EGYPTOLOGY TODAY

Egyptology Today examines how modern scholars study all aspects of ancient Egypt, one of the greatest of all ancient civilizations. In essays by archaeologists, curators, scholars, and conservators who are actively involved in research or applied aspects of Egyptology, this book looks at the techniques and methods used to increase our understanding of a distant culture that was as old to the Greeks and Romans as their cultures are to us. Topics range from how tombs and other monuments are discovered, excavated, recorded, and preserved to the study of Egyptian history, art, artifacts, and texts. Each chapter shows how modern Egyptology approaches, learns about, and strives to preserve the ancient remains of one of the most fascinating cultures in human history.

Richard H. Wilkinson is professor of Egyptian archaeology at the University of Arizona. As Director of the University of Arizona Egyptian Expedition, he has conducted archaeological projects in Egypt's Valley of the Kings for twenty years and is currently excavating the memorial temple of Queen Tausert in western Thebes. He is the author of many articles and reviews as well as seven previous books, most recently *The Complete Gods and Goddesses of Ancient Egypt* and *Egyptian Scarabs*.
