduction | 84 |
| 2.2 | Molecules of life – DNA | 85 |
| 2.3 | Molecules of life – proteins | 87 |
| 2.4 | Non-covalent molecular interactions | 90 |
| 2.5 | Hydrogen bonds and hydrogen bonding | 93 |
| 2.5.1 | Carbohydrates | 97 |
| 2.5.2 | Geometric considerations | 101 |
| 2.5.3 | Proton donor and proton acceptor scales | 104 |
| 2.5.4 | Hydrogen bonding and the construction of molecular aggregates | 107 |
| 2.6 | Solvation | 109 |
| 2.6.1 | Reflections on water and ‘hydrophobic effects’ | 112 |
| 2.7 | $\pi - \pi$ Interactions | 118 |
| 2.7.1 | ‘Face to face’ $\pi - \pi$ interactions | 119 |
| 2.7.2 | ‘Edge to face’ $\pi - \pi$ interactions | 127 |
| | References | 132 |
| 3 | Molecular recognition – phenols and polyphenols | 138 |
| 3.1 | Introduction | 138 |
| 3.2 | General observations | 139 |
| 3.2.1 | Hydrogen bonding | 139 |
| 3.2.2 | Solvation and ‘hydrophobic effects’ | 145 |
| 3.2.3 | Crystal structures of simple phenols | 151 |
| 3.2.4 | Model studies with caffeine | 155 |
| 3.2.5 | Cyclodextrins and polysaccharides | 163 |
| 3.2.6 | Studies with peptides and proteins | 168 |
| | References | 174 |
| 4 | Taste, bitterness and astringency | 178 |
| 4.1 | Food selection – ecological implications | 178 |
| 4.2 | Nutritional effects | 186 |
| 4.3 | Phytotoxicity | 189 |
| 4.4 | Pasture bloat | 190 |
| 4.5 | Taste and flavour – fruit and beverages | 192 |
| 4.5.1 | Introduction | 192 |
| 4.5.2 | Astringency | 193 |
| 4.5.3 | Grapes and wines | 194 |
| 4.5.4 | Apples and pears; ciders and perry | 196 |
| 4.5.5 | Beers and lagers | 200 |

| <i>Contents</i> | | xi |
|-----------------|---|-----|
| 4.5.6 | Teas | 203 |
| 4.5.7 | Astringency of teas | 209 |
| 4.5.8 | Tea cream and tea creaming | 212 |
| 4.5.9 | Cocoa | 216 |
| | References | 219 |
| 5 | Maturation – changes in astringency | 226 |
| 5.1 | Introduction | 226 |
| 5.2 | Ripening of fruit | 227 |
| 5.2.1 | Persimmon | 228 |
| 5.3 | Moderation of astringency – carbohydrate complexation | 231 |
| 5.3.1 | Algal polysaccharides | 235 |
| 5.3.2 | Pectin | 235 |
| 5.3.3 | Xanthan | 236 |
| 5.4 | Teas, casein and astringency | 241 |
| 5.5 | Ageing of red wines | 245 |
| 5.5.1 | Colour changes | 246 |
| 5.5.2 | Ageing of wines and other alcoholic beverages in oak | 252 |
| | References | 257 |
| 6 | Anthocyanin copigmentation – fruit and floral pigments | 262 |
| 6.1 | Introduction | 262 |
| 6.2 | Anthocyanins | 263 |
| 6.2.1 | Natural anthocyanins | 267 |
| 6.2.2 | Location of anthocyanins | 269 |
| 6.2.3 | Self-association of anthocyanins | 270 |
| 6.3 | Copigmentation | 274 |
| 6.3.1 | Intermolecular copigmentation | 274 |
| 6.3.2 | Intramolecular copigmentation | 283 |
| 6.4 | Metalloanthocyanins | 286 |
| 6.5 | The blue rose? | 290 |
| | References | 294 |
| 7 | Polyphenols and herbal medicines | 298 |
| 7.1 | Introduction | 298 |
| 7.1.1 | Biological and pharmacological activity | 301 |
| 7.2 | Metal-ion complexation | 304 |
| 7.3 | Antioxidant activity | 306 |
| 7.3.1 | Cellular pro-oxidant states | 307 |
| 7.3.2 | Phenols and polyphenols as antioxidant nutrients | 312 |

Table of Contents

[More information](#)

| | | |
|----------|---|------------|
| xii | <i>Contents</i> | |
| | 7.3.3 Green tea and the ‘French paradox’ | 315 |
| | 7.4 Polyphenol complexation | 323 |
| | References | 330 |
| 8 | Quinone tanning and oxidative polymerisation | 335 |
| | 8.1 Introduction | 335 |
| | 8.1.1 Quinone intermediates | 339 |
| | 8.1.2 Black tea pigments – thearubigins – thoughts and speculation | 344 |
| | 8.2 Quinone tanning: tanned silks and insect cuticle sclerotisation | 354 |
| | 8.3 Melanins | 358 |
| | 8.4 The mussel byssus: an underwater adhesive | 361 |
| | 8.5 Cocoa | 366 |
| | 8.5.1 Fermentation | 367 |
| | 8.5.2 Drying | 368 |
| | 8.5.3 Roasting | 369 |
| | References | 371 |
| 9 | Polyphenols, collagen and leather | 374 |
| | 9.1 Introduction | 374 |
| | 9.2 Vegetable tannage | 374 |
| | 9.2.1 Vegetable tannins of commerce | 375 |
| | 9.2.2 Early ideas on the mechanism of vegetable tannage | 377 |
| | 9.3 Collagen – primary structure and the triple helix | 379 |
| | 9.4 Biosynthesis of collagen (tropocollagen) | 383 |
| | 9.5 Fibrillogenesis | 384 |
| | 9.5.1 Fibrils – molecular organisation | 388 |
| | 9.5.2 Microfibrils | 391 |
| | 9.6 Connective tissue and the structure of skin | 391 |
| | 9.7 Vegetable tannage – some new ideas | 396 |
| | 9.8 Vegetable tannins and the durability of leather | 401 |
| | References | 407 |
| | <i>Biological index</i> | 410 |
| | <i>General index</i> | 412 |
