Contents

Preface	vii
Introduction	ix
1 Iteration of inner functions and boundaries of components of the Fatou set	1
<i>D. Bargmann</i>	
2 Conformal automorphisms of finitely connected regions	37
<i>A. F. Beardon and D. Minda</i>	
3 Meromorphic functions with two completely invariant domains	74
<i>W. Bergweiler and A. Eremenko</i>	
4 A family of matings between transcendental entire functions and a Fuchsian group	90
<i>S. Bullett and M. Freiburger</i>	
5 Singular perturbations of z^n	111
<i>R. L. Devaney, M. Holzer, D. M. Look, M. Moreno Rocha and D. Uminsky</i>	
6 Residual Julia sets of rational and transcendental functions	138
<i>P. Domínguez and N. Fagella</i>	
7 Bank-Laine functions via quasiconformal surgery	165
<i>D. Drasin and J. K. Langley</i>	
8 Generalisations of uniformly normal families	179
<i>W. K. Hayman and A. Hinkkanen</i>	
9 Entire functions with bounded Fatou components	187
<i>A. Hinkkanen</i>	
10 On multiply connected wandering domains of entire functions	217
<i>M. Kisaka and M. Shishikura</i>	
11 Fractal measures and ergodic theory of transcendental meromorphic functions	251
<i>J. Kotus and M. Urbański</i>	
12 Combinatorics of bifurcations in exponential parameter space	317
<i>L. Rempe and D. Schleicher</i>	
13 Baker domains	371
<i>P. J. Rippon</i>	
14 Escaping points of the cosine family	396
<i>G. Rottenfusser and D. Schleicher</i>	
15 Dimensions of Julia sets of transcendental meromorphic functions	425
<i>G. M. Stallard</i>	
16 Abel's functional equation and its role in the problem of <i>croissance régulière</i>	447
<i>G. Szekeres</i>
